Web Mining

2005-01-01

mining is moving the world wide toward a more useful environment in which users can quickly and easily find the information they need mining uses document content hyperlink structure and usage statistics to assist users in meeting their needed information this book provides a record of current research and practical applications in searching it includes techniques that will improve the utilization of the by the design of sites as well as the design and application of search agents this book presents research and related applications in a manner that encourages additional work toward improving the reduction of information overflow which is so common today in search results

Mining the World Wide Web

2012-12-06

mining the world wide an information search approach explores the concepts and techniques of mining a promising and rapidly growing field of computer science research mining is a multidisciplinary field drawing on such areas as artificial intelligence databases data mining data warehousing data visualization information retrieval machine learning markup languages pattern recognition statistics and technology mining the world wide presents the mining material from an information search perspective focusing on issues relating to the efficiency feasibility scalability and usability of searching techniques for mining mining the world wide is designed for researchers and developers of information systems and also serves as an excellent supplemental reference to advanced level courses in data mining databases and information retrieval

Web Data Mining

2013-08-03

mining aims to discover useful information and knowledge from hyperlinks page contents and usage data although mining uses many conventional data mining techniques it is not purely an application of traditional data mining due to the semi structured and unstructured nature of the data the field has also developed many of its own algorithms and techniques liu has written a comprehensive text on mining which consists of two parts the first part covers the data mining and machine learning foundations where all the essential concepts and algorithms of data mining and machine learning are presented the second part covers the key topics of mining where crawling search social network analysis structured data extraction information integration opinion mining and sentiment analysis usage mining query log mining computational advertising and recommender systems are all treated both in breadth and in depth his book thus brings all the related concepts and algorithms together to form an authoritative and coherent text the book offers a rich blend of theory and practice it is suitable for students researchers and practitioners interested in mining and data mining both as a learning text and as a reference book professors can readily use it for classes on data mining mining and text mining additional teaching materials such as lecture slides datasets and implemented algorithms are available online

Web Mining: From Web to Semantic Web

2011-04-05

in the last years research on mining has reached maturity and has broadened in scope two different but interrelated research threads have emerged based on the dual nature of the the is a practically in nite collection of documents the acquisition and ploitation of information from these documents asks for intelligent techniques for information categorization extraction and search as well as for adaptivity to the interests and background of the organization or person that looks for information the is a venue for doing business electronically it is a venue for interaction information acquisition and service exploitation used by public authorities n governmental organizations communities of interest and private persons when observed as a venue for the achievement of business goals a presence should be aligned to the objectives of its owner and the requirements of its users this raises the demand for understandingusage combining it with other sources of knowledge inside an organization and deriving lines of action thebirthofthesemanticwebatthebeginningofthedecadeledtoacoercionofthetwo threadsintwoaspects i theextractionofsemanticsfromthewebtobuildthesemantic and ii theexploitationofthesesemanticstobettersupportinformationacquisition and to enhance the interaction for business and non business purposes semantic mining encompasses both aspects from the viewpoint of knowledge discovery

Web Mining Applications in E-Commerce and E-Services

2009-01-24

mining has become a popular area of research integrating the different research areas of data mining and the world wide according to the taxonomy of mining there are three sub fields of mining research usage mining content mining and structure mining these three research fields cover most content and activities on the with the rapid growth of the world wide mining has become a hot topic and is now part of the mainstream of search such as information systems and intelligence among all of the possible applications in research e commerce and e services have been iden fied as important domains for mining techniques mining techniques also play an important role in e commerce and e services proving to be useful tools for understanding how e commerce and e service sites and services are used e bling the provision of better services for customers and users thus this book will focus upon mining applications in e commerce and e services some chapters in this book are extended from the papers that presented in wmee 2008 the 2nd international workshop for e commerce and e services in addition we also sent invitations to researchers that are famous in this research area to contr ute for this book the chapters of this book are introduced as follows in chapter 1 peter i

