the liber salomonis referred to in its own composition as the sepher raziel claims to be a book given directly to king solomon by a mysterious prince and sorcerer from the east actually written in the renaissance or perhaps as early as the medieval period it synthesizes kabbalistic and hermetic lore together and is divided into seven treatises the subject matter ranges from the high occult of invocation and the names of angels and of the judeochristian god to herbal medicine and the creation of incense for the calling of spirits to the categorization of twenty four beasts and stones to coincide with the hours of the day with the entire core of the work ruled over by seven angels and seven celestial bodies the philosophy behind its somewhat apocryphal historical content is nonetheless of extreme interest and is here presented in modernized english for the modern audience 82 pages

in 1885 a large hypogeum was discovered at the saint Étienne compound the domain acquired only two and a half years before by the dominicans on the western slope of el heidhemiyeh hill about 250 m north of the jerusalem ottoman wall after the unearthing of a second large hypogeum only fifty metres north of hypogeum 1 in their monumental work on the history of jerusalem the two eminent dominican scholars louis hugues vincent and felix marie abel proposed to date the two burial complexes to the hellenistic or roman period this dating remained unchallenged until the survey of 1974 75 carried out by the distinguished israeli archaeologists gabriel barkay and amos kloner who proposed to date the two burial caves towards the end of the judahite kingdom on the basis of an unsystematic comparison of few architectural features with those of other tombs in the frame of the improved knowledge of the broad and adjacent archaeological contexts since the last study of the saint Étienne compound hypogea between 2011 and 2014 riccardo lufrani carried out a detailed survey of the two burial caves providing new and more detailed photographic topographic archaeological and geological documentation the systematic comparison of the significant architectural features of the saint Étienne compound hypogea with a consistent sample of 22 tombs in the region suggest dating the hewing of the two hypogea to the early hellenistic period shedding a new light on the history of jerusalem
