the fischer tropesch process is gaining recognition again due to the world wide increase in energy needs and decrease in oil availability the increasing interest in utilizing biomass as a potential renewable feedstock in energy generation is further supporting this development the book covers the production and refining of fischer tropesch syncrude to fuels and chemicals systematically and comprehensively presenting a wealth of new knowledge and material as such it deals extensively with aspects of engineering chemistry and catalysis this handbook and ready reference adopts a fundamental approach looking at the molecules and their transformation from feed to product numerous examples illustrate the possibilities and limitations of fischer tropesch syncrude as feedstock of great interest to everyone interested in refining not just fischer tropesch specialists from the contents fischer tropesch facilities and refineries at a glance production of fischer tropesch syncrude industrial fischer tropesch facilities synthetic transportation fuels refining technology refinery design

~~the 21st century truck partnership 21ctp a cooperative~~
research and development partnership formed by four federal agencies with 15 industrial partners was launched in the year 2000 with high hopes that it would dramatically advance the technologies used in trucks and buses yielding a cleaner safer more efficient generation of vehicles review of the 21st century truck partnership critically examines and comments on the overall adequacy and balance of the 21ctp the book reviews how well the program has accomplished its goals evaluates progress in the program and makes recommendations to improve the likelihood of the partnership meeting its goals key recommendations of the book include that the 21ctp should be continued but the future program should be revised and better balanced a clearer goal setting strategy should be developed and the goals should be clearly stated in measurable engineering terms and reviewed periodically so as to be based on the available funds

petroleum asphalt is a sticky black and highly viscous liquid or semi solid that is present in most petroleum crude oils and in some natural deposits petroleum crude oil is a complex mixture of a great many different hydrocarbons refined petroleum products are derived from crude oils through processes such as catalytic cracking and fractional distillation refining is a necessary step before oil can be burned as fuel or used to create end products residual fuel oil is a complex mixture of hydrocarbons prepared by blending a residuum component with a flux stock which is a distillate component diluent to give the desired viscosity of the fuel oil produced petroleum refining is the process of separating the many compounds present in crude petroleum an oil refinery or petroleum refinery is an industrial process plant where crude oil is processed and refined into more useful products the global petroleum asphalt market is valued at usd 48 8 billion in 2017 and is expected to reach usd 77 67 billion by the end of 2024