Web Mining and Social Networking

2010-10-20

this book examines the techniques and applications involved in the mining personalization and recommendation and community analysis domains including a detailed presentation of the principles developed algorithms and systems of the research in these areas the applications of web mining and the issue of how to incorporate web mining into web personalization and recommendation systems are also reviewed additionally the volume explores web community mining and analysis to find the structural organizational and temporal developments of web communities and reveal the societal sense of individuals or communities the volume will benefit both academic and industry communities interested in the techniques and applications of web search web data management web mining and web knowledge discovery as well as web community and social network analysis

Advanced Practical Approaches to Web Mining Techniques and Application

2022-03-18

the rapid increase of web pages has introduced new challenges for many organizations as they attempt to extract information from a massive corpus of web pages finding relevant information eliminating irregular content and retrieving accurate results has become extremely difficult in today s world where there is a surplus of information available it is crucial to further understand and study web mining in order to discover the best ways to connect users with appropriate information in a timely manner advanced practical approaches to mining techniques and application aims to illustrate all the concepts of web mining and fosters transformative multidisciplinary and novel approaches that introduce the practical method of analyzing various web data sources and extracting knowledge by taking into consideration the unique challenges present in the environment covering a range of topics such as data science and security threats this reference work is ideal for industry professionals researchers academicians practitioners scholars instructors and students

Handbook of Research on Text and Web Mining Technologies

2008-09-30

examines recent advances and surveys of applications in text and web mining which should be of interest to researchers and end users alike

Web Mining

2022-09-01

mining is the application of data mining strategies to excerpt learning from web information i e web content web structure and web usage data with the emergence of the web as the predominant and converging platform for communication business and scholastic information dissemination especially in the last five years there are ever increasing research groups working on different aspects of web mining mainly in three directions these are mining of web content web structure and web usage in this context there are good number of frameworks and benchmarks related to the metrics of the websites which is certainly weighty for b2b b2c and in general in any e commerce paradigm owing to the popularity of this topic there are few books in the market dealing more on such performance metrics and other related issues this book however omits all such routine topics and lays more emphasis on the classification and clustering aspects of the websites in order to come out with the true perception of the websites in light of its usability in nutshell mining a synergic approach resorting to classifications and clustering showcases an effective methodology for classification and clustering of web sites from their usability point of view while the clustering and classification is accomplished by using an open source tool weka the basic dataset for the selected websites has been emanated by using a free tool site analyzer as a case study several commercial websites have been analyzed the

dataset preparation using site analyzer and classification through weka by embedding different algorithms is one of the unique selling points of this book this text projects a complete spectrum of web mining from its very inception through data mining and takes the reader up to the application level salient features of the book include literature review of research work in the area of web miningbusiness websites domain researched and data collected using site analyzer toolaccessibility design text multimedia and networking are assesseddatasets are filtered further by selecting vital attributes which are search engine optimized for processing using the weka attributed tooldataset with labels have been classified using j48 rbfnetwork naïvebayes and smo techniques using wekaa comparative analysis of all classifiers is reportedcommercial applications for improving website performance based on seo is given

Advances in Web Mining and Web Usage Analysis

2007-12-07

mining and usage is a fast moving and hugely important field of study this new springer text constitutes the thoroughly refereed post proceedings of the 8th international workshop on mining data webkdd 2006 held in philadelphia usa in 2006 the 13 revised full papers presented together with a detailed preface went through two rounds of reviewing and improvement and were carefully selected for inclusion in the book they cover a huge range of relevant topics

2012-06-01

mining has become a popular area of research integrating the different research areas of data mining and the world wide according to the taxonomy of mining there are three sub fields of mining research usage mining content mining and structure mining these three research fields cover most content and activities on the with the rapid growth of the world wide mining has become a hot topic and is now part of the mainstream of search such as information systems and intelligence among all of the possible applications in research e commerce and e services have been iden fied as important domains for mining techniques mining techniques also play an important role in e commerce and e services proving to be useful tools for understanding how e commerce and e service sites and services are used e bling the provision of better services for customers and users thus this book will focus upon mining applications in e commerce and e services some chapters in this book are extended from the papers that presented in wmee 2008 the 2nd international workshop for e commerce and e services in addition we also sent invitations to researchers that are famous in this research area to contr ute for this book the chapters of this book are introduced as follows in chapter 1 peter i

