Responsible Me! Teacher Activity Guide *2019-09-24*

children in today's world are inundated with information about who to be, what to do, and how to live, but what if there was a way to teach children how to manage priorities, focus on goals, and be a positive influence on the world around them? The Leader in Me is that programme. It is based on a hugely successful initiative carried out at the A. B. Combs elementary school in North Carolina. To hear the parents of A. B. Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught the 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children who blossomed under the programme. By the end of the following year, the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 habits that have already changed the lives of millions of people and shows how children can use them as they develop. Those habits: be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw, are critical skills to learn at a young age and bring incredible results, proving that it is never too early to teach someone how to live well.

Being the Best Me Activity Guide for Girls *2008-11-07*

This 52-week activity guide and keepsake memory journal will take the guesswork out of finding activities for you and your princess to do together. You will discover crafts, recipes, and activity ideas geared toward 3-8 year old girls to keep her busy and give you reasons to spend more time together. As you interact with and devote time to your princess, you will build a relationship that you will both cherish forever. These moments won't last forever, but the memories you make along the way will last a lifetime. See also my buddy and me activity guide and memory journal for boys.

Jamboree Activity Guide B *2005-08-16*

Since the first edition of *e-Learning by Design*, e-learning has evolved rapidly and fringe techniques have moved into the mainstream. Underlying and underwriting these changes in e-learning are advances in technology and changes in society. The second edition of the bestselling book *e-Learning by Design* offers a comprehensive look at the concepts and processes of developing, creating, and implementing a successful e-learning program. This practical, down-to-earth resource is filled with clear information and instruction without oversimplification. The book helps instructors build customized e-learning programs from scratch, building on core principles of instructional design to develop meaningful activities and lessons, create and administer online tests and assessments, design learning games and simulations, and implement an individualized program. Every newcomer to the field will find this edition indispensable, while professionals will find much-needed contemporary information to manage the rapid changes happening in our field. Even if you own the first edition, buy this update as soon as possible. Michael W. Allen, CEO of Allen Interactions Inc., author of *e-Learning Library Series*, covers the full range of options for presenting learning materials online, including designing useful topics, engaging activities, and reliable tests, and it takes into account the realities and issues of today's instructional designers, such as social learning and mobile learning. Saul Carliner, Associate Professor, Concordia University, author of *The e-Learning Handbook*, nails it perfectly: timely, robust, and practical. This second edition brings together the latest strategies for learning without losing its critical premise: technology enables e-learning, but great design makes it work. Marc J. Rosenberg, e-learning strategist, author of *Beyond e-Learning: An e-Learning Encyclopedia*, loaded with detailed guidelines and examples ranging from basic instructional design techniques to the latest applications in games, social media, and mobile learning, is an essential reference for anyone involved in e-learning design, development, or evaluation. Ruth Colvin Clark, author of *e-Learning and the Science of Instruction*.
