set includes revised editions of some issues

Bibliographical Bulletin

1943

this interesting handbook discusses 145 plant viruses in 27 groups and 31 unclassified viruses in naturally infected legumes the viruses were observed in field infections of 281 species in 64 genera of the leguminosae the book presents information regarding resistance sources and resistance breeding vectors seed transmission and host ranges measurements of virus properties are organized in tabular form for particle dimensions serological relationships nucleic acid percentages sedimentation coefficients of particles and nucleic acids molecular weights of nucleic acids and coat proteins optical density and buoyant density handbook of viruses infecting legumes is unique in that it relates inclusion cytology to plant virus detection identification and classification light and electron micrographs illustrate morphology location and staining reactions of inclusions of the 27 groups that contain viruses infecting legumes in nature inclusions are diagnostic at the group level in 15 of these groups plant breeders diagnosticians plant virologists and students of plant virology will find this an indispensable guide to legume viruses

CRC Handbook of Viruses Infecting Legumes

1991-09-11

with advances in agro technology cucurbits are now being grown throughout the year however they are prone to biotic and abiotic stresses resulting in significant yield loss sustainable management of such stresses is a complex issue in the intensive cultivation of cucurbits involving high levels of fertilization and irrigation further under the changing climatic conditions pest scenarios vary constantly with invasive alien species of pests becoming more common as a result of free trade and frequent international travel as such agrochemicals are being used as powerful weapons to combat the increasing number of pests and diseases lack of proper crop management technologies inaccurate diagnosis and indiscriminate and excessive use of pesticides are major causes of pesticide resistance and resurgence environmental pollution and hazards to the non target biota this comprehensive book provides essential insights into the management of biotic and abiotic stresses in cucurbit cultivation and re evaluating the role of agrochemicals and gathers information on insect pests mites nematodes diseases and weeds as well as on their sustainable management from scattered sources written in language that is easy to understand and including high quality photographs it is a valuable resource for students researchers plant protection specialists extension workers and growers

Stresses of Cucurbits: Current Status and Management

2020-11-16

modern political theory critically examines the contemporary state of political

theory making an assessment of the achievements and limitations of the behavioural revolution in its totality and reviews objectively the major paradigms and conceptual frameworks adopted by the discipline the salient features of the contending conceptual models elaborated by leading scholars operating from separate locations and disparate premises have been highlighted and intellectual inter linkages in their works have been traced the book has 3 parts part i comprises the scope of political science as a discipline part ii deals with the tools and techniques of political analysis part iii delineates mainstreams of contemporary political thought

specialist periodical reports provide systematic and detailed review coverage of progress in the major areas of chemical research written by experts in their specialist fields the series creates a unique service for the active research chemist supplying regular critical in depth accounts of progress in particular areas of chemistry for over 80 years the royal society of chemistry and its predecessor the chemical society have been publishing reports charting developments in chemistry which originally took the form of annual reports however by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series specialist periodical reports was born the annual reports themselves still existed but were divided into two and subsequently three volumes covering inorganic organic and physical chemistry for more general coverage of the highlights in chemistry they remain a must since that time the spr series has altered according to the fluctuating degree of activity in various fields of chemistry some titles have remained unchanged while others have altered their emphasis along with their titles some have been combined under a new name whereas others have had to be discontinued the current list of specialist periodical reports can be seen on the inside flap of this volume

Current List of Medical Literature

1951

vectors of plant pathogens is a collection of papers that discusses the interrelationship of plant pathogens with their vectors this collection deals with

the numerous vector groups associated with plant pathogens one paper describes the biology feeding behavior and distribution of aphids leafhoppers plant hoppers mealy bugs whiteflies psyllids membracids another paper addresses the virus transmission characteristics of the mealy bugs during preliminary fasting or feeding acquisition access time post acquisition fasting or feeding and the inoculation access time other papers also discuss the involvement of insects in transmitting bacterial and fungal pathogens the authors list unresolved issues such as the role of insects in overwintering of bacterial pathogens or the association of the fungus with a particular vector one author describes some suspected fungi transmission such as the pea stem necrosis virus red clover necrotic mosaic virus and the tomato bushy stunt virus another paper examines the fate of plant viruses in mite vectors and convectors particularly the viruses found in wheat barley or brome grass agriculturists botanists and researchers in the field of botany conservation and plant genealogy will find this book useful

