The English Settlements 1989 the dark ages of english history between the collapse of roman rule in the early fifth century and the emergence of the anglo saxon kingdoms in the seventh century are examined in this study which draws attention to political and social factors linking roman britain to anglo saxon england

The English Settlements 1956 a history of english history from the roman to anglo saxon period

Roman Britain and the English Settlements 1936 volume i of the oxford history of the british empire explores the origins of empire it shows how and why england and later britain became involved with transoceanic navigation trade and settlement during the sixteenth and seventeenth centuries as late as 1630 involvement with regions beyond the traditional confines of europe was still tentative by 1690 it had become a firm commitment the origins of empire explains how commercial and eventually territorial expansion brought about fundamental change not only in the parts of america africa and asia that came under british influence but also in domestic society and in britain s relations with other european powers the chapters by leading historians both illustrate the interconnections between developments in europe and overseas and offer specialist studies on every part of the world that was substantially affected by british colonial activity their analysis also focuses on the ethical issues that were presented by the encounter with peoples previously unknown to europeans and on the ways in which the colonists struggled to justify their conduct and activities series blurb the oxford history of the british empire is a major new assessment of the empire in the light of recent scholarship and the progressive opening of historical records from the founding of colonies in north america and the west indies in the seventeenth century to the reversion of hong kong to china at the end of the twentieth british imperialism was a catalyst for far reaching change the oxford history of the british empire as a comprehensive study allows us to understand the end of empire in relation to its beginnings the meaning of british imperialism for the ruled as well as the rulers and the significance of the british empire as a theme in world history

The Oxford history of England 1975 the oxford history of britain tells the story of britain and her peoples over two thousand years from the coming of the roman legions to the present day edited by the distinguished historian kenneth o morgan this acclaimed history has been updated again for this revised edition

Roman Britain and the English Settlements 1941 the first major synthesis of the evidence for anglo saxon settlements from across england and throughout the anglo saxon period and a study of what it reveals about the communities who built and lived in them

The Oxford History of the British Empire: Volume I: The Origins of Empire 2001-07-26 the oxford history of the british empire is a major new assessment of the empire in the light of recent scholarship and the progressive opening of historical records from the founding of colonies in north america and the west indies in the seventeenth century to the reversion of hong kong to china at the end of the twentieth british imperialism was a catalyst for far reaching change the oxford history of the british empire as a comprehensive study helps us to understand the end of empire in relation to its beginning the meaning of british imperialism for the ruled as well as for the rulers and the significance of the british empire as a theme in world history volume iii of the oxford history of the british empire covers the long nineteenth century from the achievement of american independence in the 1780s to the eve of world war in 1914 this was the period of britain s greatest expansion as both empire builder and dominant world power the volume is divided into two parts the first contains thematic chapters some focusing on britain others on areas at the imperial periphery exploring those fundamental dynamics of british expansion which made imperial influence and rule possible they also examine the economic cultural and institutional frameworks which gave shape to britain s overseas empire part 2 is devoted to the principal areas of imperial activity overseas including both white settler and tropical colonies chapters examine how british interests and imperial rule shaped individual regions nineteenth century political and socio economic history themes dealt with include the economics of empire imperial institutions defence technology imperial and colonial cultures science and exploration attention is given not only to the formal empire from australasia and the west indies to india and the african colonies but also to china and latin america often regarded as central components of a british informal empire

The Oxford History of Britain 2001 volume ii of the oxford history of the british empire examines the history of british worldwide expansion from the glorious revolution of 1689 to the end of the napoleonic wars a crucial phase in the creation of the modern british empire this is the age of general wolfe clive of india and captain cook an international team of experts deploy the latest scholarly research to trace and analyze development and expansion over more than a century they show how trade warfare and migration created an empire at first overwhelmingly in the americas but later increasingly in asia although the empire was ruptured by the american revolution it survived and grew into the british empire that was to dominate the world during the nineteenth and early twentieth centuries series blurb the oxford history of the british empire is a major new assessment of the empire in the light of recent scholarship and the progressive opening of historical records from the founding of colonies in north america and the west indies in the seventeenth century to the reversion of hong kong to china at the end of the twentieth british imperialism was a catalyst for far reaching change the oxford history of the british empire as a comprehensive study allows us to understand the end of empire in relation to its beginnings the meaning of british imperialism for the ruled as well as the rulers and the significance of the british empire as a theme in world history

