expression of discourse given phrases vieri samek lodovici disentangles the properties genuinely associated with contrastive focalization from those determined by highly productive operations affecting discourse given phrases in italian namely right dislocation and marginalization based on a vast aggregate of evidence he shows that in the default case contrastive focalization occurs in situ and that left peripheral focalization patterns arise from the interaction with right dislocation and generalize well beyond the familiar cases examined in rizzi 1997 and most literature since in the final chapter the author examines how the key properties unveiled in the previous chapters such as focalization in situ follow from the prosodic constraints governing stress placement thus reinterpreting and extending zubizarreta s 1998 insight about the role of prosody in shaping syntax overall the book offers an evidence backed radical departure from current views of focalization that posit a high fixed focus projection at the left periphery of the clause it also provides the most comprehensive study of italian marginalization and right dislocation available to date

In this book Vasilis Politis argues that Plato's forms are essences not merely things that have an essence. Politis shows that understanding Plato's theory of forms as a theory of essence presents a serious challenge to contemporary philosophers who regard essentialism as little more than an optional item on the philosophical menu. This approach he suggests also constitutes a sharp critique of those who view Aristotelian essentialism as the only sensible position. Plato's essentialism, Politis demonstrates, is a well argued, rigorous and coherent theory and a viable competitor to that of Aristotle. This book will appeal to students and scholars with an interest in the intersection between philosophy and the history of philosophy.

this book argues that the indo europeanizing of europe essentially began shortly before 1600 bc when lands rich in natural resources were taken over by military forces from the eurasian steppe and from southern caucasia first were the copper and silver mines along with good harbors in greece and the copper and gold mines of the carpathian basin by ca 1500 bc other military men had taken over the amber coasts of scandinavia and the metalworking district of the southern alps these military takeovers offer the most likely explanations for the origins of the greek keltic germanic and italic subgroups of the indo european language family battlefield warfare and militarism robert drews contends were novelties ca 1600 bc and were a consequence of

the military employment of chariots current opinion is that militarism and battlefield warfare are as old as formal states going back before 3000 bc another current opinion is that the indo europeanizing of europe happened long before 1600 bc the kurgan theory of marija gimbutas and david anthony dates it from late in the fifth to early in the third millennium bc and explains it as the result of horse riding conquerors or raiders coming to europe from the steppe colin renfrew s archaeology and language dates the indo europeanizing of europe to the seventh and sixth millennia bc and explains it as a consequence of the spread of agriculture in a wave of advance from anatolia through europe pairing linguistic with archaeological evidence draws concludes that in greece and italy at least no indo european language could have arrived before the second millennium bc
