## Common Sense and Legal Judgment

2017-11-27

what does it mean when a judge in a court of law uses the phrase common sense is it a type of evidence or a mode of reasoning in a world characterized by material and political inequalities whose common sense should inform the law common sense and legal judgment explores this rhetorically powerful phrase arguing that common sense when invoked in political and legal discourses without adequate reflection poses a threat to the quality and legitimacy of legal judgment often operating in the service of conservatism populism or majoritarianism common sense can harbour stereotypes reproduce unjust power relations and silence marginalized people nevertheless drawing the works of theorists such as thomas reid antonio gramsci and hannah arendt into conversation with rulings by the supreme court of canada patricia cochrane demonstrates that with careful attention the democratic egalitarian and community sustaining aspects of common sense can be brought to light a call for critical self reflection and the close scrutiny of power relationships and social contexts this book is a direct response to social justice predicaments and their confounding relationships to law creative and interdisciplinary common sense and legal judgment reinvigorates feminist and anti poverty understandings of judgment knowledge justice and accountability

## Geographies of Urban Sound

2014-05-28

taking into account both the urban soundscape and the impacts of sound on the urban dweller this book examines sound not as a by product of urban life but as a fundamental part of the urban experience that is crucial to understanding the city s sense of place illustrated by case studies from europe and north america these range from on site measurements to the construction of audio tours for local tourism from media analysis of popular culture audio drama to sound identity and city branding and from the classification of noise in city planning to a consideration of the complex relationship between sacred sound and the creation of a sense of place

well known for applying mindfulness to the treatment of depression pioneering researcher john teasdale now explores the broader changes that people can experience through contemplative practices what goes on in our minds when we are mindful what does it mean to talk of mindfulness as a way of being from a scientific perspective how do core elements of contemplative traditions have their beneficial effects teasdale describes two types of knowing that human beings have evolved conceptual and holistic intuitive and shows how mindfulness can achieve a healthier balance between them he masterfully describes the mechanisms by which this shift in consciousness not only can reduce emotional suffering but also can lead to greater joy and compassion and a transformed sense of self

the eminent philosopher and an emerging astrophysicist return to the ancient art of cosmology in a study of plural worlds and their rebuilding our contemporary challenge according to jean luc nancy and aurelien barrau is that a new world has stolen up on us we no longer live in a world but in worlds we do not live in a universe anymore but rather in a multiverse we no longer create we appropriate and montage and we no longer build sovereign hierarchical political institutions we form local assemblies and networks of cross national assemblages and we do this at the same time as we form multinational corporations that no longer pay taxes to the state nancy and barrau invite us on an uncharted walk into barely known worlds when an everyday french idiom what s this world coming to is used to question our conventional thinking about the world we soon find ourselves living among heaps of odd bits and pieces that are amassing without any unifying force or center living not only in a time of ruin and fragmentation but in one of rebuilding astrophysicist aurelien barrau articulates a major shift in the paradigm of contemporary physics from a universe to a multiverse meanwhile jean luc nancy s essay of struction is a contemporary comment on the project of deconstruction and french poststructuralist thought together barrau and nancy argue that contemporary thought has shifted from deconstruction to what they carefully call the struction of dis order

the founding premise of this book is that the nimbus of prestige which once surrounded the idea of justice has now been dimmed to such a degree that it is no longer sufficient to secure the possibility of a good conscience for those who undertake in good faith to make the world a better place in the spheres of politics and law the many decent human beings who have noticed and experienced this diminishment of justice s prestige find themselves in a thoroughly disenchanted existential situation for them the attempt to do justice without the illusion of being grounded in something beyond the sheer facticity of their own performances is a distinctly ethical theme which cries out to be investigated in its own right heeding the cry this book asks and attempts to answer the following fundamental ethical question is a life in the law even one spent in the pursuit of justice worth living and if so how can a disenchanted person come to bear the living of

