Multidimensional Journal Evaluation

2023-10-31

scientific communication depends primarily on publishing in journals the most important indicator to determine the influence of a journal is the impact factor since this factor only measures the average number of citations per article in a certain time window it can be argued that it does not reflect the actual value of a periodical this book defines five dimensions which build a framework for a multidimensional method of journal evaluation the author is winner of the eugene garfield doctoral dissertation scholarship 2011

booting servers from a storage area network san is being used increasingly in complex data center environments today due to its significant benefits over the traditional method of booting from local disks san boot enables organizations to maximize consolidation of their it resources minimize their equipment costs and realize the considerable management benefits of centralizing the boot process in san boot you can deploy diskless servers in an environment where the boot disk is located on often raid capable storage connected to the san the server initiator communicates with the storage device target through the san using the fibre channel host bus adapter hba the system downtime is greatly minimized in case a critical component such as a processor memory or host bus adapter fails and needs to be replaced the system administrator needs to swap only the hardware and reconfigure the hba s bios switch zoning and host port definitions on the storage server the system image still exists on the logical drive therefore the server is fully operational after the hardware swap and configuration change is completed this ibm redbooks publication can help you with the san boot implementation we present various san boot scenarios using ibm system storage products that include ds5000 ds8000 xiv and svc the operating systems that are covered include windows 2008 red hat linux suse linux and vmware
