excerpt from an introduction to the new testament the limitations of this volume are imposed by the editor even the mere outline which alone is possible in the narrowly prescribed space might be made fairly complete if technical terminology abbreviation and the presuppositions admissible among experts were allowable but to be easy and readable in a tenth of the space required and at the same time convey a true impression is difficult one must watch and pray not to tell half truths nor can one even so be content merely to revamp for a different circle what is familiar to scholars in the great treatises i have not been deterred from presenting views which are peculiar to myself when these seemed best to set forth the results toward which critical science is tending by the consciousness that adequate presentation of my reasons is precluded scholars will recognise what is new if valuable they will adopt it if disapproved they will bring it into the arena of debate where opportunity will be given for completer discussion in the writings which name their authors independent study has led me to results more conservative than those of leading critics about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
