it is a grandiose claim to have banished god with such a lot at stake we surely need to ask hawking to produce evidence to establish his claim do his arguments really stand up to close scrutiny i think we have a right to know the grand design and brief answers to big questions by eminent scientist the late stephen hawking were blockbusting contributions to the science religion debate they claimed it was the laws of physics themselves which brought the universe into being rather than any god in this forthright response john lennox oxford university mathematician and internationally known apologist takes a closer look at hawking's logic and questions his conclusions in lively layman's terms lennox guides us through the key points in hawking's arguments with clear explanations of the latest scientific and philosophical methods and theories and demonstrates that far from disproving a creator god they make his existence seem all the more probable

originally published in 1992 to great acclaim this updated edition traces the course of hawking s life and science successfully marrying biography and physics to tell the story of a remarkable man stephen hawking is no ordinary scientist with a career that began over thirty years ago at cambridge university he has managed to do more than perhaps any other scientist to broaden our basic understanding of the universe his theoretical work on black holes and his progress in advancing our knowledge of the origin and nature of the cosmos have been groundbreaking if not downright revolutionary stephen hawking has also spent much of his adult life confined to a wheelchair a victim of als a degenerative motor neuron disease clearly his physical limitations have done nothing to confine him intellectually he simply never allowed

his illness to hinder his scientific development in fact many would argue that his liberation from the routine chores of life has allowed him to focus his efforts more keenly on his science hawking certainly would have been remarkable for his cutting edge work in theoretical physics alone however he has also managed to popularize science in a way unparalleled by other scientists of his stature he became a household name achieving almost cult like fame with the release of his best selling book a brief history of time although steeped in the potentially overwhelming complexities of cosmology he succeeded in selling millions of copies to audiences eager to learn even some of what he has to offer science writers white and gibbin have skillfully painted a portrait of an indefatigable genius and a scientific mind that seemingly knows no bounds knitting together clear explanations of hawking s science with a detailed personal history that is both balanced as well as sensitive we come to know and appreciate both as stephen hawking s new book the universe in a nutshell hits the best seller lists it is the ideal time for readers to learn more about this remarkable man and his vast body of accomplishments
