*Gemini PDA Official User Guide* 1993 this book examines a new trend affecting cartography and geographic information science presenting the work of over 30 authors from 16 different countries the book provides an overview of current research in the new area of internet cartography chapters deal with the growth of this form of map distribution uses in education privacy issues and technical aspects from the point of view of the map provider including internet protocols such as xml and svg many see the internet as a revolution for cartography previously tied to the medium of paper and expensive large format color print technology maps had a limited distribution and use the internet made it possible to not only distribute maps to a much larger audience but also to incorporate interaction and animation in the display maps have also become

timelier with some maps of traffic and weather being updated every few minutes in addition it is now possible to access maps from servers throughout the world finally the internet has made historic maps available for viewing to the public that were previously only available in map libraries with limited access

*Solid Modeling Aerospace Research Tool (SMART) User's Guide, Version 2.0* 1985 the role of information and communication technology ict in an increasingly interconnected and interdependent world transcends geographical boundaries economies and sectors over the past decade ict has helped create the most rapidly growing industry sectors driven efficiency in government and business operations and developed the essential building blocks to a knowledge based economy the ability of ict to change the way people do things is either hidden in internal processes such as how a government office manages data collection or manifest in the end product such as digital support for health care services in a remote province while the level and nature of the benefits of ict may differ for every stakeholder there is a consensus of what ict can help provide to governments businesses and citizens faster access to relevant information an efficient means for communication an enhanced ability to make informed decisions and a voice to otherwise unheard peoples as these cases from the asian development bank would show access to ict alone will not result in significant lasting change it is the adoption of appropriate technology paralleled with an enabling policy environment a responsive and needs based approach improved individual and institutional capacity nurtured partnerships with key stakeholders leadership by local champions effectively managed change and sustained support that make the difference
