## **Decomposed**

2019-10-15

the hidden material histories of music music is seen as the most immaterial of the arts and recorded music as a progress of dematerialization an evolution from physical discs to invisible digits in decomposed kyle devine offers another perspective he shows that recorded music has always been a significant exploiter of both natural and human resources and that its reliance on these resources is more problematic today than ever before devine uncovers the hidden history of recorded music what recordings are made of and what happens to them when they are disposed of devine s story focuses on three forms of materiality before 1950 78 rpm records were made of shellac a bug based resin between 1950 and 2000 formats such as lps cassettes and cds were all made of petroleum based plastic today recordings exist as data based audio files devine describes the people who harvest and process these materials from women and children in the global south to scientists and industrialists in the global north he reminds us that vinyl records are oil products and that the so called vinyl revival is part of petrocapiialism the supposed immateriality of music as data is belied by the energy required to power the internet and the devices required to access music online we tend to think of the recordings we buy as finished products devine offers an essential backstory he reveals how a range of apparently peripheral people and processes are actually central to what music is how it works and why it matters

## ***Amazing Machines: Tough Trucks***
