Advanced Phase Change Materials for Thermal Storage

2021-08-30

thermal energy storage using phase change materials pcms is a research topic that has attracted much attention in recent decades this is mainly due to the potential use of pcms as latent storage media in a large variety of applications although many kinds of pcms are already commercial products advanced materials with improved properties and new latent storage concepts are required to better meet the specific requirements of different applications moreover the development of common validation procedures for pcms is an important issue that should be addressed in order to achieve commercial deployment and implementation of these kinds of materials in latent storage systems the