Contemporary Political Theory

1987

cowpea an important food legume is adapted to wide ranges of soil and rainfall situations hence cultivated in tropical and sub tropical regions of the world it is the crop of low and high rainfall regions grown particularly as a mixed inter crop for various purposes cowpea is an ancient source of food forage fodder vegetable certain snacks cover crop and an important component of cropping system the crop has been investigated for its varied aspects to make it more productive useful sustenance source of organic food and the crop of common masses the information so generated is scattered unsystematic and not readily available at a place it is desired that research results of various aspects generated in india are collected compiled and

systematically arranged so as to draw viable and valuable conclusion by the intended users and planners in view of this present compilation cowpea in india represents a treasure of scientific information by reputed researchers throughout the country the compilation comprises fourteen chapters devoted to plant improvement crop husbandry resistance towards abiotic stresses genetic resources of quantitative and qualitative nature plant protection soil nematodes forage aspects uses vegetable purposes etc the book it is hoped would be of great use and help to those concerned with all over cowpea advancement and development in one way or other

Inorganic Chemistry of the Main-Group Elements

2007-10-31

the original aim of this book was to cover different aspects of the traditionally filamentous potex carla poty clostero and capilloviruses the title the filamentous plant viruses seemed the only suitable one but it has led us to discuss also the quite different filamentous viruses of the rice stripe group recently officially named the tenuivirus group which otherwise indeed might not have been conveniently covered in any volume of this series the question must be asked what is there new that justifies the presentation of a book of this kind an outline of the answer may be among the traditional filamentous viruses much pro given as follows gress has been made in elucidating the physical structure of potexvirus particles and this work serves as an excellent model for discussion of and future experiments on the poty carla clostero and capilloviruses which have comparable structures although they are more difficult to manipulate work on the structure and strategy of the genomes of poty viruses is however relatively advanced and at a very interesting stage the helper component that assists the aphid transmission of potyviruses has also recently received considerable attention although the more we know about that the less seems

clear about the aphid transmission of the carlaviruses and closteroviruses which apparently neither possess nor require a helper component

Research in Progress

1960

sensationally good a riveting story the real life spooks and spies far more compelling than anything you will see on the screen history doesn t come more fascinating than this evening standard for over 100 years the agents of mi5 have defended britain against enemy subversion their work has remained shrouded in secrecy until now this first ever authorized account reveals the british security service as never before its inner workings its clandestine operations its failures and its triumphs definitive and fascinating whether reporting on hitler in the 1930s the double cross system of the second world war zionist terrorism the atom spies the cambridge spies the so called wilson plot or the 1988 shooting of the ira bombers in gibraltar this book is essential reading alan judd spectator the british secret service has opened its archives and even insiders may be in for a surprise magisterial extremely readable oleg gordievsky the times compelling a feast max hastings sunday times a superb account he has captured every important detail of the service unlikely to be surpassed for another 100 years simon heffer daily telegraph

students perception of home economics classroom learning [PDF]

this study is a modest attempt to apply the integration theory to the analysis of trends and shifts in inter dependence intra and extra regional in south asia distinction between the integration models that emerged in western europe and the south asian integration is discernible the external relations of the saarc members are having positive and negative impacts on the integrative process in this region thus bilateral relations and external ties are the major considerations in this study this study brings home the fact that the supranational handling of political and economic issues are not possible in a developing region where sovereignty is jealously guarded the third world integration model as provided by Lynn Mytelka is found useful in the south asian context Mytelka's type III model considers the conditions of dependence but in south asia it is very difficult to attain type III integration scheme since primacy of the political is underscored in a third world integration scheme relatively high degree of political integration at the outset is a logical first step this high level political integration has got two aspects viz i bilateral and ii external projection of common regional front in dealing with external powers will have a spill over effect on bilateral relations without improving bilateral relations vital economic areas cannot be brought under the regional scheme it is found that india has got a special role in regional cooperation in south asia since the whole region is indo centric and india dominated good neighbourly relations incorporating the ideals and aspirations of the smaller south asian countries would ultimately result in widening the scope of saarc regionalism at the present stage deepening rather than widening should be given priority the attempt should be to diminish the dimensions of conflict rather than the outright elimination of it saarc is a compound of interests settling of bilateral disputes is not mathematically achievable

