in this book gavin rae analyses the foundations of political life by undertaking a critical comparative analysis of the political theologies of carl schmitt and emmanuel levinas in so doing rae contributes to key debates in contemporary political philosophy specifically those relating to the nature of and the relationship between the theological the political and the ethical as well as those questioning the existence of ahistoric metaphysical ontological and epistemological foundations while the theological is often associated with belief in a fixed foundation such as god or the truth of a religion rae identifies another sense rooted in epistemology on this understanding the ontological limitations of human cognition mean that ultimately human truth is based in faith and so can never be certain the argument developed suggests that levinas conception of the political is grounded in theology in the sense of religion particularly the revelations of judaism for this reason levinas claims that the political decision is based on how to implement a prior religiously inspired norm justice schmitt in contrast develops a conception of the political rooted in epistemic faith to claim that the political decision is normless while sympathetic to schmitt s conception of theology and its relationship to the political rae concludes by arguing that the emphasis levinas places on responsibility is crucial to understanding the implications of this the continuing relevance of schmitt s and levinas political theologies is that they teach us that while the political decision is ultimately normless we bear an infinite responsibility for the consequences of this normless decision

the sourcebook on the foundations of social protection delivery systems synthesizes real world experiences and lessons learned of social protection delivery systems from around the globe it takes a broad view of social protection covering various intended populations such as poor or low income families unemployed workers persons with disabilities and individuals facing social risks it discusses many types of interventions that governments provide to individuals families or households including categorical programs poverty targeted programs labor benefits and services disability benefits and services and social services the sourcebook seeks to address concrete how to questions including how do countries deliver social protection benefits and services how do they do so effectively and efficiently how do they ensure dynamic inclusion especially for the most vulnerable and needy how do they promote better

coordination and integration not only among social protection programs but also among programs in other parts of government how can they meet the needs of their intended populations and provide a better client experience the delivery systems framework elaborates on the key elements of that operating environment the framework is anchored in core implementation phases along the delivery chain key actors including people and institutions interact all along that delivery chain those interactions are facilitated by communications information systems and technology this framework can apply to the delivery of one or many programs and to the delivery of adaptive social protection the sourcebook structures itself around eight key principles that can frame the delivery systems mind set 1 there is no single blueprint for delivery systems but there are commonalities and those common elements constitute the core of the delivery systems framework 2 quality of implementation matters and weaknesses in any of the core elements will negatively affect the entire system reducing the impacts of the program s they support 3 delivery systems evolve over time in a nonlinear fashion and their starting points matter 4 efforts should be made to keep it simple and to do simple well from the start 5 the first mile people s direct interface with administrative functions is often the weakest link in the delivery chain improving it may take systemic change but will greatly improve overall efficiencies and mitigate the risk of failures on the frontlines 6 social protection programs do not operate in a vacuum and thus their delivery systems should not be developed in silos synergies across institutions and information systems are possible and can improve program outcomes 7 social protection delivery systems can contribute more broadly to government s ability to serve other sectors such as health insurance subsidies scholarships social energy tariffs housing benefits and legal services 8 the dual challenges of inclusion and coordination are pervasive and perennial and encourage the continuous improvement of delivery systems through a dynamic integrated and human centered approach
