**Reauthorization of the Older Americans Act
1987**

should benefits for older people be based on age or need do programmes that
serve only older people people deflect resources that should go to other people
some of the contributors to this volume argue that social service programmes
should be based on need rather than defined groups of people apart from
anything else age based programmes confirm negative stereotypes of older
people and lump them into an undifferentiated group but would the reform of
social services along these lines jeopardize the recent progress made in the
condition of older people new thoughts and new information are provided in
support of both arguments here is a ringside seat at a critical juncture in the
social reconstruction of old age

winner of an ajn book of the year award named an outstanding academic title for
2007 by choice well organized extensively referenced and illustrated with
figures tables this work represents a unique multipurpose interdisciplinary
approach to elder care highly recommended choice based on the concept that
vulnerability in the older populace encompasses those who are at increased risk
for physical and psychosocial health problems this book takes a closer look at
vulnerability and how it affects five specific populations within the elderly those
incarcerated in prisons the homeless gay lesbian bisexual and transgender
people those who are hiv positive or living with aids the frail both physical and
psychosocial health care issues and needs are addressed as well as interventions
and resources that can be implemented to care for these very specific
populations and their requirements for successful physical and mental health
care the unique challenges of hospice care in prisons the lack of services that
