## **The Dare - 30 Days To Change Everything**

2014-01-10

jim taylor explores how to harness the four forces that can control our life inertia and propel our lives in the direction of our own choosing values self esteem ownership and emotions many people think of inertia as an object at rest will stay at rest unless a force is exerted on it like a boulder in a field and people can think of their lives in the same way static and unmoving but we aren t stuck in one place as so many express when they are dissatisfied with their lives rather our lives are moving swiftly and inexorably along a path driven by powerful forces both past and present that is highly resistant to a change in direction as a result small forces such as a modest insight or a brief aha moment aren t enough to catalyze significant change in how we think what we feel or how we act on or react to our world in fact meaningful change can only occur when forces are applied that are greater than the forces that are already propelling our lives seeing our lives from this

dynamic perspective is the foundation for understanding what it takes to bring meaningful and long lasting positive change to our lives jim taylor explores the four forces values self esteem ownership and emotions that propel our life inertia which shows itself through the lens with which we view the world the emotional reactions we have the actions that we take and the relationships that we create he then explains how to harness those to our own benefit so that we may steer our lives in the direction of our own choosing rather than allowing our past inertia or outside forces to dictate the direction our lives take by letting our values guide us building our self esteem taking ownership of our decisions and actions and using our emotions as positive fuel we can break free from our past inertia take control of our lives and chart a future of meaning happiness success and connection with confidence commitment and courage

change is everywhere in life god seems to have designed it that way whether beautiful or painful life altering or small our pages are written with a story of change if change is everywhere we are encountering new realities all the time from our first conversation with a person to our first kiss to a new job to our first experience with loss when encountering change we can be hesitant to embrace it even outright resist it it could be scary or hard or too much or not as much as we desired or possibly a combination of these because change is constant it can seem as if we are walking through the same scenarios again and again we have felt these feelings before or had these conversations before these painful moments seem to never fade even as we journey through the same situation for a second or third or tenth time it calls for something new for our story of change to continue in god you can read a review of change for the first time again by the englewood review of books by clicking here

too often buddhism has been subjected to the procrustean box of western thought whereby it is stretched to fit fixed categories or had essential aspects lopped off to accommodate vastly different cultural norms and aims after several generations of scholarly discussion in english speaking communities it is time to move to the next hermeneutical stage buddhist philosophy must be liberated from the confines of a quasi religious stereotype and judged on its own merits hence this work will approach chinese buddhism as a philosophical tradition in its own right not as an historical after thought nor as an occasion for comparative discussions that assume the west alone sets the standards for or is the origin of philosophy and its methodologies viewed within their own context chinese buddhist philosophers have much to contribute to a wide range of philosophical concerns including metaphysics epistemology ethics philosophy of language philosophy of mind and philosophy of religion even though western divisions of philosophy may not exhaust the rich contents of chinese buddhist philosophy

celebration that s the goal to find ourselves respecting rejoicing and praising our bodies in all their glory no matter what size shape age or ability we are blessed to be this requires lightness and depth inside and outside joy a longing to know and accept ourselves just as we are and a belief that all we have to do is remember that we are worthy of love and capable of giving it unconditionally to ourselves this book is offered as a guide to that journey this process is not about figuring out why

we look the way we do there are no strategies here for dieting or for how to manage our emotions so we don't eat or insinuations that being fat is about not loving ourselves emotional issues can sometimes lead to excess fat meaning above your natural weight and many of us use food as a drug but being shamed and feeling guilty only compounds those issues in most cases being fat is just another way to be this process is about changing the way we see not the way we look once our self view changes the issues regarding our emotional relationship with food will naturally adjust to their healthiest place because self care will no longer require will power self care only requires self love scientists say that if 11 per cent of a society's members change their mind there will be a cultural shift eleven per cent is very attainable but it must begin inside each one of us something i will be repeating throughout the book your mind must change your energy in the world must shift your inner light must shine then and only then can you hope to have any influence on the larger reality but first things first this is a book about choices and the tools to help you make the ones best suited to you there is no reason that you can't love yourself no matter what you look like and make choices only as they suit your own higher purpose it is from this center of self loving energy that you will manifest your true self in the universe finally it is important to understand that this book is not about big bodies being better than small bodies it is about small bodies not being better than big bodies it is about no bodies being better than any other bodies and though the emphasis may seem to be on size please be assured that no matter what issues you have about your appearance whether it be weight age facial hair baldness or bowed legs this book can help you see through different eyes and find your true inner vision change how you see not how you look provides power tools at the end of every chapter little hints affirmations rituals ways of helping you deal with the culture the media belief systems relationships spirituality the body mind spirit split and healing there are tools to deconstruct what you believe about women in general and about yourself in particular and tools to help you rebuild remember and restore the integrity and inherent beauty of your body and your spirit so you can begin joyfully celebrating every part of your being
