levels of interest the greatest football
tournament on earth will take place in africa for
the first time next year with the world cup
kicking off in johannesburg on june 11 a game
apart tries to explain just how miraculous that
simple fact is based largely on what i witnessed
myself as a student footballer and sports
journalist this is an honest but fictional account
of what it was like to play football in south
africa before democracy came rolling in with
nelson mandela in 1993 there was trouble on the
pitch trouble on the streets trouble on the
beaches apartheid and trouble went hand in hand a
lot of the publicity surrounding the upcoming
world cup has been negative with the focus on
crime and corruption my perception is very
different i believe the country has changed
massively for the better in 16 short years i ve
waited all that time to let my memories loose and
the world cup seems an appropriate time to write a
novel that i hope will help people to remember
exactly what the rainbow nation has been through
this novel will annoy some please others

is that the reader recognizes this is how a young englishman might have viewed the south africa i grew up in a strange but beautiful country riven by cruelty and mistrust and headed for a bloody revolution until the release of mandela in 1990 for those who visit the country for those who view it on a television screen for those who read about it in the newspapers i hope to offer some perspective apartheid should never be forgotten otherwise somebody will repeat the process and that must never be allowed to happen this book is a first in south africa no volume like this has ever been written it fills a gap in a field of conservative literature that has been waiting to be filled for over half a century a volume packed with facts scrupulously researched and backed up with almost 1 000 documentations it offers for the first time to all interested south africans an exhaustive history of the communist conspiracy and related events in their land from its origins in the mid 1850s through 1984 jacket flap

from generation to generation people experience their landscapes differently humans depend on their natural environment it shapes their behavior while it is often felt that deities responsible for both natural benefits and natural calamities such as droughts famines floods and landslides need to be appeased we presume that in many societies lakes rivers rocks mountains caves and groves were considered sacred individual sites and entire landscapes are often associated with divine actions mythical heroes and etiological myths throughout human history people have also felt the need to monumentalize their sacred landscape but this is where the similarities end as different societies had very different understandings believes and practices the aim of this new thematic appraisal is to scrutinize carefully our evidence and rethink our methodologies in a multi disciplinary approach more than 30 papers investigate diverse sacred landscapes from the iberian peninsula and britain in the west to china

in the east they discuss how to interpret the intricate web of ciphers and symbols in the landscape and how people might have experienced it we see the role of performance ritual orality textuality and memory in people s sacred landscapes a diachronic view allows us to study how landscapes were rewritten adapted and redefined in the course of time to suit new cultural political and religious understandings not to mention the impact of urbanism on people s understandings a key question is how was the landscape manipulated transformed and monumentalized especially the colossal investments in monumental architecture we see in certain socio historic contexts or the creation of an alternative humanmade seemingly non natural landscape with perfectly astronomically aligned buildings that define a cosmological order sacred landscapes therefore aims to analyze the complex links between landscape religiosity and society developing a dialectic framework that explores sacred landscapes across the ancient world in a dynamic holistic contextual and historical perspective

the monograph explores the linguistic impact of the colonial and postcolonial situations in south africa on language policy on literary production and especially on the stylistics of fiction by indigenous south africans writing in english a secondary concern is to investigate the present place of english in the multilingual spectrum of south african languages and to see how this worldly english relates to global english in the south african context the introduction presents a socio linguistic overview of south africa from pre historic times until the present including language planning policies during and after the colonial era and a cursory review of how the difficulties encountered in implementing the language plan provided for by the new south african constitution impinge on the development of black south african english six chapters track the course of english in south africa since the arrival of the british in 1795 considered from the point of view of the indigenous african population the study focuses on ways in which indigenous authors indigenize their writing innovating and subverting stylistic conventions including those of african orature in order to bend language and genre towards their own culture and objectives each chapter corresponds to a briefly outlined historical period that is largely reflected in linguistic and literary developments a small number of significant works for each period are discussed one of which is selected for a case study at the end of each chapter where it is subjected to detailed stylistic analysis and appraised for the degree of indigenization or

other linguistic or socio historic influences on style the methodology adopted is a linguistic approach to stylistics focusing on indigenization of english inspired by the work of chantal zabus in her book the african palimpsest indigenization of language in the west african europhone novel 2007 1991 the conclusion reappraises the original hypothesis that the specific characteristics of south african literary production including styles of writing can be related to the political social and economic context in the light of many fresh insights and discusses the place occupied by english in the cultural struggle of the formerly colonized peoples of south africa

the greatest football tournament on earth will take place in africa for the first time next year with the world cup kicking off in johannesburg on june 11 a game apart tries to explain just how miraculous that simple fact is based largely on what i witnessed myself as a student footballer and sports journalist this is an honest but

fictional account of what it was like to play football in south africa before democracy came rolling in with nelson mandela in 1993 there was trouble on the pitch trouble on the streets trouble on the beaches apartheid and trouble went hand in hand a lot of the publicity surrounding the upcoming world cup has been negative with the focus on crime and corruption my perception is very different i believe the country has changed massively for the better in 16 short years i ve waited all that time to let my memories loose and the world cup seems an appropriate time to write a novel that i hope will help people to remember exactly what the rainbow nation has been through this novel will annoy some please others all i ask is that the reader recognizes this is how a young englishman might have viewed the south africa i grew up in a strange but beautiful country riven by cruelty and mistrust and headed for a bloody revolution until the release of mandela in 1990 for those who visit the country for those who view it on a television screen for those who read about it in the newspapers i hope to offer some perspective apartheid should never be forgotten otherwise somebody will repeat the process and that must never be allowed to happen