Vectors of Plant Pathogens

2004-07-01

biotechnology has come to a stage where by replacing some of the age old practices of breeding it can produce novel and improved plants and animals that can better serve human beings and their purposes the techniques of cellular and subcellular engineering such as gene splicing and recombinant dna cloning hybridomas and monoclonal anti bodies production of human insulin protein engineering industrial fermentation artificial insemination cryopreservation and ovum transfer plant tissue culture and somatic hybridization nitrogen fixation phytomass production for biofuels etc have advanced greatly in the past decade due to the availability of better equipment and the consolidation of knowledge product orientation has removed biotechnology from the area of pure academic interest to one of utility where the final product is a spur to action businesses have started pouring money into projects which has aided greatly in improving equipment information exchange and arousing the interest and imagination of the public the common goal of science industry and the public opens wide vistas and great hopes for biotechnology the business of biotechnology addresses itself to issues of factory farming technology transfer joint ventures international cooperation and to specific topics as well as the production of diagnostic kits industry is particularly concerned with the pharmaceutical field and microbial biotechnology from which profitable return can accrue commercial interests have led to better management practices and systematisation

Cowpea in India

2013-11-09

the ability to see deeply affects how human beings perceive and interpret the world around them for most people eyesight is part of everyday communication social activities educational and professional pursuits the care of others and the maintenance of personal health independence and mobility functioning eyes and vision system can reduce an adult s risk of chronic health conditions death falls and injuries social isolation depression and other psychological problems in children properly maintained eye and vision health contributes to a child s social development academic achievement and better health across the lifespan the public generally recognizes its reliance on sight and fears its loss but emphasis on eye and vision health in general has not been integrated into daily life to the same extent as other health promotion activities such as teeth brushing hand washing physical and mental exercise and various injury prevention behaviors a larger population health approach is needed to engage a wide range of stakeholders in coordinated efforts that can sustain the scope of behavior change the shaping of socioeconomic environments can eventually lead to new social norms that promote eye and vision health making eye health a population health imperative vision for tomorrow proposes a new population centered framework to guide action and coordination among various and sometimes competing stakeholders in pursuit of improved eye and vision health and health equity in the united states building on the momentum of previous public health efforts this report also introduces a model for action that highlights different levels of prevention activities across a range of stakeholders and provides specific examples of how population health strategies can be translated into cohesive areas for action at federal state and local levels

The Plant Viruses

2012-04-26

this invaluable volume set of advances in geosciences continues the excellent tradition of the asia oceania scientific community in providing the most up to date research results on a wide range of geosciences and environmental science the information is vital to the understanding of the effects of climate change extreme weathers on the most populated regions and fastest moving economies in the world besides these volumes also highlight original papers from many prestigious research institutions which are conducting cutting edge studies in atmospheric physics hydrological science and water resource ocean science and coastal study planetary exploration and solar system science seismology tsunamis upper atmospheric physics and space science

The Defence of the Realm

1992

this book presents new and noteworthy research into retinal diseases it focuses on what we currently know about the environment genetics and mechanisms that lead to retinal degenerations new diagnostics and innovative therapeutic modalities to preserve vision written by renowned scientific investigators this innovative collection of treatment strategies and technological discoveries allows for the realistic translation of research into practice

