Dictionary of European Proverbs 2012-11-12 this dictionary contains over 50 000 proverbs in some 70 european languages and dialects arranged in 2 500 sets it is the fruits of over 40 years of collection and research the only collection of proverbs on anything like this scale ever to be published anywhere in the world emanuel strauss has trawled through innumerable collections of proverbs in all languages from early printed books and rare items to the latest theses and journals and grouped together many thousands of proverbs in sets of equivalent meaning comprehensive indexes for each language provide access to any proverb by way of its key words a critical bibliography musters some 500 items from incunabula to the current decade

Text, Speech, and Dialogue 2016-09-02 this book constitutes the refereed proceedings of the 19th international conference on text speech and dialogue tsd 2016 held in brno czechrepublic in september 2016 the 62 papers presented together with 3 abstracts of invited talks were carefully reviewed and selected from 127 submissions they focus on topics such as corpora and language resources speech recognition tagging classification and parsing of text and speech speech and spoken language generation semantic processing of text and speech integrating applications of text and speech processing automatic dialogue systems as well as multimodal techniques and modelling

Telephone Directory 1978-08 ontology was once understood to be the philosophical inquiry into the structure of reality the analysis and categorization of what there is recently however a field called ontology has become part of the rapidly growing research industry in information technology the two fields have more in common than just their name theory and applications of ontology is a two volume anthology that aims to further an informed discussion about the relationship between ontology in philosophy and ontology in information technology it fills an important lacuna in cutting edge research on ontology in both fields supplying stage setting overview articles on history and method presenting directions of current research in either field and highlighting areas of productive interdisciplinary contact theory and applications of ontology computer applications presents ontology in ways that philosophers are not likely to find elsewhere the volume offers an overview of current research in ontology distinguishing basic conceptual issues domain applications general frameworks and mathematical formalisms it introduces the reader to current research on frameworks and applications in information technology in ways that are sure to invite reflection and constructive responses from ontologists in philosophy

Intermodal Surface Transportation Efficiency Act of 1991 1994 this book offers a clear understanding of the concept of context aware machine learning including an automated rule based framework within the broad area of data science and analytics particularly with the aim of data driven intelligent decision making thus we have bestowed a comprehensive study on this topic that explores multi dimensional contexts in machine learning modeling context discretization with time series modeling contextual rule discovery and predictive analytics recent pattern or rule based behavior modeling and their usefulness in various context aware intelligent applications and services the presented machine learning based techniques can be employed in a wide range of real world application areas ranging from personalized mobile services to security intelligence highlighted in the book as the interpretability of a rule based system is high the automation in discovering rules from contextual raw data can make this book more impactful for the application developers as well as researchers overall this book provides a good reference for both academia and industry people in the broad area of data science machine learning ai driven computing human centered computing and personalization behavioral analytics iot and mobile applications and cybersecurity intelligence

Theory and Applications of Ontology: Computer Applications 2010-09-02 handbook of differential equations evolutionary equations is the last text of a five volume reference in mathematics and methodology this volume follows the format set by the preceding volumes presenting numerous contributions that reflect the nature of the area of evolutionary partial differential equations the book is comprised of five chapters that feature the following a thorough discussion of the shallow equations theory which is used as a model for water waves in rivers lakes and oceans it covers the issues of modeling analysis and applications evaluation of the singular limits of reaction diffusion systems where the reaction is fast compared to the other processes and applications that range from the theory of the evolution of certain biological processes to the phenomena of turing and cross diffusion instability detailed discussion of numerous problems arising from nonlinear optics at the high frequency and high intensity regime geometric and diffractive optics including wave interactions presentation of the issues of existence blow up and asymptotic stability of solutions from the equations of solutions to the equations of linear and non linear thermoelasticity answers to questions about unique space such as continuation and backward uniqueness for linear second order

parabolic equations research mathematicians mathematics lecturers and instructors and academic students will find this book invaluable review of new results in the area continuation of previous volumes in the handbook series covering evolutionary pdes new content coverage of de applications

Context-Aware Machine Learning and Mobile Data Analytics 2022-01-01 this book constitutes the thoroughly refereed joint post proceedings of the third international workshop on mining ubiquitous and social environments muse 2012 held in bristol uk in september 2012 and the third international workshop on modeling social media msm 2012 held in milwaukee wi usa in june 2012 the 8 full papers included in the book are revised and significantly extended versions of papers submitted to the workshops they cover a wide range of topics organized in three main themes communities and group structure in ubiquitous social media ubiquitous modeling and aspects of social interactions and influence

