Journalism Next: A Practical Guide to Digital Reporting and Publishing, 2nd Edition 2013 texts in multiple versions constitute the core problem of textual scholarship for texts from antiquity and the medieval period the many versions may be the result of manuscript transmission requiring editors and readers to discriminate between levels of authority in variant readings produced along the chain of copying for texts of all periods and particularly for more modern authors there may also be multiple authorial versions these are of particular importance for genetic criticism as they offer a window on the author's thinking through the developing work the different contexts in which multiple versions may occur different languages different genres different cultures ranging in this collection from ancient greek texts to novels by cervantes and aub dramatic texts from portugal and germany poetry from the netherlands and lithuania scientific texts from the 19th century provide further layers of complexity the histories of countries are reflected in the histories of editing in europe this can be seen particularly in the great period of nation building of the 19th century essays in this volume survey editorial activity in the netherlands belgium and germany in the nineteenth century concluding that nation building and scholarly editing are twinned as a nation searches for its own identity textual scholarship is pressed into service to find and edit the texts on which to establish that identity the two strands of this volume multiple versions of texts editions and national histories testify to the centrality of textual editing to many fields of research there is material here for literary scholars historians and for readers interested in texts from ancient greece to modernist classics

Texts in Multiple Versions – Histories of Editions 2006-01-01 acidification is one of the most serious environmental problems especially in sweden which suffers most from the consequences of acid rain besides international negotiations to reduce sulphur emissions 85 of the acid load on sweden can be traced to emissions from outside the country itself the swedish government has employed large scale operative liming activities to counteract acidification of surface waters the scientific results show that although acidification cannot be solved by liming alone the measures taken resulted in substantial improvements to around 8 000 swedish lakes and watercourses the idea is that other countries affected by acidification may also profit from this experience

Liming of Acidified Surface Waters 2012-12-06 the fourth edition of this text constitutes a continuation of 20 years of coverage of traumatic brain injury and broadens the discussion of acquired brain injury within tbi the paradigm shift from an injury occurring at a point in time to a disease entity of a chronic nature is changing the discussion of diagnosis management treatment and outcome assessment disease specification that differentiates tbi by the mechanism of injury the exact nature of the injury the extent of injury presence of co morbidities and their exact nature gender age race and genome are emerging as crucial disease differentiation has impacted diagnosis treatment and outcome

Healing with Whole Foods, Third Edition 2003-02-28 this book presents the first comprehensive analysis of confucius institutes cis situating them as a tool of public diplomacy in the broader context of china's foreign affairs the study establishes the concept of public diplomacy as the theoretical framework for analysing cis by applying this frame to in depth case studies of cis in europe and oceania it provides in depth knowledge of the structure and organisation of cis their activities and audiences as well as problems challenges and potentials in addition to examining cis as the most prominent and most controversial tool of china's charm offensive this book also explains what the structural configuration of these institutes can tell us about china's understanding of and approaches towards public diplomacy the study demonstrates that in contrast to their international counterparts cis are normally organised as joint ventures between international and chinese partners in the field of education or cultural exchange from this unique setting a more fundamental observation can be made namely china's willingness to engage and cooperate with foreigners in the context of public diplomacy overall the author argues that by utilizing the current global fascination with chinese language and culture the chinese government has found interested and willing international partners to co finance the cis and thus partially fund china's international charm offensive this book will be of much interest to

students of public diplomacy chinese politics foreign policy and international relations in general

Journalism Next 2015-07-01 in rhumb lines and map wars mark monmonier offers an insightful richly illustrated account of the controversies surrounding flemish cartographer gerard mercator s legacy he takes us back to 1569 when mercator announced a clever method of portraying the earth on a flat surface creating the first projection to take into account the earth s roundness as monmonier shows mariners benefited most from mercator s projection which allowed for easy navigation of the high seas with rhumb lines clear cut routes with a constant compass bearing for true direction but the projection s popularity among nineteenth century sailors led to its overuse often in inappropriate non navigational ways for wall maps world atlases and geopolitical propaganda because it distorts the proportionate size of countries the mercator map was criticized for inflating europe and north america in a promotion of colonialism in 1974 german historian arno peters proffered his own map on which countries were ostensibly drawn in true proportion to one another in the ensuing map wars of the 1970s and 1980s these dueling projections vied for public support with varying degrees of success widely acclaimed for his accessible intelligent books on maps and mapping monmonier here examines the uses and limitations of one of cartography s most significant innovations with informed skepticism he offers insightful interpretations of why well intentioned clerics and development advocates rallied around the peters projection which flagrantly distorted the shape of third world nations why journalists covering the controversy ignored alternative world maps and other key issues and how a few postmodern writers defended the peters worldview with a self serving overstatement of the power of maps rhumb lines and map wars is vintage monmonier historically rich beautifully written and fully engaged with the issues of our time
