what lies at the center of the mexican colonial experience should mexican colonial society be construed as a theoretical monolith capitalist from its inception or was it essentially feudal as traditional historiography viewed it in this pathfinding study enrique semo offers a fresh vision that the conflicting social formations of capitalism feudalism and tributary despotism provided the basic dynamic of mexico s social and economic development responding to questions raised by contemporary mexican society semo sees the origin of both backwardness and development not in climate race or a heterogeneous set of unrelated traits but rather in the historical interaction of each social formation in his analysis mexico s history is conceived as a succession of socioeconomic formations each growing within the womb of its predecessor semo sees the task of economic history to analyze each of these formations and to construct models that will help us understand the laws of its evolution his premise is that economic history contributes to our understanding of the present not by formulating universal laws but by studying the laws of development and progression of concrete economic systems the history of capitalism in mexico opens with the conquest and concludes with the onset of the profound socioeconomic transformation of the last fifty years of the colony a period clearly representing the precapitalist phase of mexican development in the course of his discussion semo addresses the role of dependency an important theoretical innovation and introduces the concept of tributary despotism relating it to the problems of indian society and economy he also provides a novel examination of the changing role of the church throughout mexican colonial history the result is a comprehensive picture which offers a provocative alternative to the

two systems of governance capitalism and democracy prevail in the world today operating simultaneously in partially distinct domains these systems rely on indirect governance through regulated competition to coordinate actors inevitably these systems influence and transform each other this book rejects the simple equation of capitalism with markets in favor of a three level system a model which recognizes that markets are administered by regulators through institutions and governed by a political authority with the power to regulate behavior punish transgressors and redesign institutions this system s emergence required the sovereign to relinquish some power in order to release the energies of economic actors rather than spreading through an unguided natural process like trade capitalism emerged where competitive pressures forced political authorities to take risks in order to achieve increased revenues by permitting markets for land labor and capital

this left wing view of capitalism explores how the history of the past 500 years of western civilization has been driven by a singular obsession the accumulation of ever more wealth this drive has been detrimental to the population at large despite the relative comfort the relatively small and shrinking middle class experiences and the opulent luxury the top 1 basks in reminiscent of howard zinn s a people history of the united states veera s leftist economic perspective poses a powerful

question what should society's appropriate response be to pathological greed and economic coup d'etes of america the collateral damage of millions of extinct species and vanishing rainforests the genocide of non western civilization and ancient ways of life all in the name of profit nazi capitalism rotten eggs exploiting the capitalist system a people's history of capitalism is the story of the world capitalists have built for us how things came to be this way and what if anything we can do about it veera shines an unorthodox light on many things you thought you knew about western civilization and a few you probably didn't capitalism has claimed it's our way or the highway for too long now mercilessly slaughtering every civilization in its path for the past 500 years fueled by greed and petroleum the capitalist system may collapse under the weight of its own pyramid schemes or be finished off by the end of cheap oil the lessons veera teaches us here are ones we should already know from history but have forgotten understanding them now will prove crucial over next few pivotal years

a comprehensive survey of capitalism's colonialist roots and uncertain future those who control the world's commanding economic heights buttressed by the theories of mainstream economists presume that capitalism is a self-contained and self-generating system nothing could be further from the truth in this pathbreaking book winner of the Paul A. Baran Paul M. Sweezy Memorial Award radical political economists Utsa Patnaik and Prabhat Patnaik argue that the accumulation of capital has always required the taking of land raw materials and bodies from noncapitalist modes of production they begin with a thorough debunking of mainstream economics then looking at the history of capitalism from the beginnings of colonialism half a millennium ago to today's neoliberal regimes they discover that over the long haul capitalism in order to exist must metastasize itself in the practice of imperialism and the immiseration of countless people a few hundred years ago write the Patnaiks colonialism began to ensure vast virtually free markets for new products in burgeoning cities in the west but even after slavery was generally abolished millions of people in the global south still fell prey to the continuing lethal exigencies of the marketplace even after the second world war when decolonization led to the end of the so-called golden age of capitalism neoliberal economies stepped in to reclaim the global south imposing drastic austerity measures on working people but say the Patnaiks this neoliberal economy which lives from bubble to bubble is doomed to a protracted crisis in its demise we are beginning to see finally the transcendence of the capitalist system
