In Over Our Heads

1994

since the seventeenth century liberal thinkers have been interested in the rights of individuals and their capacities to engage as free equals in the political activity of their community however as many in the republican tradition have noted the maintenance of certain types of communities predicated on broadly shared ethical expectations modes of communication and patterns of activity is a precondition of the meaningful exercise of citizenship rights this volume presents essays from many of the major names in the field exploring citizenship from a fresh perspective after two decades of strident individualism in the light of claims that the liberal democratic state is under threat of collapse from the forces of globalization and in the midst of a theoretical debate about the possible and desirable limits of individual autonomy they argue that it is high time to go beyond the standard concern of what can be ascribed to citizens we must ask what should be demanded of them in the name of the protection of liberty equality and stability

Demands of Citizenship

2004-12-30

bringing a vast amount of material to a western audience for the first time

this book provides a detailed systematic micro level analysis of the historical development of the chinese banking industry analyzing the key issues in the development of the bank of china in the period 1905 to 1949

The Chinese Banking Industry

2007-08-18

The Social Welfare Forum

1891

world bank discussion paper no 354 promoting a high savings rate is high on the world bank s agenda for promoting national income growth this study surveys broad saving trends worldwide summarizes current knowledge about savings and consumption identifies main unresolved issues and outlines the

major policy questions to be researched the paper include case studies from sub saharan africa china colombia india mexico and pakistan

Job Demands in a Changing World of Work

2017-03-31

this book examines the everyday living conditions experienced and also shaped by young people in europe contributors reflect on the current context of economic social and political change affecting youth in the critical transition from dependence to independence the volume provides the reader with a multi dimensional and interdisciplinary view of youth cultures drawn from a variety of recent research throughout the continent

The Demand for Oil Products in Developing Countries

1997-01-01

divided into four sections history historiography political theory and context and reception the oxford handbook of thucydides provides a comprehensive introduction to thucydides ideas and their ancient influence it bridges traditionally divided disciplines and offers both solid explanation and innovative approaches

Maintaining Health and Energy for the Demands of Modern Life

1936

this is a new release of the original 1939 edition

Youth in Contemporary Europe

2010-06-10

in this book daniel hamermesh provides the first comprehensive picture of the disparate field of labor demand the author reviews both the static and dynamic theories of labor demand and provides evaluative summaries of the available empirical research in these two subject areas moreover he uses both theory and evidence to establish a generalized framework for analyzing the impact of policies such as minimum wages payroll taxes job security measures unemployment insurance and others covering every aspect of labor demand this book uses material from a wide range of countries

The Oxford Handbook of Thucydides

2017

this is the logical conclusion of the comfort messages it follows the comfort trilogy and details how we got to the soul crushing conditions that predominate in retail pharmacy in the 21st century in this work i will give a history of pharmacy from my view of having worked in drug stores pharmacies for 54 years in 1957 i took my first drug store job i was a stock boy in august of 1964 i became registered in ohio i have done nothing else i have observed the progression of the job of working in a pharmacy as it evolved through three phases i will call them the historical era the modern era and the dark era seeing how we got to where we are will help us to move on i will conclude this book by outlining reasonable and uncomplicated demands that will benefit both the institutionalized pharmacist and the institution that suffers right along with us a happy pharmacist is a more productive employee and that means more profits

Maintaining Health and Energy for the Demands of Modern Life

2013-10

this book presents a comprehensive overview of three key areas heterodox macroeconomics development economics and classical political economy it offers an alternative macroeconomic framework to analyse policies with an emphasis on issues of equity and justice with contributions by leading economists from across the world it examines the growth and distribution of income trade and finance in developing countries classical political economy

and marxist theory dualism in the us economy economic crisis and agrarian economy in poor countries it explores themes such as the effect of an exogenous shock to wage share harrodian instability and steindlian solutions economics and politics of social democracy the role of power in the macroeconomy economic development through the promotion of domestic value chains and reflections on primitive accumulation going beyond the neo classical tradition the volume opens up a new vista of economics by discussing unexplored questions it provides a refreshing treatment of time tested ideas as well as discussions of recent developments and current research a major intervention in heterodox macroeconomics and a tribute to macroeconomist amit bhaduri this book will be useful to scholars and researchers of economics political economy development studies sociology political science public administration economic theory economic history economic geography and critical studies as well as professionals economists and policymakers

