Mobile Forensics - The File Format Handbook

2017-01-09

this open access book summarizes knowledge about several file systems and file formats commonly used in mobile devices in addition to the fundamental description of the formats there are hints about the forensic value of possible artefacts along with an outline of tools that can decode the relevant data the book is organized into two distinct parts first part i describes several different file systems that are commonly used in mobile devices apfs is the file system that is used in all modern apple devices including iphones ipads and even apple computers like the macbook series ext4 is very common in android devices and is the successor of the ext2 and ext3 file systems that were commonly used on linux based computers the flash friendly file system f2fs is a linux system designed explicitly for nand flash memory common in removable storage devices and mobile devices which samsung electronics developed in 2012 the qnx6 file system is present in smartphones delivered by blackberry e g devices that are using blackberry 10 and modern vehicle infotainment systems that use qnx as their operating system second part ii describes five different file formats that are commonly used on mobile devices sqlite is nearly omnipresent in mobile devices with an overwhelming majority of all mobile applications storing their data in such databases the second leading file format in the mobile world are property lists which are predominantly found on apple devices java serialization is a popular technique for storing object states in the java programming language mobile application app developers very often resort to this technique to make their application state persistent the realm database format has emerged over recent years as a possible successor to the now ageing sqlite format and has begun to appear as part of some modern applications on mobile devices protocol buffers provide a format for taking compiled data and serializing it by turning it into bytes represented in decimal values which is a technique commonly used in mobile devices the aim of this book is to act as a knowledge base and reference guide for digital forensic practitioners who need knowledge about a specific file system or file format it is also hoped to provide useful insight and knowledge for students or other aspiring professionals who want to work within the field of digital forensics the book is written with the assumption that the reader will have some existing knowledge and understanding about computers mobile devices file systems and file formats

Delivering Value with BIM

2024-02-28

building information modelling bim is a global phenomenon which is gaining significant momentum across the world currently there is little information on how to realise and monitor benefits from implementing bim across the life cycle of a built environment asset this book provides a practical and strategic framework to realise value from implementing bim by adapting benefit realisation management theory it presents an approach for practitioners aiming to implement bim across the life cycle of built environment assets including both buildings and infrastructure

additionally the book features wide ranging information about bim the challenges of monitoring progress towards benefit goals and the greater context of implementation a set of dictionaries that illustrate how benefits can be achieved what the benefit flows are and the enabling tools and processes that contribute to achieving and maximising them a suite of measures that can serve to monitor progress with examples of how they have been used to measure benefits from bim real world examples from across the world and life cycle phases that show how these benefits can be achieved and information on international maturity and competency measures to complement the value realisation framework including a blend of academic and industry input this book has been developed in close collaborative consultation with industry government and international research organisations and could be used for industry courses on bim benefits and implementation for asset management or by universities that teach bim related courses
