

# Free reading Cleopatra daughter of the Nile classic historical fiction 3 Copy

The Nile is a major north-flowing river in northeastern Africa. It flows into the Mediterranean Sea. The Nile is the longest river in Africa and has historically been considered the longest river in the world, though this has been contested by research suggesting that the Amazon River is slightly longer. Nile River, the longest river in the world, called the father of African rivers. It rises south of the equator and flows northward through northeastern Africa to drain into the Mediterranean Sea. Learn more about the Nile River, including its hydrology and its plant and animal life. In this article, the Nile, which flows northward for 4,160 miles from east-central Africa to the Mediterranean, provided ancient Egypt with fertile soil and water for irrigation, as well as a means of transport. The Nile River flows from south to north through eastern Africa. It begins in the rivers that flow into Lake Victoria, located in modern-day Uganda, Tanzania, and Kenya, and empties into the Mediterranean Sea more than 6,600 kilometers (4,100 miles) to the north, making it one of the longest rivers in the world. The Nile River, known as the father of the African river, is Africa and the world's longest river, stretching approximately 6,650 kilometers from its sources, the Blue Nile and White Nile, to the mouth at the Mediterranean Sea. The Nile River, located in Egypt, flows 4,132 miles (6,650 kilometers) northward to the Mediterranean Sea, a very unusual direction for a river to take. It was considered the source of life by the ancient Egyptians and has played a vital role in the country's history. Learn about the influence of the Nile on Egypt's population and discover where this river comes from with real-life visuals and animated maps. Filled with the Nile River, the Nile River has provided fertile land, transportation, food, and freshwater to Egypt for more than 5,000 years. Nile River, Arabic: *baḥr al nīl*, river, eastern and northeastern Africa, the longest river in the world. It is about 4,132 miles (6,650 km) long from its remotest headstream, which flows into Lake Victoria, to the Mediterranean Sea. The basin of the present-day Nile falls naturally into seven major regions: the Lake Plateau of East Africa, the Al-Jabal el Jebel, the White Nile, the Blue Nile, the Atbara, the Nile north of Khartoum in Sudan and Egypt, and the Nile Delta. The Nile River, considered the longest river in the world, is approximately 4,258 miles (6,853 kilometers) long, but its exact length is a matter of debate. The Nile River has certainly played a critical role in the history of ancient Egypt, famous as the longest river in the world. The river got its name from the Greek word *Neilos*, which means valley. The Nile floods the lands in Egypt, leaving behind black sediment, that's why the ancient Egyptians named the river *ar*, meaning black. The Nile, Arabic: *an nīl*, is Africa's longest river and, by most definitions, the longest in the world. Its drainage basin contains territory of Tanzania, Uganda, Rwanda, Burundi, the Democratic Republic of the Congo, Kenya, Ethiopia, Eritrea, South Sudan, Republic of the Sudan, and Egypt. The Nile is one of the most famous rivers anywhere on our planet and rightfully so. While all rivers are important for people and wildlife who live nearby, the

nile looms especially large both the Nile which flows northward for 4 160 miles from east central Africa to the Mediterranean provided ancient Egypt with fertile soil and water for irrigation as well as a means of transport. Scientists have long suspected that the Nile which runs northward for roughly 4 100 miles from Lake Victoria in Tanzania, Kenya, and Uganda to the Mediterranean Sea once had several offshoots. The Nile was at the heart of ancient Egyptian civilization and the location of so many pyramids some distance away from the river has until now not been fully explained. In a new study published in the *Journal of the Royal Society*, the Battle of the Nile, also known as the Battle of Aboukir Bay, French *Bataille d'Aboukir*, was a major naval battle fought between the British Royal Navy and the Navy of the French Republic at Aboukir Bay on the Mediterranean coast off the Nile Delta of Egypt between 1-3 August 1798.