Handbook of Differential Equations: Evolutionary Equations 2009-04-29 this book examines how computer based programs can be used to acquire big digital cultural heritage data curate and disseminate it over the internet and in 3d visualization platforms with the ultimate goal of creating long lasting digital heritage repositories the organization of the book reflects the essence of new technologies applied to cultural heritage and archaeology each of these stages bring their own challenges and considerations that need to be dealt with the authors in each section present case studies and overviews of how each of these aspects might be dealt with while technology is rapidly changing the principles laid out in these chapters should serve as a guide for many years to come the influence of the digital world on archaeology and cultural heritage will continue to shape these disciplines as advances in these technologies facilitate new lines of research serif the book is divided into three sections covering acquisition curation and dissemination the major life cycles of cultural heritage data acquisition is one of the fundamental challenges for practitioners in heritage and archaeology and the chapters in this section provide a template that highlights the principles for present and future work that will provide sustainable models for digital documentation following acquisition the next section highlights how equally important curation is as the future of digital documentation depends on it preservation of digital data requires preservation that can guarantee a future for generations to come the final section focuses on dissemination as it is what pushes the data beyond the shelves of storage and allows the public to experience the past through these new technologies but also opens new lines of investigation by giving access to these data to researchers around the globe digital technology promises significant changes in how we approach social sciences cultural heritage and archaeology however researchers must consider not only the acquisition and curation but also the dissemination of these data to their colleagues and the public throughout the book many of the authors have highlighted the usefulness of structure from motion sfm work for cultural heritage documentation others the utility and excitement of crowdsourcing as a citizen scientist tool to engage not only trained students and researchers but also the public in the cyber archaeology endeavor both innovative tools facilitate the curation of digital cultural heritage and its dissemination together with all the chapters in this volume the authors will help archaeologists researchers interested in the digital humanities and scholars who focus on digital cultural heritage to assess where the field is and where it is going

Ubiquitous Social Media Analysis 2013-12-05 this is the second and slightly revised edition of this book a few errors have been fixed and some references to related work have been added i thank the readers for their comments on the first edition we analyze the search efficiency of a number of common refutational theorem proving strategies on propositional and near propositional problems search efficiency is concerned with the total number of proofs and partial proofs generated rather than with the sizes of the proofs we show that most common strategies produce search spaces of exponential size even on simple sets of clauses or else are not sensitive to the goal however clause linking which uses a reduction to propositional calculus has behavior that is more favorable in some respects a property that it shares with methods that cache subgoals a strategy which is of interest for term rewriting based theorem proving is the ordering strategy and we discuss it in some detail we show some advantages of a ordering over other strategies which may help to explain its efficiency in practice we also point out some of its combinatorial inefficiencies especially in relation to goal sensitivity and irrelevant clauses in addition sld resolution which is of importance for prolog implementation has combinatorial inefficiencies this may suggest basing prolog implementations on a different theorem proving strategy we also develop techniques for studying the asymptotic complexity of first order theorem provers this permits an analytic comparison of the worst case performances of various theorem proving

methods

Heritage and Archaeology in the Digital Age 2017-11-10 this book constitutes the refereed proceedings of the 9th extended semantic conference eswc 2012 held in heraklion crete greece in may 2012 the 53 revised full papers presented were carefully reviewed and selected from 212 submissions they are organized in tracks on linked open data machine learning natural language processing and information retrieval ontologies reasoning semantic data management services processes and cloud computing social and science in use and industrial digital libraries and cultural heritage and e government the book also includes 13 phd papers presented at the phd symposium The Efficiency of Theorem Proving Strategies 1999-10-28 00003000000 000 000000 0000000000 0000 00000 00112000 00000 6000000

The Semantic Web: Research and Applications 2012-05-24 this book constitutes the refereed proceedings of the 1998 international conference on analytic tableaux and related methods tableaux 98 held in oisterwijk near tilburg the netherlands in may 1998 the volume presents 17 revised full papers and three system descriptions selected from 34 submissions also included are several abstracts of invited lectures tutorials and system comparison papers the book presents new research results for automated deduction in various non standard logics as well as in classical logic areas of application include software verification systems verification deductive databases knowledge representation and its required inference engines and system diagnosis

photographers' gallery press 2019-12-20 this workshop brought together for the first time accelerator experts as well as experimental and theoretical high energy physicists from all over the world to consider the physics potential of high energy linear electron positron colliders a wide variety of physics cases were presented ranging from precision tests of the top quark and electroweak gauge bosons to searches of the intermediate mass higgs bosons and supersymmetric particles

Harris Pennsylvania Industrial Directory 1999 this open access book constitutes the refereed proceedings of the 15th international conference on semantic systems semantics 2019 held in karlsruhe germany in september 2019 the 20 full papers and 8 short papers presented in this volume were carefully reviewed and selected from 88 submissions they cover topics such as web semantics and linked open data machine learning and deep learning techniques semantic information management and knowledge integration terminology thesaurus and ontology management data mining and knowledge discovery semantics in blockchain and distributed ledger technologies

