as a result of decades of work by literary scholars and a series of great historians such a study is finally possible this volume addresses that need and in the light of a recent revival of interest in fielding s work it arrives most opportunely the author offers here a wide ranging focus and a firm grip on the shifting complexities of fielding s political situations the loyalties and enmities factional alignments and fractious rhetoric that allow a satisfactory understanding of fielding s political writing political writing in fielding s day as in ours was topical concerned with evanescent problems and day to day needs that were familiar to contemporaries but that are now recaptured only with greatest difficulty this study constitutes a thorough reconstruction of fielding s political context and extricates from the context fielding s own political endeavours clearly s work will make many of fielding s previously unstudied work accessible to students and scholars of eighteenth century english literature a necessary point of reference to both literary specialists and historians concerned with eighteenth century england the myth that women are fashionable but men are not has been challenged through popular culture and academia in recent years not least by the proliferation of men s style magazines such as go and arena and the emergence of masculinity as a marketing tool in this engaging new book tim edwards applies a sociological approach to our understanding of men s fashion which he perceives to be significant in the nexus of masculinity and society past and present rather than simply an artistic or aesthetic interest denoting effeminacy or homosexuality rejecting an essentialist or natural origin edwards explores how masculinity and men s fashion are constructed particularly in relation to consumer society it is the growing commodification and aestheticism of everyday life alongside developments in marketing and advertising that edwards identifies as the catalyst in the self conscious emergence of men s fashion rather than an abstract crisis of masculinity or the new man identity concurrently in the 1980s changes in demography economics and ideology gave certain men greater freedom and spending power than ever before edwards investigates how these men clearly distinguished by age class and sexual orientation were seduced by advertisers with sexy images of suited city gents and body beautiful boys in levi s and how the resultant process of consumption was facilitated through the practice of shopping itself such as easy access to