The Politics of Regionalism in South Asia

2012-12-06

chemistry and microstructure of solidified waste forms presents a comprehensive

summary of mechanisms of immobilization in cementitious waste forms and the effect of waste species on cement chemistry and morphology the book introduces the well known chemistry and microstructure of cement pastes in addition to common mechanisms of immobilization of waste species in cementitious waste forms the fundamental chemical and microstructural fate of waste species is reviewed and a technique for studying cementitious waste forms using scanning transmission electron microscopy stem is described with examples of its application chemistry and microstructure of solidified waste forms also presents evidence to prove that chromium in waste becomes part of the cement matrix and the potentially harmful effect of this process is discussed data for interpretations are included so that other researchers can analyze the data and draw their own conclusions the book also discusses how solubility and solubility theory can be combined with leach theory and diffusion theory to predict the leaching performance of cementitious waste forms chemistry and microstructure of solidified waste forms will prove invaluable to hazardous waste professionals engineers environmental engineers chemical engineers waste disposal managers waste form developers and researchers and regulators

Trees I

1949

revised and substantially updated the new international politics of south asia argues that the politics of the individual states of south asia cannot be understood without reference to the regional and international context the author emphasises the need to consider rapid political social and economic change in the context of debates over ethnic identity and changes within the international system following the collapse of the soviet union recent changes have opened up new opportunities for the region but have also exposed specific weaknesses the author discusses india s evolving

relationship with the international economic system economic reforms in pakistan and sri lanka as well as key issues such as the regional position on the npt treaty the comprehensive test ban treaty environmental issues and the post cold war world order

The Indian Labour Year Book

1975

the russian invasion of ukraine in february 2022 put the indian foreign policy in a bind the west sought the solidarity of all like minded countries to oppose the russian aggression in ukraine india as usual was unwilling to join either side the european union and the united states have been very unhappy with the indian stand after more than 75 years of independence india continues to maintain its strategic independence although the main thrust of the us policy towards india has always been to make india an american ally first against chinese communism and now as a counterweight to growing military might and economic strength of china the present work seeks to examine the tumultuous relationship between the two countries at the height of cold war rivalries

Modern Political Theory

2017-01-15

india has long been dominated by the upper castes even though the lower castes make up more than two thirds of the population this book examines how the lower castes have become more assertive in recent decades

Making Eye Health a Population Health Imperative

2011

variability in vegetable pathogens is a critical issue particularly in changing environments as it presents challenges to accurate diagnoses and proper management this book focuses on the diverse ecology of phytopathogens covering the varying disease categories acute chronic and emerging the mechanisms involved in disease development pathogen variability and disease management the book also discusses the preharvest and postharvest challenges that arise due to these phytopathogens key features provides an overview of phytopathogens that affect vegetables in various environmental conditions discusses how to manage vegetables affected by specific pathogens offers eco friendly approaches to prevent postharvest diseases presents a comprehensive guide to identifying and addressing numerous diseases for individuals in the fields of horticulture

Solid Earth (SE)

1989

a thought provoking treatise on understanding and treating the aging mind and brain this handbook recognizes the critical issues surrounding mind and brain health by tackling overarching and pragmatic needs so as to better understand these multifaceted issues this includes summarizing and synthesizing critical evidence approaches and strategies from multidisciplinary research all of which have advanced our understanding of the neural substrates of attention perception memory language decision making motor behavior social cognition emotion and other mental functions

written by a plethora of health experts from around the world the wiley handbook on the aging mind and brain offers in depth contributions in 7 sections introduction methods of assessment brain functions and behavior across the lifespan cognition behavior and disease optimizing brain function in health and disease forensics competence legal ethics and policy issues and conclusion and new directions geared toward improving the recognition diagnosis and treatment of many brain based disorders that occur in older adults and that cause disability and death seeks to advance the care of patients who have perceptual cognitive language memory emotional and many other behavioral symptoms associated with these disorders addresses principles and practice relevant to challenges posed by the us national academy of sciences and national institute of aging nia presents materials at a scientific level that is appropriate for a wide variety of providers the wiley handbook on the aging mind and brain is an important text for neurologists psychiatrists psychologists psychiatrists geriatricians nurses pharmacists social workers and other primary caregivers who care for patients in routine and specialty practices as well as students interns residents and fellows

