experience in assisting students to acquire a clear view of the history of the development of the irish people its only claim to originality is with regard to the manner of presentation the method of arrangement and the general treatment it endeavours to unfold the story of a never ceasing movement of living forces in which remote causes produce ultimate results rather than to present a series of unconnected historical sketches the study of our history is regarded as one of dynamics and not of statics about the publisher forgotten books publishes hundreds of thousands of rare and classic books teaching history i have been convinced of the desirability of making certain fundamental facts absolutely clear and familiar an acquaintance with the physical and political geography of a country makes the events of its history seem real and natural a knowledge of the race elements of a people gives the strongest impression of the continuity of its history a study of the early political and ecclesiastical organization of a nation makes comprehensible later changes i have therefore striven in the first place to give a full and clear description of early institutions and conditions secondly i have tried to select from the mass of historical detail what was significant rather than what was merely conspicuous what either gave shape and character to a considerable period of history or was a clearly marked step in the general development of the nation detached episodes and merely striking occurrences especially those in the field of military history have been hastened over in order that more attention might be given to the really great movements and influential men thirdly i have clung pretty closely to the thread of english history only introducing mention of other countries when their connection with england was especially close since england s story is so long and so eventful i have felt that it had better here be told as simply clearly and continuously as possible for its own sake rather than to complicate it by including many facts drawn from the history of other countries about the publisher forgotten books publishes hundreds of thousands of rare and the reigns of frederick the great and of william i were of supreme importance to europe and as was not the case with louis xiv and napoleon their acquisitions were of a permanent character all in all it has seemed to me that i could engage in no more thankful occupation than in writing the history of germany the more so as german treatments of the subject presuppose more knowledge than is usually to be found in the american reader and as no other american writer has ever attempted the task the work of lewis founded on an antiquated german text book does not fulfil the most modest demands about
