this book identifies traces and interrogates contemporary american culture s fascination with forensic science it looks to the many different sites genres and media where the forensic has become a cultural commonplace it turns firstly to the most visible spaces where forensic

science has captured the collective imagination crime films and television programs in contemporary screen culture crime is increasingly framed as an area of scientific inquiry and even more frequently as an area of concern for female experts one of the central concerns of this book is the gendered nature of expert scientific knowledge as embodied by the ubiquitous character of the female investigator steenberg argues that our fascination with the forensic depends on our equal fascination with and suspicion of women s bodies with the bodies of the women investigating and with the bodies of the mostly female victims under investigation

television shows like *csi* forensic files and the new detectives make it look so easy a crime scene photographer snaps photographs a fingerprint technician examines a gun uniformed officers seal off a house while detectives gather hair and blood samples placing them carefully into separate evidence containers in a crime laboratory a suspect's hands are meticulously examined for gunshot residue an autopsy is performed in order to determine range and angle of the gunshot and time of death evidence dozens of tests and analyses are performed and cross referenced a conviction is made another crime is solved the credits roll the american public has become captivated by success stories like this one with their satisfyingly definitive conclusions all made possible because of the wonders of forensic science unfortunately however popular television dramas do not represent the way most homicide cases in the united states are actually handled crime scenes are not always protected from contamination physical evidence is often packaged improperly lost or left unaccounted for forensic experts are not always consulted and mistakes and omissions on the autopsy table frequently cut investigations short or send detectives down the wrong investigative path in forensics under fire jim fisher makes a compelling case that these and other problems in the practice of forensic science allow offenders to escape justice and can also lead to the imprisonment of innocent people bringing together examples from a host of high profile criminal cases and familiar figures such as the jonbenet ramsey case and dr henry lee who presented physical evidence in the o j simpson trial along with many lesser known but fascinating stories fisher presents daunting evidence that forensic science has a long way to go before it lives up to its potential and the public's expectations

an expert in migration studies examines the cultural context of villages in central java and their influence on those who pursue migrant labor villagers in indonesia hear a steady stream of stories about the injuries abuses and even deaths suffered by those who migrate in search of work so why do hundreds of thousands of indonesian workers continue to migrate every year carol chan explores this question from the perspective of the origin community and provides a fascinating look at how gender faith and shame shape these decisions to migrate chan reveals how villagers evaluate men s and women s migrations differently this disparity leads to

different ideas about which kinds of human or financial flows should be encouraged and which should be discouraged or even criminalized despite routine and well documented instances of exploitation of Indonesian migrant workers some villagers still emphasize that a migrant's success or failure ultimately depends on that individual's morality fate and destiny Indonesian villagers construct strategies for avoiding migration related risks that are closely linked to faith and belief in supernatural agency these strategies shape the flow of migration from the country and help to ensure the continued confidence Indonesian people have in migration as an act of promise and hope