it without constantly having to engage in self deception if nietzsche is right that living without illusions is impossible for human beings then the most important ethical implication of this essentially anthropological fact goes far beyond the question of what illusions we ought to choose it must also include the question of whether we should succumb to that most seductive and pernicious of all illusions namely the belief that exercising great care and responsibility in choosing our illusions which we might then call our principles of justice excuses us ethically for what we do to others in their name the culmination of a 10 year legal philosophical project this book will appeal to graduate students scholars and curious non academic intellectuals interested in continental philosophy critical legal theory postmodern theology the philosophy of human rights and the study of individual ethics in the context of law

a distinctive feature of mystical experience is that it is imageless mystics of various traditions witness indeed to their going beyond all intermediaries so as to enjoy immediate union understandably the idea of imageless immediacy is attractive and it is especially in vogue with those who hope to discover that different religious spiritualities converge if only the particularity of say the christian way would be left behind however a crucial question arises here if mystical union consists in simply transcending what is part and parcel of the human condition where is its relevance is the mystic as such in a position to be his or her human self thinking and loving enjoying and suffering can he or she be active in the world of humankind obviously it is especially in the christian tradition that this matter comes to the fore as a radical difficulty for here there is the divine image and mediator so much so that the humanity of jesus ought to be integral to a person s union with god perhaps the christian mystic is such an extraordinary figure that the humanity and all other images and intermediaries are for him or her at best a stepping stone that is bound to disappear the riddle of christian mystical experience aims to clarify this issue by analyzing the writings of such visionaries as julian of norwich teresa of avila and maria petyt of the ecstasy minded masters richard of saint victor bernard of clairvaux and bonaventure describing francis of assisi s experience of the cream of the flemish mystics namely hadewijch and jan van ruusbroec nevertheless the preference for the mystical text does not prevent the riddle from drawing on the insights of modern philosophers such as jean paul sartre and jean luc

marion when treating of images and idols or michael polanyi and ludwig wittgenstein when reflecting on intermediaries the main result of this procedure may come as a surprise far from turning into a detached creature who forgets about the humanity and the human the full fledged mystic is as a flemish mystic puts it wholly in god where he rests in enjoyment and wholly in himself where he loves with works experiencing union with intermediary and without intermediary the true christian mystic is unimaged as well as imaged upon the humanity of our lord through heartfelt affection

austen and woolf are materialists this book argues things in their novels give us entry into some of the most contentious issues of the day this wholly materialist understanding produces worldly

realism an experimental writing practice which asserts egalitarian continuity between people things and the physical world this radical redistribution of the importance of material objects and biological existence challenges the traditional idealist hierarchy of mind over matter that has justified gender class and race subordination entering their writing careers at the critical moments of the french revolution and the first world war respectively and sharing a political inheritance of scottish enlightenment scepticism austen s and woolf s rigorous critiques of the dangers of mental vision unchecked by facts is more timely than ever in the current world dominated by fundamentalist neo liberal religious and nationalist belief systems

a broad synthetic philosophy of nature focused on human sociality in this book joseph rouse takes his innovative work to the next level by articulating an integrated philosophy of society as part of nature he shows how and why we ought to unite our biological conception of human beings as animals with our sociocultural and psychological conceptions of human beings as persons and acculturated agents rouse s philosophy engages with biological understandings of human bodies and their environments as well as the diverse practices and institutions through which people live and engage with one another familiar conceptual separations of natural social

and mental worlds did not arise by happenstance he argues but often for principled reasons that have left those divisions deeply entrenched in contemporary intellectual life those reasons are eroding in light of new developments across the disciplines but that erosion has not been sufficient to produce more adequately integrated conceptual alternatives until now social practices and biological niche construction shows how the characteristic plasticity plurality and critical contestation of human ways of life can best be understood as evolved and evolving relations among human organisms and their distinctive biological environments it also highlights the constitutive interdependence of those ways of life with many other organisms from microbial populations to certain plants and animals and explores the consequences of this in depth noting for instance how the integration of the natural and social also provides new insights on central issues in social theory such as the body language normativity and power
