how do we recognize that the number 93371663 is actually 2 ioglq e 7r 2 gauss observed that the number 1 85407467 is essentially a rational value of an elliptic integral an observation that was critical in the development of nineteenth century analysis how do we decide that such a number is actually a special value of a familiar function without the tools gauss had at his disposal which were presumably phenomenal insight and a prodigious memory part of the answer we hope lies in this volume this book is structured like a reverse telephone book or more accurately like a reverse handbook of special function values it is a list of just over 100 000 eight digit real numbers in the interval 0 1 that arise as the first eight digits of special values of familiar functions it is designed for people like ourselves who encounter various numbers computationally and want to know if these numbers have some simple form this is not a particularly well defined endeavor every eight digit number is rational and this is not interesting however the chances of an eight digit number agreeing with a small rational say with numerator and denominator less than twenty five is

small thus the list is comprised primarily of special function evaluations at various algebraic and simple transcendental values the exact numbers included are described below each entry consists of the first eight digits after the decimal point of the number in question

el objetivo del informe mundial sobre las drogas es ayudar a los estados miembros a comprender mejor las tendencias mundiales de las drogas ilícitas y a los gobiernos a reconocer la necesidad de recopilar y comunicar la información sobre drogas más sistemáticamente la unodc depende de que los estados miembros le aporten datos principalmente mediante el cuestionario para los informes anuales este año se distribuyeron 200 cuestionarios y la unodc recibió 118 respuestas sobre el uso indebido de drogas y 116

resuestas sobre la oferta ilícita de drogas en general la posibilidad que tienen los estados miembros de suministrar información sobre la oferta ilícita de drogas es mucho mayor que su posibilidad de aportar datos relacionados con la demanda pese a un meritorio avance por ejemplo en materia de estimaciones de prevalencia queda mucho por hacer antes de poder contar con una base sólida y confiable para un análisis de las tendencias y las políticas

foreword take 2016 is a dream that came true in about six months a group of friends and colleagues put together in an upcoming and very dynamic university a

conference with 9 streams 3 keynotes and 3 special sessions 60 papers presented 6 posters and around 80 participants from 20 countries this is awesome i would like to deeply thank aveiro university the govcopp research centre the conference committee the keynote speakers the special session convenors the stream leaders the reviewers the authors and the administrative people for all their work and support i want to have two special words one for blazenka knezevic without whom the website would not have been possible the other for gaby neumann for work in these proceedings scientifically take seems to be as important and new and far reaching we don t have shortage of models regarding the knowledge economy but we decisively lack to explore the relation between theory and practice take is a step in exploring that difference we know that exact sciences find the best answers and social sciences give the best questions j c spender and we also know that knowledge management is more preached by scholars than done by practitioners aino kianto we assume the first idea and try to overcome the second hopefully take 2016 will be a great success thank you for everything
