Emergency Department Compliance Manual, 2015 Edition 2014-12-18 both research and policy on balancing work and family life have tended to focus on mothers lives there has been a general lack of comparative research to the complex intersection between old and new forms of masculinity and between fatherhood work life balance gender relations and children s well being as a result men s fathering roles and their struggle with work life

balance have often been neglected these cultural challenges should be better theorized within family and social policy research this volume examines how fathers fulfill their roles both within the family and at work and what institutional support could be of most benefit to them in combining these roles

1999 the visual system consists of hierarchically organized distinct anatomical areas functionally specialized for processing different aspects of a visual object felleman van essen 1991 these visual areas are interconnected through ascending feedforward projections descending feedback projections and projections from neural structures at the same hierarchical level lamme et al 1998 accumulating evidence from anatomical functional and theoretical studies suggests that these three projections play fundamentally different roles in perception however their distinct functional roles in visual processing are still subject to debate lamme roelfsema 2000 the focus of this research topic is the roles of feedforward and feedback projections in vision even though the notions of feedforward feedback and reentrant processing are widely accepted it has been found difficult to distinguish their individual roles on the basis of a single criterion we welcome empirical contributions theoretical contributions and reviews that fit into any one or a combination of the following domains 1 their functional roles for perception of specific features of a visual object 2 their contributions to the distinct modes of visual processing e g pre attentive vs attentive conscious vs unconscious 3 recent techniques methodologies to identify distinct functional roles of feedforward and feedback projections

and corresponding neural signatures we believe that the current research topic will not only provide recent information about feedforward feedback processes in vision but also contribute to the understanding fundamental principles of cortical processing in general Financial Disclosure Reports of Members of the U.S. House of Representatives for the Period Between January 1, 1999 to December 31, 1999 2000 more than 1 400 cosmetics and toiletry formulations are detailed in this well received and useful book it is based on information obtained from industrial suppliers

Balancing Work and Family in a Changing Society 2018-08-15 the albuquerque convention center was the venue for the 1993 cryogenic engineering conference the meeting was held jointly with the international cryogenic materials conference walter f stewart of los alamos national laboratory was conference chairman albuquerque is near los alamos national laboratory which has been a significant contributor to the cryogenics community since the early days of the manhattan project albuquerque is also the home of the air force s phillips laboratory which has a lead role in developing cryocoolers the program consisted of 322 cec papers more than a 30 increase from cec 91 and 20 more than cec 89 this was the largest number of papers ever submitted to the cec of these 249 papers are published here in volume 39 of advances in cryogenic engineering once again the volume is published in two books this volume includes a cumulative index for the cec volumes from 1975 1993 volumes 21 23 25 27 29 31 33 35 37 and 39 of advances in cryogenic engineering the first 20 volumes are indexed in volume 20 a companion cumulative index for the icmc volumes volumes 22 through 40 appears in volume 40 this is my first volume as editor i would not have been able to have done it without the assistance of the many reviewers especially

appreciated was the instruction manual left me by the previous editor ron fast

NASA Reference Publication 1977 a summary and analysis has been made of results obtained in a systematic research program concerned with the effects of wing sweep aspect ratio taper ratio and dihedral on the rolling moment due to sideslip characteristics of wing fuselage configurations up to mach numbers of about 0.95 other test results are presented to show trends of rolling moment due to sideslip with mach number for a few wings in the transonic and supersonic speed range

Voices 1985 the book describes the observational work of william and caroline herschel it focuses on deep sky objects observed 1774-1817 most were discovered by william in the monumental sweep campaign 1783-1802 assisted by his talented sister 2500 objects were published in three catalogues the study of the sky from southern england also concerned double stars and the solar system yielding the uranus discovery in 1781 but william herschel was much more than a mere observer he built large reflectors developed new methods and thought about the nature and evolution of cosmic objects and the structure of the milky way he was an extremely influential astronomer and had a worthy successor his son john