Automated Reasoning with Analytic Tableaux and Related Methods 2003-06-26 this book constitutes the refereed proceedings of the 8th mexican international conference on artificial intelligence micai 2009 held in guanajuato mexico in november 2009 the 63 revised full papers presented together with one invited talk were carefully reviewed and selected from 215 submissions the papers are organized in topical sections on logic and reasoning ontologies knowledge management and knowledge based systems uncertainty and probabilistic reasoning natural language processing data mining machine learning pattern recognition computer vision and image processing robotics planning and scheduling fuzzy logic neural networks intelligent tutoring systems bioinformatics and medical applications hybrid intelligent systems and evolutionary algorithms

Physics And Experiments With Linear Colliders (In 2 Vols) 1992-11-20 this publication deals with the late roman handmade grog tempered ware industries of east sussex the hampshire basin east kent and west kent presenting corpora for these various wares

Semantic Systems. The Power of AI and Knowledge Graphs 2019-11-04 this handbook plays a fundamental role in sustainable progress in speech research and development with an accessible format and with accompanying dvd rom it targets three categories of readers graduate students professors and active researchers in academia and engineers in industry who need to understand or implement some specific algorithms for their speech related products it is a superb source of application oriented authoritative and comprehensive information about these technologies this work combines the established knowledge derived from research in such fast evolving disciplines as signal processing and communications acoustics computer science and linguistics

Annual report 1994 biomass currently accounts for about 15 per cent of the global primary energy consumption and is particularly important as an energy resource in developing countries it will undoubtedly play an increasing role in the world s energy consumption which crops make up this large percentage of our energy resources where do they grow and what can be done to boost the levels of production what impact does their cultivation have on the environment and development the book starts with aspects of biomass accumulation harvesting

transportation and storage as well as conversion technologies for biofuels this is followed by a look at the environmental impact and economic and social dimensions including prospects for renewable energy the book then goes on to cover all the main potential energy crops for each main species it gives a brief description outlines the ecological requirements methods of propagation crop management rotation and production harvesting handling and storage processing and utilization then finishes with selected references all those whose work involves biomass production whether as agriculturalist student farmer producer planner or policy maker will find this book an invaluable reference work

MICAI 2009: Advances in Artificial Intelligence 2009-11-02 the second edition of this handbook provides a state of the art overview on the various aspects in the rapidly developing field of robotics reaching for the human frontier robotics is vigorously engaged in the growing challenges of new emerging domains interacting exploring and working with humans the new generation of robots will increasingly touch people and their lives the credible prospect of practical robots among humans is the result of the scientific endeavour of a half a century of robotic developments that established robotics as a modern scientific discipline the ongoing vibrant expansion and strong growth of the field during the last decade has fueled this second edition of the springer handbook of robotics the first edition of the handbook soon became a landmark in robotics publishing and won the american association of publishers prose award for excellence in physical sciences mathematics as well as the organization s award for engineering technology the second edition of the handbook edited by two internationally renowned scientists with the support of an outstanding team of seven part editors and more than 200 authors continues to be an authoritative reference for robotics researchers newcomers to the field and scholars from related disciplines the contents have been restructured to achieve four main objectives the enlargement of foundational topics for robotics the enlightenment of design of various types of robotic systems the extension of the treatment on robots moving in the environment and the enrichment of advanced robotics applications further to an extensive update fifteen new chapters have been introduced on emerging topics and a new generation of authors have joined the handbook s team a novel addition to the second edition is a comprehensive collection of multimedia references to more than 700 videos which bring valuable insight into the contents the videos can be viewed directly augmented into the text with a smartphone or tablet using a unique and specially designed app springer handbook of robotics multimedia extension portal handbookofrobotics.org

Late Roman Handmade Grog-Tempered Ware Producing Industries in South East Britain 2016-01-22 this book constitutes the refereed thoroughly refereed post workshop proceedings of the 18th international conference on engineering icwe 2018 held in cáceres spain in june 2018 the 18 revised full papers were selected from 40 submissions the workshops complement the main conference and explore new trends on core topics of engineering and provide an open discussion space combining solid theory work with practical on the field experience the workshop committee accepted five workshops for publication in this volume first international workshop on maturity of engineering practices matwep 2018 second international workshop on engineering theof things enwot 2018 fourth international workshop on knowledge discovery on the kdweb 2018 international workshop on engineering open data weod 2018 first international workshop on knowledge graphs on travel and tourism tourismkg 2018

Springer Handbook of Speech Processing 2007-11-28 popular mechanics inspires instructs and influences readers to help them master the modern world whether it s practical diy home improvement tips gadgets and digital technology information on the newest cars or the latest breakthroughs in science pm is the ultimate guide to our high tech lifestyle

