this unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day relying on written records from as far back as 2400 bce and using sources ranging from the bible to security council resolutions the author pieces together the history of a subject which is almost as old as civilisation itself the author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them protecting civilians who are either inadvertently or intentionally caught up between them and controlling the use of particular classes of weapons that may be used in times of conflict thus it is that this work is divided into three substantial parts volume 1 on the laws affecting combatants and captives volume 2 on civilians and volume 3 on the law of arms control this second book on civilians examines four different topics the first topic deals with the targeting of civilians in times of war this discussion is one which has been largely governed by the developments of technologies which have allowed projectiles to be discharged over ever greater areas and attempts to prevent their indiscriminate utilisation have struggled to keep pace the second topic concerns the

destruction of the natural environment with particular regard to the utilisation of starvation as a method of warfare and unlike the first topic this one has rarely changed over thousands of years although contemporary practices are beginning to represent a clear break from tradition the third topic is concerned with the long standing problems of civilians under the occupation of opposing military forces where the practices of genocide collective punishments and or reprisals and rape have occurred the final topic in this volume is about the theft or destruction of the property of the enemy in terms of either pillage or the intentional devastation of the cultural property of the opposition as a work of reference this set of three books is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare it also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself

the present volume of the history of egypt comprises only a short period of a few centuries but a period which is more full of material than any other age of egypt the foreign wars the contact with other nations the architectural activity the luxury and brilliance of this cycle all render it the most attractive in the long history of the country the present statement of the material is therefore on a far larger scale than in the previous volume the standard of leaving no fact or monument referring to the regal history unnoticed having been maintained throughout such a text book is of necessity only a work of reference in many parts but general observations on the condition of the country and the circumstances of the rule have given scope for summarising the view suitably for the historical reader in particular the decline of egyptian rule in syria has been for the first time treated as a consecutive history

this definitive multi volume history of the world s first known state reveals that much of what we have been taught about ancient egypt is the product of narrow minded visions of the past drawing on a lifetime of research john romer chronicles

the history of ancient egypt from the building of the great pyramid through the rise and fall of the middle kingdom a peak of pharaonic culture and the period when writing first flourished he reveals how the grand narratives of nineteenth and twentieth century egyptologists have misled us by portraying a culture of cruel monarchs and chronic war instead based in part on discoveries of the past two decades this extraordinary account shows what we can really learn from the remaining architecture objects and writing a history based on physical reality