Web Mining Applications in E-Commerce and E-Services

2009-08-29

thisyear svolumeofadvancesinwebminingandwebusageanalysiscontains thepostworkshopproceedingsofajointevent the9thinternationalworkshopon knowledge discovery from the webkdd 2007 and the first sna kdd workshop on social network analysis sna kdd 2007 the joint workshop on mining and social network analysis took place at the acm sigkdd international conference on knowledge discovery and data mining kdd it attracted 23 submissions of which 14 were accepted for presentation at the workshop eight of them have been extended for inclusion in this volume webkdd is one of the most traditional workshops of the acm sigkdd internationalconference under the auspices of which it has been organizedsince 1999 the strong interest for knowledge discovery in the fostered not least by webkdd itself has led to solutions for many problems in the s p mature era in the meanwhile the has stepped into a new era where it is experienced as a social medium fostering interaction among people enabling and promoting the sharing of knowledge experiences and applications char terized by group activities community formation and evolution the design of 2 0 re ects the socialcharacterof the bringing new potential and new challenges the 9th webkdd was devoted to the challenges and opportunities of mining for the social and promptly gave rise to the joint event with the first workshop on social network analysis sna kdd social network research has advanced signi cantly in the last few years strongly motivated by the prevalence of online social websites and a variety of large scale o ine social network systems

Advances in Web Mining and Web Usage Analysis

2009-02-17

the past ten years have seen a rapid growth in the numbers of people signing up to use based social networks hundreds of millions of new members are now joining the main services each year with a large amount of content being shared on these networks tens of billions of content items are shared each month with this growth in usage and data being generated there are many opportunities to discover the knowledge that is often inherent but somewhat hidden in these networks mining techniques are being used to derive this hidden knowledge in addition the semantic including the linked data initiative to connect previously disconnected datasets is making it possible to connect data from across various social spaces through common representations and agreed upon terms for people content items etc in this book we detail some current research being carried out to semantically represent the implicit and explicit structures on the social along with the techniques being used to elicit relevant knowledge from these structures and we present the mechanisms that can be used to intelligently mesh these semantic representations with intelligent knowledge discovery processes we begin this book with an overview of the origins of the and then show how web intelligence can be derived from a combination of web and social mining we give an overview of the social and semantic webs followed by a description of the combined social semantic along with some of the possibilities it affords and the various semantic representation formats for the data created in social networks and on social media sites provenance and provenance mining is an important aspect here especially when data is combined from multiple services we will expand on the subject of provenance and especially its importance in relation to social data we will describe extensions to social semantic vocabularies specifically designed for community mining purposes siocm in the last three chapters we describe how the combination of web intelligence and social semantic data can be used to derive knowledge from the social starting at the community level macro and then moving through group mining meso to user profile mining micro table of contents acknowledgments grant aid introduction and the mining the social the semantic the social semantic social semantic mining social semantic mining of communities social semantic mining of groups social semantic mining of users conclusions bibliography authors biographies

Web Mining

2014-01-15

this book constitutes the refereed proceedings of the workshop on mining webmine 2006 held in berlin germany september 2006 topics included are data mining based on analysis of bloggers and tagging web mining xml mining and further techniques of knowledge discovery the book is especially valuable for those interested in the aspects of 2 0 and its inherent dynamic and diversity of user generated content

Social Semantic Web Mining

2015-01-01

this book is a comprehensive reference on concepts algorithms theories applications software and visualization of data mining text mining mining and computing supercomputing covering state of the art of the theory and applications of mining

From Web to Social Web: Discovering and Deploying User and Content Profiles

2007-09-17

this book constitutes the thoroughly refereed post proceedings of the 7th international workshop on mining data webkdd 2005 held in chicago il usa in august 2005 in conjunction with the 11th acm sigkdd international conference on knowledge discovery and data mining kdd 2005 the nine revised full papers presented together with a detailed preface went through two rounds of reviewing and improvement and were carefully selected for inclusion in the book

Visual Analytics and Interactive Technologies: Data, Text and Web Mining Applications