Labor Demand

2021-01-12

this volume examines the role of textiles within the expanding global economy in the age of european exploration major themes include the opening of new markets and responses to competition in the cloth trade evolving techniques and modes of production and changes in the patterns of consumption of local and imported cloth in a comparative cross cultural context

The Works of Orestes A. Brownson: Explanations and index

1887

in the post world war ii period students rebelled against the archaic university in student led movements they fought for the new kinds of public the university needed to serve women minorities immigrants indigenous people and more with a success that had a profound impact on the intellectual landscape of the twentieth century because of their efforts ethnic studies women s studies and american studies were born and minority communities have become more visible and important to academic debate less than fifty years since this pivotal shift in the academy however the university is fighting back in we demand roderick a ferguson shows how the university particularly the public university is moving away from the people in all their diversity as more resources are put toward stem education humanities and interdisciplinary programs are being cut and shuttered this has had a devastating effect on the pursuit of knowledge and on interdisciplinary programs born from the hard work and effort of an earlier generation this is not only a reactionary move against the social advances since the 60s and 70s but part of the larger threat of anti intellectualism in the united states

A Comfort Demands OCCUPY PHARMACY

2011-12-15

this book presents an end to end architecture for demand based data stream gathering processing and transmission the internet of things iot consists of billions of devices which form a cloud of network connected sensor nodes these sensor nodes supply a vast number of data streams with massive amounts of sensor data real time sensor data enables diverse applications including traffic aware navigation machine monitoring and home automation current stream processing pipelines are demand oblivious which means that they gather transmit and process as much data as possible in contrast a demand based processing pipeline uses requirement specifications of data consumers such as failure tolerances and latency limitations to save resources our solution unifies the way applications express their data demands i e their requirements with respect to their input streams this unification allows for multiplexing the data demands of all concurrently running applications on sensor nodes we schedule sensor reads based on the data demands of all applications which saves up to 87 in sensor reads and data transfers in our experiments with real world sensor data our demand based control layer optimizes the data acquisition from thousands of sensors we introduce time coherence as a fundamental data characteristic time coherence is the delay between the first and the last sensor read that contribute values to a tuple a large scale parameter exploration shows that our solution scales to large numbers of sensors and operates reliably under varying latency and coherence

constraints on stream analysis systems we tackle the problem of efficient window aggregation we contribute a general aggregation technique which adapts to four key workload characteristics stream dis order aggregation types window types and window measures our experiments show that our solution outperforms alternative solutions by an order of magnitude in throughput which prevents expensive system scale out we further derive data demands from visualization needs of applications and make these data demands available to streaming systems such as apache flink this enables streaming systems to pre process data with respect to changing visualization needs experiments show that our solution reliably prevents overloads when data rates increase

World Supply and Demand Prospects for Oilseeds and Oilseed Products in 1980

1961

this background paper to the state of food security and nutrition in the world 2023 analyses a key element of agrifood systems transformation the change of patterns in food supply and demand several studies have discussed this topic but the current one takes an innovative perspective of analysis considering these changes with a spatial perspective using the urban rural catchment areas urca approach to analyse changes in food expenditure across the rural urban continuum using living standards measurement studies lsms of 11 african countries the analysis is preceded by a literature review of agrifood value chains transformation stages drivers and current situation

focused in low and middle income countries lmics and is followed by a macro review of food supply around the world and a macro meso review of the supply of wheat and rice in two african countries the conclusions shows that most food is purchased in all households across the rural urban continuum even in rural areas breaking with the myth of rural subsistence farming in africa in addition the results show a diffusion of the consumption of processed foods including in a lesser extent highly processed foods all across the rural urban continuum and not only in rural areas from a food supply perspective the low global availability of foods that are part of a healthy diet as fruits vegetables and legumes nuts and seeds calls for increasing efforts for producing more nutritious foods in all countries of the world

House documents

1896

this book theoretically and empirically investigates the emergence of strong money demand in wartime japan 1937 1945 its disappearance after the end of the war 1945 1949 and the reemergence of strong money demand in contemporary japan from 1995 to the present in terms of the effects on fiscal activities and the price level an augmented fiscal monetary theory of the price level is constructed from a close examination of the strong money demand present in these periods then profoundly puzzling phenomena such as mild deflation despite monetary expansion low long term interest rates despite fiscal unsustainability and weak aggregate demand despite near zero rates of

interest all of which are actually being observed in contemporary japan can now be interpreted in line with the above augmented theory in the present strong money demand at near zero rates endows the japanese government with maximum fiscal flexibility however if it disappeared for some reason prices would surge to the quantity theory of money level and fiscal sustainability would have to be restored in the future alternative currency units issued by private banks might carry out a purge of such strong demand for the yen

