the second world war introduced the world to nuclear weapons and their consequences behind the scene of these nuclear weapons and an aspect of their consequences is radioactive waste radioactive waste has varying degrees of harmfulness and poses a problem when it comes to storage and disposal radioactive waste is usually kept below ground in varying containers which depend on how radioactive the waste it high level radioactive waste hlw can be stored in underground carbon steel tanks however radioactive waste must also be further immobilized to ensure our safety there are several sites in the united states where high level radioactive waste hlw are stored including the savannah river site srs established in 1950 to produce plutonium and tritium isotopes for defense purposes in order to further immobilize the radioactive waste at this site an in tank precipitation itp process is utilized through this method the sludge portion of the tank wastes is being removed and immobilized in borosilicate glass for eventual disposal in a geological repository as a result a highly alkaline salt present in both liquid and solid forms is produced the salt contains cesium strontium actinides such as plutonium and neptunium and other radionuclides but is this the best method the national research council nrc has empanelled a committee at the request of the u s department of energy doe to provide an independent technical review of alternatives to

the discontinued in tank precipitation itp process for treating the hlw stored in tanks at the srs alternatives for high level waste salt processing at the savannah river site summarizes the finding of the committee which sought to answer 4 questions including was an appropriately comprehensive set of cesium partitioning alternatives identified and are there other alternatives that should be explored and are there significant barriers to the implementation of any of the preferred alternatives taking into account their state of development and their ability to be integrated into the existing srs hlw system
