## **Challenges for Russian Economic Reform 2010-12-01**

the transition to a market economy proves to be far more difficult in russia than in the former centrally planned economies of eastern europe the russian economy continues to face serious problems including substantial inflationary pressures falling output and capital flight the most positive aspect of the transition has been the relatively fast pace of privatization challenges for russian economic reform contains papers published by the post soviet business forum at the royal institute of international affairs that have been revised for this volume the contributors specialists in russian economic affairs examine the principal economic and institutional factors that have hindered transformation in russia the sheer size of the country has complicated the problem of exposing domestic producers to foreign competition and has weakened the ability of central authorities to control the regions economic stabilization has been hampered by the difficulties in establishing sound economic relations with the former soviet republics david dyker and michael barrow analyze the problems of monopoly and competition policy in russia philip hanson assesses the obstacles to economic stabilization posed by regional economic interests and examines regional diversity in reform

implementation michael kaser examines the problems of privatization by regions and sectors in russia and the cis and the institutional obstacles encountered by foreign investors alan smith explores the problems created by the breakup of traditional trade and payment relations with the non russian republics of the former soviet union and bilateral trade links with eastern europe he also provides an overall assessment of russian economic performance since the collapse of communism

this book develops the logic underlying the connections between breaking the rules and making the rules approaching policy issues from this point of view provides a perspective that illuminates a wide variety of phenomena

## **Institutional Change in Transition Economies 2019-01-15**

this title was first published in 2002 the importance of institutions for transition economies has so far been overlooked michael cuddy and ruvin gekker bring together leading experts in the field to fill this crucial void in the literature the contributors concentrate on an ongoing tension between informal constraints and mechanisms and the new formal rules and mechanisms that have gradually evolved through the transition period experiences are primarily drawn from russia the book consists of three parts the first comprising an analysis synthesis and

generalizations of the institutional adaptations as a market economy slowly emerges from a fog of shifting rules and varying interpretations this is followed by the study of business and taxation authorities behavior as they try to minimize or maximize the taxation take the volume also analyzes the challenges facing central and regional governments in delivering equitable levels of public services across regions of vastly different development levels while at the same time trying to stimulate regional economic growth

## **Newly Independent States of the Former Soviet Union 1998**

this ground breaking new volume focuses on the interaction between political social and economic change in central and eastern europe and the new independent states it includes a wide selection of analytic papers thought provoking essays by leading scholars in diverse fields and an agenda for future research it integrates work on the micro and macro levels of the economy and provides a broad overview of the transition process this volume broadens the current intellectual and policy debate concerning the historic transition now taking place from a narrow concern with purely economic factors to the dynamics of political and social change it questions the assumption that the post communist economies are all following the same path and that they will inevitably develop into replicas of economies in the advanced industrial west it challenges accepted thinking and promotes the utilization of new methods and perspectives

# **Transforming Post-Communist Political Economies 1998-03-02**

this book addresses two different but related topics that can arise during the development of equity capital markets and which could possibly hinder their development partial privatisation and shareholder rights both issues are developed in the context of transition economies in general and russia in particular chapter 2 puts forward a theory of partial privatisation i e a model that aims to explain why the state keeps some residual shares several recent surveys for russia have shown that the state does often not actively use the voting rights of its residual shares if this was true partial privatisation could entrench management and hinder restructuring it would also limit the supply of shares which could lead to low liquidity this would be likely to slow down the development of the equity capital market however the model in chapter 2 shows that it can be rational to hold back shares from sale in order to maximise privatisation receipts another issue which holds back the development of this market is the fact that shareholder rights can not be guaranteed by the state due to weak institutions chapter 3 contains an empirical examination of which firms honour shareholder rights and also provides a direct link between this problem and partial privatisation maybe surprisingly some weak evidence is presented that shows that the residual state holding does not exert a negative influence with respect to the introduction of shareholder rights but might even be a weak positive force

## ***Economic Transition in Central and Eastern Europe 2004-03-25***

an attentive reader embarking on this book might wonder what the economic transition to which the title refers might be in this century almost all countries have gone through periods of economic transition but which period of economic history can claim to embody the notion or to represent the era of the transition definitely no country or group of countries has experienced anything comparable to the economic upheavals that the fall of communism has brought about in a large portion of the world in just three years 1989 to 1991 no other transition to date has prompted more interest and more studies among economists academics and policy makers than has the transformation of centrally planned economies into market based systems it is this transformation that has come to define the transition early in the transformation process in november 1990 with the support of the centre for co operation with the economies in transition ccet i launched a conference to examine the challenges faced by these countries about six years have gone by and a new economic landscape has emerged in that part of the world the difficulties in transforming these economies have exceeded all expectations and economic performances have varied considerably across countries the time has come therefore to make a first evaluation of progress and problems