Progress in Acarology

2007-11-06

this book provides an overview on new insights in glaucoma the latest technological developments scientific achievements and novel research leading to new paradigms in glaucoma diagnosis readers will discover a broad picture starting from theoretical perspectives in diagnostic criteria followed by practical examination and clinical interpretations while highlighting potential pitfalls and limitations in analysis non invasive modern technologies allowing visualization and quantification of various parts of the human eye are fast evolving and improving interpretation of modern

diagnostic possibilities are essential to fill the gap between sophisticated equipment complex clinical data and the need for precision medicine based interpretation issues such as the importance of intraocular intracranial and ocular perfusion pressures iop icp opp in the pathogenesis of glaucoma and imaging modalities for examination of the optic nerve head retinal fiber layer and visual field assessment in glaucoma are explored in these chapters the problem based learning approach presented herein offers a succinct go to guide to read and discover answers

Retinal Degenerations

Chemistry and Microstructure of Solidified Waste Forms

1997-09-15

this book is one of the first in depth and systematic studies on the functioning and aspiring federations of south asia it examines how federal dynamics in india pakistan nepal and sri lanka are impinged on by the nature of their specific constitutions their societal political and cultural fabrics composition of power elites and ruling classes structures of political economy and market electoral and party systems mass media and information technology the authors offer a comparative analytical conceptual and theoretical framework to understand patterns and trends as also experiences of and possibilities for federalism in south asia they highlight divergences and similarities successes and key challenges while indicating federalism s wider regional relevance in the discourse on democracy and governance the book concludes that the multicultural character of these societies beset with ethnic and regional conflicts separatist and military undercurrents makes federal political solutions the only viable route providing a wealth of material this will deeply interest scholars students and teachers of comparative politics political science federal studies area studies as well as those interested in political structures and processes in south asia

The New International Politics of South Asia

2022-11-12

during the second world war and the subsequent cold war foreign agents conducted intelligence gathering sabotage and subversive operations inside neutral countries

aimed at damaging their opponents interests the essays contained in this collection analyze the risks of espionage operations on neutral soil as well as the dangers such covert activities posed for the governments of neutral states in striving to avoid involvement in the firing line of the second world war or the front line of the cold war the contributors argue that neutral states developed security policies that focused on protecting their own sovereignty without provoking overt hostility from any of the great powers this collection describes how the warring parties engaged in competition on neutral territory and analyzes how neutral governments rose to the existential challenge posed by international spies their own venal officials and even foreign assassins

1975

this review volume consists of scientific articles representing the frontier and most advanced progress in the field of semiconductor physics and lattice dynamics

Kidney Disease and Nephrology Index

2003

this anthology will be appropriate for administrative ethics classes and professional thinking in public administration at both the masters and doctoral levels it is a collection of administrative ethics articles published in journals of the american society for public administration aspa from 1941 the earliest publication through 1983 the year that the first aspa code of ethics was established the articles are

organized by themes of enduring importance to the field in order to provide graduate students with ready access to the classic works on ethics in public administration reading this collection will enhance student s knowledge and skills to think and act ethically and contribute to their ability to view current practices in light of traditional perspectives the aspa classics volume serves to bridge the practice of public policy and administration with the empirical research base that has accrued and the models for practice that may be deduced from the research

India's Silent Revolution

2019-12-19

current topics in vector research is based on the premise that to un derstand the whole one must first understand the component parts and how they interact here in volume 4 as well as in future volumes vector pathogen and host will be treated both individually and as integral parts of multifaceted transmission systems it is our intention to present up to date coherent syntheses of the latest findings in vector research suggest promising frontiers for future research and call attention to possible prac tical applications of our present understandings of pathogen vector host interactions to realize our goals we invite world renowned veteran sci entists as well as neophytes to report on their individual areas of expertise where appropriate authors are encouraged to draw conclusions and pro pose hypotheses that stimulate additional thinking and research or oth erwise further our understanding of vector transmission cycles and how such cycles might be interrupted it is our hope that readers will agree that we are serving these objectives and creating a milieu for specialists and generalists in vector research to maintain rapport and understanding
