in the existential philosophy of etty hillesum means g s coetsier breaks new ground by demonstrating the jewish existential nature of etty hillesum s spiritual and cultural life in light of the writings of martin buber emmanuel levinas and dietrich bonhoeffer hillesum s diaries and letters written between 1941 and 1943 illustrate her struggle to come to terms with her personal life in the context of the second world war and the shoah by finding god under the rubble of the horrors she rediscovers the divine presence between humankind while taking up responsibility for the other as a way to embrace justice and compassion in a fascinating accessible and thorough study coetsier dispels much of the confusion that assails readers when they are exposed to the bewildering range of christian and jewish influences and other cultural interpretations of her writings the result is a convincing and profound picture of etty hillesum s path to spiritual freedom

presenting securitization as a communication issue this book combines media framing with the theory of securitization to explain how the discourse of security informs media content and what happens to policy and public understanding when it does because securitization studies the construction of threats to societal structures as well as political institutional structures this book addresses security framing as a question of identity and the ability of political cultural elites and media actors to manipulate it after setting out how its theories work together the book turns to news and its effects how do media accounts make empirical sense of the world when they are bound by the need to make social cultural sense first how does security look in competing news accounts and how do securitizing frames affect attitudes toward policies and political elites last the book asks how academics and professionals

can address the challenges to a democratic public's role in decision making created by the manipulation of security bringing together distinct fields within communication studies to reflect on the pressing issue of securitization this book will be a key resource for scholars and students working in the fields of mass communication policy studies critical linguistics and international relations as well as risk and crisis communication