with a view to extracting useful policy lessons to guide policy makers in successfully completing the transition in the near future

since the fall of the berlin wall we have been told that no alternative to western capitalism is possible or desirable this book challenges this view with two arguments first the above premise ignores the enormous variety within capitalism itself second there are enormous forces of transformation within contemporary capitalisms associated with moves towards a more knowledge intensive economy these forces challenge the traditional bases of contract and employment and could lead to a quite different socio economic system without proposing a static blueprint this book explores this possible scenario

with the ending of the cold war and the rise of a nationalistic america first strategy the post war liberal international order based upon the hegemonic power of the usa is fading away in its place a multipolar world is emerging which while offering some the hope of a better future is also open to disorder and instability this book offers an insight into the relationship between politics and economics in this new era as an alternative this volume argues for a form of global governance that will offer a better balance between politics and economics based on a supranational approach a supranational approach in which world powers and un member states can work in agreement would follow the principle on which european political and economic integration was built the system put forward here is based on a keynesian world clearing union and a reform of the world trade organization and a united nations budget which would accelerate the convergence of rich and poor countries in the aim of a more sustainable global system this book demonstrates that globalisations and today s ecological challenges are both a cause of social discontent and an opportunity supranational institutions can greatly increase our ability to address global risks and this book shows how a supranational world order could reduce the uncertainty of the transition from the post war order to the future multipolar order the supranational principle enables us to view globalisation world capitalism and the ecological crisis not only as causes of inequality poverty and social instability but also as processes that can be governed wise politicians and political parties cannot let the future of humanity be decided by the precarious equilibrium of the

westphalia system in post war europe a group of nation states once fierce enemies embarked on a process of integration which led to the abolition of inter european national borders with supranational global governance the same could be achieved in the global system

## ***Post-communist Reform 1993***

this work builds on existing studies of the international covenant on economic social and cultural rights by reviewing the challenges to implementation posed by the evolving global macroeconomic environment the inter disciplinary focus adopted highlights the limits to a purely legal approach to this instrument at both a theoretical and practical level issues such as the justiciability debate and the difficulties which the committee on economic social and cultural rights have experienced in applying the icescr to states parties economic policy choices are reviewed from a macroeconomic perspective and it is argued that only once the economic de contextualisation of this instrument has been addressed will the guarantees in the icescr be fully actualised in this vein it is proposed that reform of the existing supervisory architecture to incorporate economic expertise would be a more positive step forward for the icescr than the adoption of the proposed optional protocol this work is aimed at those working within the sphere of socio economic rights as well as human rights specialists interested in the implications of global economic integration for the international human rights system as well as the possibility of new paradigms in international human rights methodology

## **Contextualising the International Covenant on Economic, Social and Cultural Rights 2018-12-19**

critics of globalization claim that economic  
integration drains political authority from states  
devolving authority to newly empowered regions  
delegating it to supranational organizations and  
transferring it to multinational firms and  
nongovernmental organizations globalization is  
also attacked for forcing convergence of state  
institutions and policies and threatening the  
ability of societies to chart their own  
democratically determined courses in governance in  
a global economy miles kahler and david lake  
assemble the contributions of seventeen leading  
scholars who have systematically investigated how  
global economic integration produces changes of  
governance these authors conclude that  
globalization has created a new and intricate  
fabric of governance but one that fails to match  
the stark portrait of beleaguered states exploring  
changes in governance across several policy areas  
such as tourism trade finance and fiscal and  
monetary policy the authors demonstrate that  
globalization changes the policy preferences of  
some actors increases the bargaining power of  
others and opens new institutional options for yet  
others by reintroducing agency and choice into our  
understanding of globalization this book provides

important new insights into the complex and contingent effects of globalization on political authority and governance the introduction and the conclusion are by the editors the contributors are james a caporaso benjamin j cohen barry eichengreen zachary elkins geoffrey garrett peter gourevitch virginia haufler michael j hiscox robert o keohane lisa l martin walter mattli kathleen r mcnamara joseph s nye jr jonathan rodden ronald rogowski beth a simmons and peter van houten

this compelling volume re examines the topic of economic growth in europe after the second world war the contributors approach the subject armed not only with new theoretical ideas but also with the experience of the 1980s on which to draw the analysis is based on both applied economics and on economic history thus while the volume is greatly informed by insights from growth theory emphasis is given to the presentation of chronological and institutional detail the case study approach and the adoption of a longer run perspective than is normal for economists allow new insights to be obtained as well as including chapters that consider the experience of individual european countries the book explores general european institutional arrangements and historical circumstances the result is a genuinely comparative picture of post war growth with insights that do not emerge from standard cross section regressions based on the post 1960 period
