whether you're navigating minor concerns or major health challenges the check engine light will empower you to take control of your health through practical advice and expert guidance the check engine light is the culmination of Rob Wilson's years of working with warriors athletes executives and laypeople who just want to stay healthy and live long this is the common thread among everyone who purchases any diet book fitness book or general health book however despite the plethora of information at our fingertips we find ourselves struggling to interpret that information and end up adopting an approach that does not fit our unique needs or we outsource our health to those with little or no stake in our outcomes we end up sicker feeling worse or giving up completely Rob Wilson has dedicated his career to helping clients who are already banged up broken and torn down many of them having no known cause for the problems they are experiencing through his work Rob discovered that we have small warning lights flickering long before a major malfunction manifests and if we can identify and act on those signals early on we can avoid total engine failure unfortunately unlike a car the human body does not come with an owner's manual so when the check engine light pops on you cannot just turn a page to see what it means until now the check engine light will guide you through how to identify early warning signs to help you develop your own service plan this book is not a quick fix system or dogmatic approach that perpetuates false narratives and junk science but instead invites the reader to participate in an investigation of their own health you will be armed with expert tools and Wilson's philosophies as you develop a deeper understanding of your individual needs with the goal of thinking independently and ultimately charting your own course for optimal well-being the check engine light is complete with a self-guided workbook and case studies from elite warfighters that will inspire you to hop back in the driver's seat of your own health with the confidence clarity and perspective to go the distance
