## Free download The hidden curriculum of getting and keeping a job navigating the social landscape of employment a guide for individuals with autism spectrum and other social cognitive challenges [PDF]

this volume provides an in depth qualitative exploration of familial entrepreneurship as an innovative employment model being established by families in response to difficulties faced by individuals with developmental disabilities in entering the labor market drawing on rich qualitative data collected via research with families this volume explores how and why familial entrepreneurs in the united states have chosen to develop businesses to employ their loved ones chapters offer close analysis of the challenges and opportunities associated with familial entrepreneurship and highlight the ways in which this practice supports people with developmental disabilities by providing opportunities for skill development social interaction and participation in meaningful activity recognizing family entrepreneurship as a new and distinct hybrid employment model the text goes on to consider how curricula policy and state services might better support families and underpin this form of inclusive adult education the volume provides important conclusions that contribute to the fields of disability studies entrepreneurship inclusive education adult education exceptional student education transition and vocational rehabilitation it is a key reading for scholars in these fields and across education more widely most people with non verbal learning disorder nld or asperger syndrome as are underemployed this book sets out to change this with practical and technical advice on everything from job hunting to interview techniques from fitting in in the workplace to whether or not to disclose a diagnosis this book guides people with nld or as successfully through the employment mine field there is also information for employers agencies and careers counsellors on as and nld as invisible disabilities including an analysis of the typical strengths of somebody with nld or as and how to use these positively in the workplace practical information and lists of career resources are supported by numerous case studies to inspire and advise an essential resource for people with nld or as seeking or in employment and their existing or potential employers leading experts address such problems as identification of deafblindness planning and intervention development family support and education for parents and professionals who work with people who have been deafblind from birth or a very early age this book describes the signs and symptoms of a variety of psychiatric illnesses substance abuse disorders and developmental disabilities that may be encountered by first responders public safety officials and criminal justice professionals individual chapters describe specific categories of mental illnesses and provide basic skills to enhance interactions with people who have these disorders and who may be facing stressful situations with a foreword by robert a neimeyer phd where was this book when i was new as a counselor fortunately it is here now and with all the scope depth resourcefulness and balance required for such situations dr robert kastenbaum phd this book will now be an indispensable resource for anyone who wants to understand counsel or otherwise help individuals with life threatening illnesses and their family members charles a corr phd ct without question this is the book you ll want your own caregivers to have read should you ever contend with life threatening illness therese a rando phd bcets bcbt life threatening illness is not only a medical crisis it is a psychological social and spiritual crisis as well also serious illness affects not only the patient but the patient s family therefore the two major premises of this book are that care in life threatening illness must be holistic and it must be family centered doka presents an insightful comprehensive guide for counselors social workers and health care professionals as they assist clients experiencing a serious illness the book builds on a model developed by the author based upon earlier work by avery weisman and e m patterson doka s model presents illness as a series of phases prediagnostic individuals may decide how to handle troubling symptoms or to take certain diagnostic tests diagnostic centered on the existential crisis posed by the diagnosis chronic individuals must cope with the disease and treatment recovery acknowledges that even when individuals survive an encounter with life threatening illness there are still considerable issues that must be resolved terminal phase individuals deal with the inevitability of death in his discussion of each phase the author delineates specific tasks for patients to perform and the issues they must adapt to he also presents strategies for counselors and health care professionals to use with individuals in each phase of illness this book provides the reader with insightful and useful ways to provide psychotherapy treatment for individuals who have intellectual disability id it brings together all three modalities individual couple and group and a variety of theoretical models and techniques are discussed the first section individual therapy offers a variety of approaches and techniques including dialectical behavioral therapy positive psychology mindfulness based practice and relaxation framing also included in this section are chapters on specialty populations including victims of abuse people who have autism spectrum disorder and people in mourning the second section is a chapter on group therapy addressing trauma issues the third section is on family and couple therapy the fourth section covers chapters on research ethics and training the individual authors are respected authorities in the field of providing psychotherapy treatment for persons with id and all have contributed to the professional literature this book is a major contribution to the effort to make psychotherapy available to individuals who have id and should serve to further stimulate interest in the provision of psychotherapy treatment for individuals who have id co occurring with significant mental health problems book jacket identifies and describes specific government assistance opportunities such as loans grants counseling and procurement contracts available under many agencies and programs an exciting new approach to caring for individuals with intellectual disabilities this book provides a new theoretical perspective on treatment along with a variety of innovative tools it rejects reducing adults with managerial economics and business

