this is a study of how and why politics is amoral it deals especially with what the author terms machiavellism the disregard of moral scruples for political ends that leads to the justification and use of deception and force in all aspects of political life a comparative cultural study it examines the theory and practice of politics in ancient china ancient india renaissance italy and modern europe as well as tribal cultures in order to test how widespread such political amorality has been throughout history scharfstein concludes that political or ethical theories that do not view machiavellism as inseparable from political life are inadequate to human affairs and of doubtful relevance to politics in reaching this conclusion he explores such topics as

why people readily accept political violations of truthfulness and fairness whether decisive philosophical arguments have been advanced against machiavellism whether the use of deception in politics is in politicians own best interests and whether the prevalence of machiavellism rules out the likelihood of a better political future

by 1300 medieval men and women were beginning to measure multitude counting for example numbers of boys and girls being baptized their mental capacity to grapple with population to get its measure was developing and this book describes how medieval people thought about population through both the texts which contained their thought and the medieval realities which shaped it they found many topics such as the history of population and variations between polygamy monogamy and virginity through theology crusade and travel literature supplied the themes of muslim polygamy military numbers the colonization of the holy land and the populations of mongolia and china translations of aristotle provided not only new themes but also a new vocabulary with which to think about population in this innovative new study peter biller challenges the view that medieval thought was fundamentally abstract he investigates medieval thought s capacity to deal with concrete contemporary realities and sets academic discussions of population alongside the medieval facts of birth and copulation and death
