Camping Washington 2009-06-18 the average length of time before an rv campground is put up for sale is just seven years and as it turns out there s a good reason for that while campers are out to experience fresh air bucolic surroundings and the easy going camaraderie of fellow travelers the people who create that environment are often over worked under paid and stressed out and to make matters worse their efforts are too readily dismissed as just renting dirt this frank first hand narrative describes one couple s journey from wide eyed occasional campers to full time owners and operators of a medium sized campground and rv park in the shenandoah valley buying in early 2013 as the campground industry was just regaining its feet after the great recession the zipser family soon realized that managing the property was not their biggest challenge it was managing the people campers with diverse and often unrealistic expectations a franchise system led by a brain trust without much operational experience a transient workforce with employees stuck on the bottom rung of the economic ladder each of these challenges was addressed by the zippers over the next eight years most notably by exiting the koa system and using the savings to improve pay and working conditions at the same time however larger developments were reshaping the entire campground experience a trend toward more creature comforts including significant inroads by the digital world and less tolerance for nature s discomforts gathered strength corporate buyers became more active in consolidating the industry climate change and extreme weather became more pronounced battering campgrounds from coast to coast and causing many owners to question the long term viability of their operations and then the pandemic hit turning what had been shaping up as a record breaking 2020 into a roller coaster ride of government orders rvers clamoring for a place to stay and a severely curtailed workforce that never increased enough to adequately meet demand by late fall the zippers were wide eyed no longer and ready to call it quits and when a buyer unexpectedly showed up they did just that selling yet another family owned business to a corporate buyer

Where Should We Camp Next?: National Parks 2023-04-04 if you're looking to plan the grand trip of a lifetime this book is for you i have been traveling in my rv across north america full time since 2012 i was laid off from my corporate job as an accountant and i needed a solution for living cheaply i decided that it was more economical and fun to live fulltime on the road ever since i have been keeping notes and records about the sort of rv parks resorts and campgrounds where i have personally camped i also asked around in my circle of other rv enthusiasts to compile the listings in this book i decided to compound these notes into this comprehensive directory think of this book as a personally recommended and curated listing of rv parks resorts and campgrounds i am mainly focused on how your experience would be at these locations while traveling in an rv specifically i have not included many notes on primitive or tent camping as all of these locations offer amenities such as electric and water hookups many locations

in this directory do not offer tent camping sites i have not sold any spots in this book to any of these businesses none of them have paid to be a part of this listing i chose the businesses to be included in this book as those places where either i personally stayed and had a great time or one of my friends in the rv community personally recommended it to me you will notice that nearly every listing allows pets at their facility as i know that our furry companions are very special to us i wanted to make those listing a highlight for your vacation planning there are also no national or state parks listed here this is as complete a listing of private rv parks resorts and campgrounds as can be handpicked directly from those who are in the rv community this is a straightforward directory listing of places to stay with your rv in the lower 48 continental united states i have compiled the listings into their own tables outlining the necessary qualities of each campground including their physical address and phone numbers the information is as current and accurate as i could possibly ensure it to be each table listing outlines street address phone number website it will be clickable if you re reading the ebook version operating days price discounts offered maximum width and length of the sites the total number of spaces offered road conditions paved gravel dirt any restrictions for example if they have any conditions concerning pets a list of a few of the amenities the resort offers i have listed the campgrounds by state and most of the states i have split into regions so you can better decide where you might stay by where you want to be in that state as a bonus if you purchase the paperback version of this book you can download the ebook version for free the best thing about the ebook version is that the links to the websites of the resorts and campgrounds if they have one listed is hyperlinked and clickable this could save you time when you re trying to research your vacation check out robert nichols other books how to start and enjoy living the rv life on a tight budget a budget friendly rv lifestyle startup guide rv adventure to explore the wild wonderful alaska canada a budget friendly guide to visit alaska canada in a rv
