There has always been a sweeping assumption among paranormal investigators and the para community that limestone has the ability to absorb and release electromagnetic and psychic energies. This phenomenon explains why one site may be more haunted than another. T. C. Lethbridge proposed the stone tape theory in the 1970s as an attempt to explain how this could happen but his efforts yielded little scientific merit. Finally here in this book the first steps in bridging science and the paranormal have been taken to definitively explain the absorption and release mechanisms for limestone's paranormal properties. This revelation incorporates many scientific disciplines and spans the course of history from the creation of earth to our current quantum theories of entanglement, parallel universes, and more. Open this book and you will truly begin a fantastic spectral journey.
