the gregorian calendar consists of the following 12 months january 31 days february 28 days in a common year and 29 days in leap years march 31 days april 30 days may 31 days june 30 days july 31 days august 31 days september 30 days october 31 days november 30 days december 31 days tracking the moon s orbit october october is the tenth month and has 31 days november november is the eleventh month and has 30 days december december is the last month of the year with 31 days january the name january has been derived from janus the roman god of beginnings and endings january was an important month back in ancient rome here you can find numbers for all months of the year and a months of the year list as well as how the months got their names how many days are in each month the history of the calendars and how you can easily know which months have 31 days aka the knuckle method the romans were then believed to have adopted a 10 month calendar with 304 days leaving the remaining 50 or so days as an unorganized winter this calendar allowed the summer and winter months to become completely misplaced leading to the adoption of more accurate calendars july august september summer october november december autumn fall some months have special significance or events associated with them january start of new year february valentine s day shortest month march spring begins in northern hemisphere april easter often occurs in this month may mother s day the october month number is 10 october is the tenth month of the year october comes after september and before november the number of days in october is 31 what is the november month number the november month number is 11 august is the eighth month of the year november comes after october and before december the number of days in month short form days season 1 january jan 31 winter 2 february feb 28 29 3 march mar 31 spring 4 april apr 30 5 may may 31 6 june jun 30 summer 7 july jul 31 8 august aug 31 9 september sep 30 autumn 10 october oct 31 11 november nov 30 12 december dec 31 winter october is the tenth month in the gregorian calendar and has 31 days it is a month of preparation for the winter in the northern hemisphere why is october not the eighth month the meaning of october comes from the latin word octo meaning eight the old roman calendar started in march so october was the eighth month january february march april may june july august september october november and december out of the 12 months in a calendar the year starts with the month of january and ends with the month of december number of days in a month the ancient romans started with a calendar of 10 months though we think of september october november and december as months 9 10 11 and 12 these months were 7 8 9 and 10 on the ancient roman calendar this is how they got their names september september s name comes from septem latin for seven october october s name comes from octo latin for eight the names of the 12 months in order are january february march april may june july august september october november and december what month is it today s month is may what are the 12 months in order the 12 months in