Conflict, Demand and Economic Development

2020-11-26

this is the most comprehensive textbook available on the money demand function and its role in modern macroeconomics the book takes a microeconomic and aggregation theoretic approach to the topic and presents empirical evidence using state of the art econometric methodology while recognizing the existence of unsolved problems and the need for further developments the new edition is fully revised and includes new chapters

The Demand and Price Structure for Food Fats and Oils

1953

the structure and regulation of consumption and demand has recently become of great interest to sociologists and economists alike and at the same time there is growing interest in trying to understand the patterns and drivers of technological innovation this book newly available in paperback brings together a range of sociologists and economists to study the role of demand and consumption in the innovative process the book starts with a broad conceptual overview of ways that the sociological and economics literatures address issues of innovation demand and consumption it goes on to offer different approaches to the economics of demand and innovation through an evolutionary framework before reviewing how consumption fits into evolutionary models of economic development food consumption is then looked at as an example of innovation by demand including an examination of the dynamic nature of socially constituted consumption routines the book includes a number of illuminating case studies including an analysis of how black americans use consumption to express collective identity and a number of demand innovation relationships within matrices or chains of producers and users or other actors including service industries such as security and the environmental performance of companies the involvement of consumers in innovation is looked at including an analysis of how consumer needs may be incorporated in the design of high tech products the final chapter argues for the need to build an economic sociology of demand that goes from micro individual through to macro structural features this book is relevant to united nations sustainable development goal 9 industry innovation and infrastructure

Textiles: Production, Trade and Demand

2016-12-05

unsettles contemporary art s unspoken hierarchies and topples modernist and postmodernist assumptions about originality authenticity and authorship caa reviews in a metropolis in south china lies dafen an urban village that houses thousands of workers who paint van goghs da vincis warhols and other western masterpieces for the world market producing an astonishing five million paintings a year winnie wong infiltrated this world first investigating the work of conceptual artists then working as a dealer apprenticing as a painter surveying wholesalers and retailers in europe east asia and north america establishing relationships with local leaders and organizing a conceptual art exhibition for the shanghai world expo the result is van gogh on demand a fascinating book about a little known aspect of the global art world one that sheds surprising light on the workings of art artists and individual genius wong describes an art world in which migrant workers propaganda makers dealers and international artists make up a global supply chain of art she examines how berlin based conceptual artist christian jankowski who collaborated with dafen s painters to reimagine the dafen art museum unwittingly appropriated the work of a hong kong based photographer michael wolf she recounts how liu ding a beijing based conceptual artist asked dafen assembly line painters to perform at the guangzhou triennial styling himself into a dafen boss through such cases wong shows how dafen s painters force us to reexamine our preconceptions about the role of chinese

workers in redefining global art a fantastically detailed exploration of a topic which touches the heart of many of the issues surrounding china s economic rise south china morning post

Balancing the Demand Equation

2011-09

growth distribution and effective demand presents original essays on a variety of topics in theoretical and applied economics the book honors the work of edward j nell and develops interconnected themes that run through the modern post keynesian tradition the first part deals with the fundamental idea that economic growth is demand driven with special attention to policy ramifications the second theme concerns the connection between economic growth and the structural characteristics of a market economy these issues are closely linked to a critical tradition that calls into question key elements in orthodox economics the final part of the book aims to buttress non orthodox approaches to growth and distribution by critiquing particular aspects of the conventional theory by elaborating neglected themes in non orthodox theory or by exploring some overlooked methodological ideas

We Demand

2017-08-22

first published in 1987 this volume reviews and assesses the literature on the impact of the economic forces on the rate and direction of technical change areas covered include the economic of invention and innovation the evolution of thought and of empirical tests of induced innovation the evolution of thought and of the empirical tests of induced innovation the role of demand and supply in the diffusion of technical change specific attention is given to an emerging body of literature that attempts to integrate the process of invention diffusion and reinvention the review indicates that substantial progress has been made in modeling the process of technical change as endogenous to the economic system and in testing the induced innovation hypothesis against historical experience the book concludes by drawing implications for research and economic development policy and will provide graduate students and professional in economics agricultural economics development studies and geography and technology forecasting with a sound review of the literature of technical change

