drug free sport is an unattainable aspiration in this critical paradigm shifting reappraisal of contemporary drug policy in sport bob stewart and aaron smith argue that drug use in sport is an inexorable consequence of the nature structure and culture of sport itself by de mythologising and de moralising the assumptions that prop up current drug management controls and re emphasising the importance of the long term well being and civil rights of the athlete

they offer a powerful argument for creating a legitimate space for drug use in sport the book offers a broad ranging overview of the social and commercial pressures impelling drug use and maps the full historical and social extent of the problem with policy analysis at the centre of the discussion the book explores the complete range of social management policy scientific technological and health issues around drugs in sport highlighting the irresolvable tension between the zero tolerance model as advanced by wada and the harm reduction approach adopted by drug education and treatment agencies while there are no simple solutions as long as drugs use is endemic in wider society the authors argue that a more nuanced and progressive approach is required in order to safeguard and protect the health social liberty and best interests of athletes and sports people as well as the value of sport itself

why has doping both as a practice and a social phenomenon been approached largely as a question of context sport or fitness individuals may use substances to enhance sporting performance or within the framework of gym and fitness culture to create a perfect body but clearly people who dope are not bound to a singular context it is quite the opposite as individuals weave between and move across various settings in their trajectories to and from doping as goals identities ambitions and lifestyles change over time still these stark categorizations often made in public discourse and reinforced by scholars have continued to ignore these lived experiences and limited our understanding of doping building on data gathered through ethnographic fieldwork studies of online doping communities and in depth case studies this book embraces the challenge of moving beyond traditional and historical doping dichotomies such as those of sport or fitness online or offline pleasure or harm masculinity or femininity and health or harm and in a sociologically informed analysis it develops new terminology to understand trajectories to and from doping it argues there are multiple ways to understand doped bodies and doping practices and that we must approach these questions from the perspective of both and rather than either or by imploding these divisions it offers updated and nuanced ways of both empirically and theoretically rethinking doping use and experiences attached to the practice

with every positive drugs test the credibility and veracity of modern elite sport is diminished in this radical and provocative critique of current anti doping policy and practice verner møller argues that the fight against doping promoted as an initiative to cleanse sport of cheats is at heart nothing less than a battle to save sport from itself located on the fault line between the will to purity and the will to win drawing on extensive and detailed

case studies of doping in sport and using a highly original blend of conceptual ideas from philosophy and sociology møller strongly criticises current anti doping regimes and challenges our commonly held ideas about the nature of sport and the risks posed by drugs to health and fair play he argues forcefully that we must understand the precarious position of the athlete and that only by containing coaches doctors and drug companies within the anti doping regime can we hope to ever make progress on this most important issue written in a lively and engaging style and skilfully blending empirical case studies with cutting edge theory this book represents an important statement on the nature of sport morality and modernity it is important reading for all serious students and scholars of the ethics sociology and politics of sport
