this book presents a perspective of network analysis as a tool to find and quantify significant structures in the interaction patterns between different types of entities moreover network analysis provides the basic means to relate these structures to properties of the entities it has proven itself to be useful for the analysis of biological and social networks but also for networks describing complex systems in economy psychology geography and various other fields today network analysis packages in the open source platform r and other open source software projects enable scientists from all fields to quickly apply network analytic methods to their data sets altogether these applications offer such a wealth of network analytic methods that it can be overwhelming for someone just entering this field this book provides a road map through this jungle of network analytic methods offers advice on how to pick the best method for a given network analytic project and how to avoid common pitfalls it introduces the methods which are most often used to analyze complex networks e g different global network measures types of random graph models centrality indices and networks motifs in addition to introducing these methods the central focus is on network analysis literacy the competence to decide when to use which of these methods for which type of question furthermore the book intends to increase the reader s competence to read original literature on network analysis by providing a glossary and intensive translation of formal notation and mathematical symbols in everyday speech different aspects of network analysis literacy understanding formal definitions programming tasks or the analysis of structural measures and their interpretation are deepened in various exercises with provided solutions this text is an excellent if not the best starting point for all scientists who want to harness the power of network analysis for their field of expertise

this book establishes an argument for deeper attention to the aesthetic qualities of literature to the question of the relation between the aesthetic and more immediate practical and urgent social and political matters it attempts to establish the intrinsic value of the aesthetic at the same time as it demonstrates that focus on the aesthetic does not preclude attention of the urgent questions with which works of art consistently engaged it argues that attention to the aesthetic does not diminish attention to these larger issues but in effect increases the power both of art and criticism to engage them fruitfully