2010-10-31

usage mining is defined as the application of data mining technologies to online usage patterns as a way to better understand and serve the needs of web based applications because the internet has become a central component in information sharing and commerce having the ability to analyze user behavior on the web has become a critical component to a variety of industries usage mining techniques and applications across industries addresses the systems and methodologies that enable organizations to predict web user behavior as a way to support website design and personalization of web based services and commerce featuring perspectives from a variety of sectors this publication is designed for use by it specialists business professionals researchers and graduate level students interested in learning more about the latest concepts related to web based information retrieval and mining

Advances in Web Mining and Web Usage Analysis

2006-10-20

the explosion of based data has created a demand among executives and technologists for methods to identify gather analyze and utilize data that may be of value to corporations and organizations the emergence of data mining and the larger field of mining has businesses lost within a confusing maze of mechanisms and strategies for obta

Web Usage Mining Techniques and Applications Across Industries

2016-08-12

this book covers a wide spectrum of indispensable web mining techniques and presents a detailed discussion of the entire process the text addresses those who wish to discover the latest developments concerns and solutions within the field of mining offering a coherent and reader friendly description of the web mining process it explains problems and provides novel solutions in web user simulation biologically inspired algorithms objects and user provided semantics its coverage enhances readers knowledge of the field and provide a solid foundation for further study

Web Data Mining and Applications in Business Intelligence and Counter-Terrorism

2003-06-26

this book constitutes the thoroughly refereed post proceedings of the 6th international workshop on mining data webkdd 2004 held in seattle wa usa in august 2004 in conjunction with the 10th acm sigkdd international conference on knowledge discovery and data mining kdd 2004 the 11 revised full papers presented together with a detailed preface went through two rounds of reviewing and improvement and were carefully selected for inclusion in the book

Advanced Techniques of Web Mining

2015-07-13

the definitive book on mining the from the preeminent authority

Advances in Web Mining and Web Usage Analysis

2006-10-17

information engineering management has found applications in many areas including environmental conservation economic planning resource integration cartography urban planning risk assessment pollution control and transport management systems technology plays an active role in the relationship of data mining to environmental conservation planning bringing together papers presented at the eighth international conference on data text and mining and their business applications this book addresses the new developments in this important field featured topics include text mining content structures and usage mining clustering technologies categorisation methods link analysis data preparation applications in business industry and government applications in science engineering national security customer relationship management competitive intelligence mining environment and geospatial data business process management bpm enterprise

information systems applications of gis and gps applications of mis remote sensing information systems strategies and methodologies and bio informatics

Mining the Web

2002-10-09

this book introduces the reader to methods of data mining on the web including uncovering patterns in web content classification clustering language processing structure graphs hubs metrics and usage modeling sequence analysis performance

Data Mining VIII

2007

this introductory book for text and web mining utilizes only open source tools to illustrate and teach unique use case applications each use case consists of a fully implemented application based on a real text web mining example data and clear instructions to implement the use case are provided in each chapter readers will investigate at least ten different tools such as r rapidminer knime natural language toolkit open nlp gate gephi and manyeyes to learn text visualization and novel techniques

Web Mining

2004

this book originates from the first european mining forum ewmf 2003 held in cavtat dubrovnik croatia in september 2003 in association with ecml pkdd 2003 the mining forum initiative is motivated by the insight that knowledge discovery on the from the viewpoint of hyperarchive analysis and from the viewpoint of interaction among persons and institutions are complementary both for the conventional and for the semantic this book presents an introductory roadmap paper four invited papers and six workshop papers which were carefully selected during two rounds of reviewing and improvement among the topics addressed are usage mining mining for the addition of semantics semantically enhanced filtering ontologies wrapper induction personalization user profiling user session evaluation and evolution of usage patterns