Energy Plant Species 2013-10-31 the 6 volume set comprising the lncs books 12535 until 12540 constitutes the refereed proceedings of 28 out of the 45 workshops held at the 16th european conference on computer vision eccv 2020 the conference was planned to take place in glasgow uk during august 23 28 2020 but changed to a virtual format due to the covid 19 pandemic the 249 full papers 18 short papers and 21 further contributions included in the workshop proceedings were carefully reviewed and selected from a total of 467 submissions the papers deal with diverse computer vision topics part vi focusses on reassessing the evaluation of object detection computer vision problems in plant phenotyping fair face recognition and analysis and perception through structured generative models

Springer Handbook of Robotics 2016-07-27 the book presents findings of anthropological studies conducted by researchers from agricultural technology demonstration center in a number of african countries including zimbabwe ethiopia tanzania and mozambique the aim of these

ethnological studies is to understand the center s experience in these countries as well as the way it works in terms of institutional arrangement interaction between chinese and local staff and technology transfer a basic contention of the book is that insofar as these centers showcase china s achievements in domestic development for purpose of sharing the country s experiences with host countries what they do essentially points toward a new and innovative approach to foreign aid

???????????????? 1987 a unique multidisciplinary perspective on the problem of visual object categorization

Current Trends in Web Engineering 2018-11-28 the iutam symposium on finite inelastic deformations theory and applications took place from august 19 to 23 1991 at the university of hannover germany with 75 participants from 14 countries scope of the symposium was a fundamental treatment of new developments in plasticity and visco plasticity at finite strains this covered the phenomenological material theory based on continuum mechanics as well as the treatment of microstructural phenomena detected by precise experimental datas in a restricted number lectures on new experi mental facilities for measuring finite strains were also implemented into the symposium another important topic of the symposium was the treatment of reliable and effective computational methods for solving engineering problems with finite inelastic strains wi thin this context it was an essential feature that theory numerical and computational analysis were be seen in an integrated way in total 9 sessions with 37 lectures many of them given by well known keynote lecturers and a poster session with 10 contributions met fully our expectations of a high ranking up to date forum for the interaction of four topics namely the physical and mathematical modelling of finite strain inelastic deformations including localizations and damage as well as the achievements in the numerical analysis and implementation and the solution of complicated engineering systems special and important features were reliable material datas from macroscopic and microscopic tests as well as test results of complex engineering problems like deep drawing and extrusion

Alternatives to Laboratory Animals 2000 the book relates the history of post war psychiatry focusing on deinstitutionalisation namely the shift from asylum to community in the second part of the twentieth century after the second world war psychiatry and mental health care were reshaped by deinstitutionalisation but what exactly was involved in this process what were the origins of deinstitutionalisation and what did it mean to those who experienced it what were the ramifications both positive and negative of such a fundamental shift in psychiatric care post war psychiatry in the western world deinstitutionalisation and after seeks to answer these questions by exploring this momentous change in mental health care from 1945 to the present in a wide range of geographical settings the book articulates a nuanced account of the history of deinstitutionalisation highlighting the constraints and inconsistencies inherent in treating the mentally ill outside of the asylum while seeking to inform current debates about how to help the most vulnerable members of society

Popular Mechanics 1984-03 this book presents a synthetic analysis about the characteristics of time expressions and named entities and some proposed methods for leveraging these characteristics to recognize time expressions and named entities from unstructured text for modeling these two kinds of entities the authors propose a rule based method that introduces an abstracted layer between the specific words and the rules and two learning based methods that define a new type of tagging scheme based on the constituents of the entities different from conventional position based tagging schemes that cause the problem of inconsistent tag assignment the authors also find that the length frequency of entities follows a family of power law distributions this finding opens a door complementary to the rank frequency of words to understand our communicative system in terms of language use

Computer Vision - ECCV 2020 Workshops 2021-01-04 quinoa is an invaluable crop highlighted by the food and agriculture organization of the united nations fao as one of the world s main crops for future food security the first comprehensive review of quinoa this book includes four sections covering the history of the crop phylogeny and systematics botany and agrotechnology and the qualitative aspects economics and marketing of quinoa making it a vital resource for students and researchers of crop science

Human Genome News 1989 this is the second book to rf superconducting written by one of the leading experts the book provides fast and up to date access to the latest advances in the key technology for future accelerators experts as well as newcomers to the field will benefit from the discussion of progress in the basic science technology as well as recent and forthcoming applications researchers in accelerator physics will also find much that is relevant to their discipline

Chinese Agricultural Technology Aid in Africa 2022-05-23 this book constitutes the refereed proceedings of the international conference on
2023-01-06 the opposite of fate memories of a writing
life by amy tan

computer vision and graphics iccv'12 held in warsaw poland in september 2012 the 89 revised full papers presented were carefully reviewed and selected from various submissions the papers are organized in topical sections on computer graphics computer vision and visual surveillance
