## **Success Secrets 2018-08-17**

Success differs from person to person for some people successful life means being doctor engineer teacher sports man etc but for some people successful life means having a small family with luxuries and all nowadays your career makes your life successful success is or at least should be primarily defined as an achievement of something desired so the most successful people are the ones who achieve the things they most desire what we desire the most even more than money is to be proud of what we do with our lives this is especially true when it comes to our work a truly successful person is one who is proud of the work he or she does that is the true meaning of success now a lot of money shouldn't be the primary definition of success however it is a reasonable goal to have we all want to have enough money to sustain ourselves and our family the thing is if we're truly passionate about the work we do there's probably a better chance that money will follow contrary to common beliefs there are no successful or unsuccessful people but instead there are people who have the potential to succeed and who do things that helps them realize this potential and there are people with the same potential who don't do those things so being successful just means that you make full use of your potential it means that you grow throughout the course of your life sad times may affect you but if you are strong enough to keep going and growing in that phase also then yes you are successful being successful doesn't mean being rich being famous it never means a happy life you know you are truly successful when you are satisfied with your own inner self you are proud of your own accomplishments the true meaning of success goes far beyond the common definitions of success such as having a lot of money being wealthy having a lot of tangibles and earned degrees quite the opposite true success in life cannot be measured with the above named factors but instead with the amount of people that are able to live a better and more advanced life because of what you created this is the true meaning of success not the trophies people are collecting in their lives media and society let us often conclude that living a successful life means to be extraordinarily wealthy and have a lot of tangibles but the meaning of success is to live a happy life and to make this world a better place for everyone