intellectual disabilities to a mere compilation of their behaviors and instead nurtures each individual s sense of identity allowing psychologists social workers and therapists to utilize the tools presented to enhance the effectiveness of the treatment they currently provide this handbook promotes well being on every level having a mental illness can have its challenges it can create problems for an individual in many ways this book is meant to be a brief guide to helping you reach your full potential or helping your loved one reach their full potential despite having a mental illness in this book you ll find information about the stages of healing from a mental illness strengths that can be helpful for an individual with a mental illness and tips for helping loved ones who have a mental illness while many of the books on the market focus on the symptoms of individuals with mental illness this book is intended to point out possible strengths and help you or assist your loved one in maximizing individual potential despite a mental illness living with a mental illness or loving someone with a mental illness can be difficult but this book will help you in rising to the challenge of living a happy healthy life individuals who have a mental illness can not only survive but thrive providing innovative effective ways to address the problems faced by individuals with intellectual disability and behavioral psychiatric problems who live in rural areas this book describes both the problems faced and the solutions that have been and are being developed to solve them although these techniques and solutions have been developed for problems occurring in rural areas they are universal enough to be readily transferable to more urban settings this book looks at how therapies involving animals can be used to help individuals with autism to develop skills and improve quality of life pavlides relates the success stories of different animal assisted interventions she emphasizes the importance of tailoring interventions to the specific needs of the individual and monitoring progress the caps which originated and was published by shawn henry and brenda smith myles is a tool to help teachers and educational teams to plan and implement a student s program across the school this includes planning for the implementation of the iep and the curriculum relevant to the student it takes the team through the process of planning out the goals objectives to be targeted in each activity of the day the modifications and accommodations that should be provided to support the student in each activity the sensory supports to help the student stay engaged and the communication and social supports that the student needs to be successful in addition it identifies the type of data that should be collected for each area and the reinforcers that have been chosen for use for success as with many tools while this system was developed for use with individuals on the autism spectrum it can be an essential tool for any student regardless of the types of supports and needs they have there are various forms of this system that focus on targeting specific skills for each activity and identifying the communication sensory and reinforcement supports that will be needed for each situation the book presents approaches to nurturing communicative abilities in people with a communication impairment it looks at a range of approaches including intensive interaction co creative communication sensory integration and music therapy for people with a wide range of impairments including autism and dementia when children and adults apply for disability benefits and claim that a visual impairment has limited their ability to function the u s social security administration ssa is required to determine their eligibility to ensure that these determinations are made fairly and consistently ssa has developed criteria for eligibility and a process for assessing each claimant against the criteria visual impairments determining eligibility for social security benefits examines ssa s methods of determining disability for people with visual impairments recommends changes that could be made now to improve the process and the outcomes and identifies research needed to develop improved methods for the future the report assesses tests of visual function including visual acuity and visual fields whether visual impairments could be measured directly through visual task performance or other means of assessing disability these other means include job analysis databases which include information on the importance of vision to job tasks or skills and measures of health related quality of life which take a person centered approach to assessing visual function testing of infants and children which differs in important ways from standard adult tests just as autism is a continuum of disorders it is associated with a broad range of neurodevelopmental social and communication deficits for individuals with autism spectrum disorders asd augmentative and alternative communication aac has a major impact on their daily lives often reducing the occurrence of challenging behaviors aided augmentative communication for individuals with autism spectrum disorders is a practical guide to the field offering readers a solid grounding in asd related complex communication needs ccn and aac especially visual and computer based technologies widely used interventions and tools in aac are reviewed not just how they work but why they work to aid practitioners in choosing those most suited to individual clients or students issues in evaluation for aided aac and debates concerning its usability round out the coverage readers come away with a deeper understanding of the centrality of communication for clients with asd and the many possibilities for intervention key areas of coverage include aac and assessment of people with asd and ccn interdisciplinary issues and collaboration in assessment and treatment aac intervention mediated by natural communication partners functional communication training with aac the controversy surrounding facilitated communication sign language versus aac aided augmentative communication for individuals with autism spectrum disorders is an essential resource for clinicians practitioners researchers and graduate students in such fields as child and school psychology speech pathology language education developmental psychology behavior therapy and educational technology this handbook offers a comprehensive review of intellectual disabilities id it examines historical perspectives and foundational principles in the field the handbook addresses philosophy of care for individuals