Demand-based Data Stream Gathering, Processing, and Transmission

2021-04-28

this book reviews and assesses the impact of economic forces on the rate and direction of technical change

Guiding Principles of Activity

1958

this introduction to the philosophy of jean luc nancy gives an overview of his philosophical thought to date and situates it within the broader context of contemporary french and european thinking the book examines nancy s philosophy in relation to five specific areas his account of subjectivity his understanding of space and spatiality his thinking about the body and embodiment his political thought and his contribution to contemporary aesthetics in each case it shows the way in which nancy develops or moves beyond some of the key concerns associated with phenomenology post structuralism and what could broadly be termed the post modern

Analysis of food demand and supply across the rural-urban continuum for selected countries in Africa

2023-12-15

first published in 1971 demand and supply is an introduction to the economics of resource allocation often known as micro economics ralph turvey examines how the economy really works and does not just give the economists textbook version which oversimplifies technology and exaggerates the importance of

prices in adjusting supply and demand instead of offering theoretical diagrams and imaginary examples he refrains from expounding those ideas that cannot be simply demonstrated or applied but he includes sections on retail margins urban land values and the value of time topics rarely dealt with in beginner s books some examples of the examples are university teachers pay cotton spinning costs pricing of tin cans demand for farm tractors newspaper economics competition in the bus industry this is the kind of economics used in practice and rests on down to earth fact finding this book will be useful for both general readers and a level and first year university students

Strong Money Demand in Financing War and Peace

2021-06-17

vols 4 24 include communications of the international federation of library associations ifla fiab

The Demand for Money

2007-06-08

this book provides an introduction to forecasting methods for renewable energy sources integrated with existing grid it consists of two sections the first one is on the generation side forecasting methods while the second section deals with the different ways of load forecasting it broadly includes

artificial intelligence machine learning hybrid techniques and other state of the art techniques for renewable energy and load predictions the book reflects the state of the art in distributed generation system and future microgrids and covers theory algorithms simulations and case studies it offers invaluable insights through this valuable resource to students and researchers working in the fields of renewable energy integration of renewable energy with existing grid and electrical distribution network

Innovation by Demand

2002

i wish professor rao and his collaborators every success in ensuring that future generations of students do not have to put up with logically incoherent foundations to their understanding of modern economic systems g c harcourt jesus college cambridge there is now an increasing realisation that the popular textbook macroeconomic model of aggregate demand and supply is logically incorrect while there is a broad agreement among the critiques on these logical flaws there has been no such agreement on how the basic textbook macromodel should be modified the essays in this volume contain very promising alternative models which will significantly influence the way macroeconomics will be taught in the future

Van Gogh on Demand

2014-03-24

this highly original thought provoking book written by a pioneer of communication studies is the first to analyze the post 9 11 world in terms of global media and popular culture written in an engaging and candid manner by a leading expert in this field argues that cross cultural understanding can only be achieved by harnessing the power of global media popular culture information technology and personal communications technologies examines the global trend of using film video music and tv on demand as the framework through which we experience all cultural activity draws inspiration from the work of a range of theorists from charles darwin to anthony giddens candidly interrogates the very latest developments in world affairs especially the roles of fundamentalist religious ideology media globalization and individualism whose complex relationships have yet to be explained by social scientists

Growth, Distribution and Effective Demand

2019-06-21

business consultants everywhere preach the benefits of innovation and promise to help businesses reap them a trendy industry this type of consulting generates courses workshops books and conferences that all claim to hold the

secrets of success but what promises does the notion of innovation entail what is it about the ideology and practice of business innovation that has made these firms so successful at selling their services to everyone from small start ups to fortune 500 companies and most important what does business innovation actually mean for work and our economy today in creativity on demand cultural anthropologist eitan wilf seeks to answer these questions by returning to the fundamental and pervasive expectation of continual innovation wilf focuses a keen eye on how our obsession with ceaseless innovation stems from the long standing value of acceleration in capitalist society based on ethnographic work with innovation consultants in the united states he reveals among other surprises how routine the culture of innovation actually is procedures and strategies are repeated in a formulaic way and imagination is harnessed as a new professional ethos not always to generate genuinely new thinking but to produce predictable signs of continual change a masterful look at the contradictions of our capitalist age creativity on demand is a model for the anthropological study of our cultures of work
