i use for constructing and arranging the different training elements by the end of this section you will be able to form a coherent and logical kettlebell sport program that you can use in your own training part ii contains an elaborate self analysis of my own results during my career and is aimed to provide the reader with a general impression of how i applied my methodology to my own lifting my hope is that my reflections can serve as a useful example of how you can analyze your own progress so that you can make better decisions that will improve your chances of success in kettlebell sport the intention of this book is to provide you with all the basic tools and foundational knowledge that will allow you to create a personalized and effective kettlebell sport program for yourself and for your students
