crisis more severe than any since the great depression as banks collapsed and the state scrambled to organize one of the largest transfers of wealth in history many including economists and financial experts were shocked by the speed at which events unfolded in this new book john bellamy foster and fred magdoff offer a bold analysis of the financial meltdown how it developed and the implications for the future they examine the specifics of the housing bubble and the credit crunch as well as situate current events within a broader crisis of monopoly finance capitalism one that has been gestating for several decades it is the real productive economy s tendency toward stagnation they argue that creates a need for capital to find ways to profitably invest its surplus but rather than invest in socially useful projects that would benefit the vast majority capital has constructed a financialized casino economy that neglects social needs and as has become increasingly clear is fatally unstable written over a two year period immediately prior to the onset of the crisis this timely and illuminating book is necessary reading for all those who wish to understand the current situation how we got here and where we are heading

the economic crisis has created a host of problems for working people collapsing wages lost jobs ruined pensions and the anxiety that comes with not knowing what tomorrow will bring compounding all this is a lack of reliable information that speaks to the realities of workers commentators and pundits seem more confused than anyone and economists the so called experts still cling to bankrupt ideologies that failed to predict the crisis and offer nothing to explain it in this short clear and concise book fred magdoff and michael d yates explain the nature of the economic crisis contrary to conventional wisdom the authors demonstrate that this crisis is not some aberration from a normally benign capitalism but rather the normal and even expected