Data Mining the Web

2007-04-06

this volume contains articles accepted for presentation during the intel ligent information processing and mining conference iis iipwm 04 which was held in zakopane poland on may 17 20 2004 this conference is a continuation of a series of 13 successful symposia and conferrences on intel ligent information systems organized by the institute of computer science of polish academy of sciences devoted to new trends in broadly understood artificial intelligence the idea of organizing such meetings dates back to 1992 our main in tention guided the first rather small audience workshop in the series was to resume the results gained in polish scientific

centers as well as contrast them with the research performed by polish scientists working at the universities in europe and usa and their foreign collaborators this idea proved to be attractive enough that we decided to continue such meetings as the years went by the workshops has transformed into regular symposia devoted to such fields like machine learning knowledge discovery natural language processing knowledge based systems and reasoning and soft computing i e fuzzy and rough sets bayesian networks neural networks and evo lutionary algorithms at present about 50 papers prepared by researches from poland and other countries are usually presented this year conference devotes much more attention to the newest devel opments in the area of artificial intelligence related to broadly understood mining

Text Mining, Web Mining, and Visualization Use Cases Using Open Source Tools

2015-12-15

this volume contains selected papers presented at the international conference on intelligent information processing and mining conference iis iipwm 06 organized in ustro poland 2006 the submitted papers cover new computing paradigms among others in biologically motivated methods advanced data analysis new machine learning paradigms natural language processing new optimization technologies applied data mining using statistical and non standard approaches

Web Mining: From Web to Semantic Web

2004-09-23

a collection of articles accepted for presentation during the intelligent information processing and mining conference iis iipwm 03 held in zakopane poland on june 2 5 2003 a lot of attention is devoted to the newest developments in the area of artificial intelligence with special calls for contributions on artificial immune systems and search engines this book will be a valuable source for further research in the fields of data mining intelligent information processing immunogenetics machine learning or language processing for search engines

Intelligent Information Processing and Web Mining

2013-06-05

the development of e learning systems particularly web based education systems has increased exponentially in recent years following this line one of the most promising areas is the application of knowledge extraction as one of the first of its kind this book presents an introduction to e learning systems data mining concepts and the interaction between both areas

Intelligent Information Processing and Web Mining

2007-07-04

the university of arizona artificial intelligence lab ai lab dark project is a long term scientific research program that aims to study and understand the international terrorism jihadist phenomena via a computational data centric approach we aim to collect all web content generated by international terrorist groups including web

sites forums chat rooms blogs social networking sites videos virtual world etc we have developed various multilingual data mining text mining and web mining techniques to perform link analysis content analysis web metrics technical sophistication analysis sentiment analysis authorship analysis and video analysis in our research the approaches and methods developed in this project contribute to advancing the field of intelligence and security informatics isi such advances will help related stakeholders to perform terrorism research and facilitate international security and peace this monograph aims to provide an overview of the dark landscape suggest a systematic computational approach to understanding the problems and illustrate with selected techniques methods and case studies developed by the university of arizona ai lab dark team members this work aims to provide an interdisciplinary and understandable monograph about dark research along three dimensions methodological issues in dark research database and computational techniques to support information collection and data mining and legal social privacy and data confidentiality challenges and approaches it will bring useful knowledge to scientists security professionals counterterrorism experts and policy makers the monograph can also serve as a reference material or textbook in graduate level courses related to information security information policy information assurance information systems terrorism and public policy

Intelligent Information Processing and Web Mining

2013-06-05

for the intelligent organization the prototypical enterprise of the 21st century the internet has become a highly relevant information sphere the facilitates the acquisition of information about the actors in a company s environment on top of that the rise of the social online collaboration and collective intelligence transformed the itself into an important instance of the business environment equally bringing along opportunities and threats for the conduct of business in order to systematically generate knowledge from the informational richness of the companies require efficient technologies for the retrieval analysis and processing of content as an interdisciplinary field of research merging data mining information retrieval and natural language processing mining can be seen as a toolset for the automated generation of information from content how and for which purposes a company can apply mining will be investigated in the course of this work a comprising collection of use cases covering a wide variety of business functions will illustrate which benefits mining can provide

Web and data mining

2009

this book presents a specific and unified approach framework to three major components search engines performance link analysis and user s behavior the book can be used by researchers in the fields of information sciences engineering especially software computer science statistics and management who are looking for a unified theoretical approach to finding relevant information on the www and a way of interpreting it from a data perspective to a user perspective