Settlement of the American West 1971-01-01 vol 3

The Colonial Period of American History 1954 today new york stands as the capital of american culture business and cosmopolitanism its size influence and multicultural composition mark it as a corner stone of our country the rich and varied history of early new york would seem to present a fertile topic for investigation to those interested colonial america yet there has never been a modern history of old new york until this lively and detailed account by michael kammen gracefully written and comprehensive in scope colonial new york includes all of the political social economic cultural and religious aspects of new york s formative centuries social and ethnic diversity have always been characteristic of new york and this was never so evident as in its early years this period provides the contemporary reader with a backward glance at what the united states would become in the twentieth century colonial new york stood as a precursor of american society and culture as a whole a broad model of the american experience we witness today kammen s history is enlivened by a look at some of the larger than life personalities who had tremendous impact on the many social and political adjustments necessary to the colony s continued growth here we meet peter

stuyvesant director of new netherland and an executive of the west india company a man facing the innumerable difficulties of governing a large sprawling colony divided by dutch english and indian settlements ultimately history would view him as a failure but his strong calvinist approach left such an indelible stamp on the burgeoning colony that readers will be tempted to do a little revisionist thinking about his tenure looking at a later governor lord cornbury gives us the very opposite example of a man despised by his contemporaries as the most venal of all the colonial governors he was an occasional public cross dresser wearing the clothes of his distant cousin queen anne but who forcefully guided the colony through a transition to anglican rule the book culminates in chapters that investigate new york s strategic role in the bloody french and indian war and the key part it played in the economic protests and political conflict that finally led to american independence the intricate and tangled web of alliances loyalties and shifting political ground that underlies much of colonial new york s past has clearly daunted many historians from taking on the task of writing an understandable account michael kammen has accepted this challenge and gives us much more than a mere chronicle rather he paints a compelling portrait of colonial life as it truly was although this important book is thorough and informed by primary sources colonial new york s clear and vivid prose offers a delightful narrative that will entertain both general readers and serious scholars alike it pays special attention to localities and contains numerous illustrations that are attentive to the decorative arts and the material culture of early new york surprising and enlightening colonial new york is a delight to read and provides new perspectives on our nation s beginnings

Roman Britain and the English Settlements 2021-09-09 a collection of essays presenting new analyses of data and evidence for population and settlement patterns particularly urbanization in the mediterranean world from 100 bc to ad 350

The Oxford History of the British Empire: Volume I: The Origins of Empire 2001-07-26 peasant perceptions of landscape marks a change in the discipline of landscape history as well as making a major contribution to the history of everyday life until now there has been no sustained analysis of how ordinary medieval and early modern people experienced and perceived their material environment and constructed their identities in relation to the places where they lived this volume provides exactly such an analysis by examining peasant perceptions in one geographical area over the long period from ad 500 to 1650 the study takes as its focus ewelme hundred a well documented and archaeologically rich area of lowland vale and hilly chiltern wood pasture comprising fourteen ancient parishes the analysis draws on a range of sources including legal depositions and thousands of field names and bynames preserved in largely unpublished deeds and manorial documents archaeology makes a major contribution particularly for understanding the period before 900 but more generally in reconstructing the fabric of villages and the framework for inhabitants spatial practices and experiences in its focus on the way inhabitants interacted with the landscape in which they worked prayed and socialised peasant perceptions of landscape supplies a new history of the lives and attitudes of the bulk of the rural population who so seldom make their mark in traditional landscape analysis or documentary history

The Oxford History of the British Empire: The eighteenth century 1998 a comprehensive illustrated history of world war i its causes impact on global politics and economy military and political strategies and the legacy it left behind

The Oxford History of the Ancient Near East 2020-07-07 a history of settlement in ireland provides a stimulating and thought provoking overview of the settlement history of ireland from prehistory to the present day particular attention is paid to the issues of settlement change and distribution within the contexts of environment demography culture the collection goes further by setting the agenda for future research in this rapidly expanding area of academic interest this volume will be essential reading for all those with an interest in the archaeology history and social geography of ireland
