now in paperback with a new foreword by fred krupp
an expert's illuminating preview of the cleaner lighter
smarter cars of the future in driving the future margo t
oge portrays a future where clean intelligent vehicles
with lighter frames and alternative power trains will
produce zero emissions and run at 100 mpg with
electronic architectures more like those of airplanes

cars will be smarter and safer will park themselves and will network with other vehicles on the road to drive themselves as the director of the epa's office of transportation and air quality margo was the chief architect behind the obama administration's landmark 2012 deal with automakers in the us market to double the fuel efficiency of their fleets and to cut greenhouse gas emissions in half by 2025 this was america's first formal climate action using regulation to reduce emissions through innovation in car design offering an insider account of the partnership between federal agencies california environmental groups and car manufacturers that led to the historic deal margo discusses the science of climate change the politics of addressing it and the lessons learned for policy makers she also takes the reader through the convergence of macro trends that will drive this innovation over the next forty years and be every bit as transformative as those wrought by karl benz and henry ford driving the future is for anyone who wants to know what car they'll be driving in ten twenty or thirty years and for everyone concerned about air quality and climate change now

The Deep Zone: A Novel (with bonus short story Lethal Expedition) 2002 read diane mceachern s posts on the penguin blog protecting our environment is one of the biggest issues facing our planet today but how do we

solve a problem that can seem overwhelming even hopeless as Diane Maceachern argues in *Big Green Purse* the best way to fight the industries that pollute the planet thereby changing the marketplace forever is to mobilize the most powerful consumer force in the world women. Maceachern's message is simple but revolutionary if women harness the power of their purse and intentionally shift their spending money to commodities that have the greatest environmental benefit they can create a cleaner greener world spirited and informative this book targets twenty commodities cars cosmetics coffee food paper products appliances cleansers and more where women's dollars can make a dramatic difference provides easy to follow guidelines and lists so women can choose the greenest option regardless of what they're buying along with recommended companies they should support encourages women to spend wisely by explaining what's worth the premium price some green products cost what's not and when they shouldn't spend money at all and differentiates between products that are actually green and those that are simply marketed as ecofriendly whether readers want to start with small changes or are ready to devote the majority of their budget to green products Maceachern offers concrete and immediate ways that women can take action and make a difference empowering and enlightening *Big Green Purse* will become the green shopping bible for women everywhere who are asking what can I do

Tax Policy and the Economy 2005-05 historian thomas j. misa's sweeping history of the relationship between technology and society over the past 500 years reveals how technological innovations have shaped and have been shaped by the cultures in which they arose spanning the preindustrial past the age of scientific political and industrial revolutions as well as the more recent eras of imperialism modernism and global security this compelling work evaluates what misa calls the question of technology misa brings his

acclaimed text up to date by examining how today's unsustainable energy systems, insecure information networks, and vulnerable global shipping have helped foster geopolitical risks and instability. A masterful analysis of how technology and culture have influenced each other over five centuries, Leonardo da Vinci to the Internet, frames a history that illuminates modern-day problems and prospects faced by our technology-dependent world. Praise for the first edition: closely reasoned, reflective, and written with insight, grace, and wit. Misa's book takes us on a personal tour of technology and history, seeking to define and analyze paradigmatic techno-cultural eras. Technology and Culture follows Thomas Hughes's model of combining an engaging historical narrative with deeper lessons about technology. American scholar Misa's case studies, such as that of Italian futurism or the localizations of the global McDonald's, provide good starting points for thought and discussion. *Journal of Interdisciplinary History*. This review cannot do justice to the precision and grace with which Misa analyzes technologies in their social contexts. He convincingly demonstrates the usefulness of his conceptual model. *History and Technology*. A fascinating, informative, and well-illustrated book. *Choice*.
