The Jihadi Next Door 2019-01-15

the recruitment of isis terrorists may have begun as an extremist crusade in iraq but it has quickly become a global phenomenon that is taking hold of people from diverse backgrounds cultures and belief systems the iconic image of a terrorist as an old angry middle eastern man is long gone it has since been replaced by young men and women of all races and religious upbringings in tactical gear and ski masks

carrying heavy artillery from the outside looking into the islamic state most people see these men and women as nothing more than evil terrorists with a psychotic penchant for violence internally they perceive themselves as freedom fighters or mujahedeen who violate the laws of men to protect their community according to the will of allah ultimately neither of these perceptions are based in reality while some experts claim that terrorist recruitment is completely random criminologist kimberly mehlman orozco has identified clear patterns which can be used to explain how regular people are being conscripted into terrorism using interviews with convicted terrorists in depth research and analysis of extremist propoganda and case specific details dr mehlman orozco provides nuanced theories into the methods of terrorist recruitment methods which can be used to identify persons at high risk of being targeted the jihadi next door provides unprecedented information that can be used to actually combat terrorism by laying bare the tactics used by isis to deceive and exploit new recruits and exposing the veneer these extremists operate under dr mehlman orozco hopes to empower readers with the knowledge needed to prevent future recruitment and thereby preventing acts of terrorism

The Partisan Next Door 2021-09-29

in the united states politics has become tribal and personalized the influence of partisan divisions has extended beyond the political realm into everyday life affecting relationships and workplaces as well as the ballot box to help explain this trend we examine the stereotypes americans have of ordinary democrats and republicans using data from surveys experiments and americans own words we explore the content of partisan stereotypes and find that they come in three main flavors parties as their own tribes coalitions of other tribes or

vehicles for political issues these different stereotypes influence partisan conflict people who hold trait based stereotypes tend to display the highest levels of polarization while holding issue based stereotypes decreases polarization this finding suggests that reducing partisan conflict does not require downplaying partisan divisions but shifting the focus to political priorities rather than identity a turn to what we call responsible partisanship
