Post Katrina Health Care in the New Orleans Region

2008

care has been struggled for resisted and celebrated the failure to care in care services has been seen as a human rights problem and evidence of malaise in contemporary society but care has also been implicated in the oppression of disabled people and demoted in favour of choice in health and social care services in this bold wide ranging book marian barnes argues for care as an essential value in private lives and public policies she considers the importance of care to well being and social justice and applies insights from feminist care ethics to care work and care within personal relationships she also looks at stranger relationships how we relate to the places in which we live and the way in which public deliberation about social policy takes place this book will be vital reading for all those wanting to apply relational understandings of humanity to social policy and practice

Care in everyday life

2012-06-27

this first hand report on the work of nurses and other caregivers in a nursing home is set powerfully in the context of wider political economic and cultural forces that shape and constrain the quality of care for america s elderly diamond demonstrates in a compelling way the price that business as usual policies extract from the elderly as well as those whose work it is to care for them in a society in which some two million people live in 16 000 nursing homes with their numbers escalating daily this thought provoking work demands immediate and widespread attention an unnerving portrait of what it s like to work and live in a nursing home by giving voice to so many unheard residents and workers diamond has performed an important service for us all diane cole new york newsday with making gray gold timothy diamond describes the commodification of long term care in the most vivid representation in a decade of round the clock institutional life a personal addition to the troublingly impersonal national debate over healthcare reform madonna harrington meyer contemporary sociology

making tough decisions about end of life care in dementia is a lifeline an invaluable guide to assist in the late stage of dementia

Pain and Palliative Care in the Developing World and Marginalized Populations

2004-03-31

this book examines the work of a major employment group within the health and welfare field it relates to debates on the body and issues associated with disability personal space and autonomy and the power of dynamics of care

Making Tough Decisions about End-of-Life Care in Dementia

2018-08-19

a book to assist primary caregivers in organizing and recording details of the care given to a loved one designed to benefit both the caregiver and the loved one receiving the care this book goes beyond recording of the techniques medical care by also including prompts for routines and preferences that are important for continuity and emotional well being the caregiver will have the peace of mind that everything in their power has been done to keep consistency when someone else must provide the care additionally healthy seniors are purchasing the book and filling in their preferences and needs then telling their children where the book is located in the event that they need care in the future it has been popular for entering their wishes in terms of care if they become unable section for additional information in the back the book has served as a substitute for the tough conversations with their children when their children say they don t want to talk about any unfortunate health change or end of life

Bathing--the Body and Community Care

2000

as the evidence base for clinical practice in the management of life threatening diseases and care at the end of life increases it is apparent that psychosocial factors play a most profound role influencing outcomes at every level from quality of life and satisfaction with clinical services through to duration of survival and mortality this book documents some but by no means all of the developments that have occurred in the past decade in the area of psychosocial oncology and palliative care in hong kong contributions describing interventions by practitioners involved in service development in nursing social work and clinical psychology are complemented by chapters describing academic research and theoretical perspectives the unique cultural mix of hong kong is given rich emphasis in the adaptations made by practitioners and academics to the interventions and theoretical issues outlined as both a documentation of the efforts of some of those who helped psychosocial oncology and palliative care evolve in hong kong and as a reflection of the need to more critically evaluate the impact of intervention efforts in health care this volume provides a valuable resource nurses social workers psychologists and doctors involved in delivering or planning cancer treatment or palliative care will find this book useful this book challenges many attitudes prevalent in hong kong and will we hope begin to break some of the taboos that continue to generate unnecessary suffering among the people cared for by our health care systems the valuable experience documented in these pages can help others build the next generation of services to those with life threatening illness and those at the end of life

Managing End-of-life Care in the Intensive Care Unit

2009

caring for the child with complex needs in community settings provides a valuable overview of the key factors relating to caring for children with complex and continuing care needs despite its frequent and increasing use complex care needs is a term without an agreed definition this shortfall of knowledge is addressed in this book through critical discussion of evidence based research and current health social and education policy it brings together the latest knowledge into one text providing practitioners with the crucial information needed when working with this diverse and broad group of children caring for the child with complex needs in community settings explores caring for technology dependent children who require respiratory assistance caring for children who require home enteral tube feeds and caring for children with complex disabilities it looks at multi agency care respite care for families social service support and educational support of children with complex needs practitioners from health social services and education backgrounds have contributed to the chapters using case studies while a parent of a child with complex needs has provided a personal view of caring this accessible

and practical text provides core knowledge and vital insight required for successful delivery of community care for children with complex and continuing care needs

I Care to Share

2011-11

Compassionate communities are communities that provide assistance for those in need of end of life care separate from any official health service provision that may already be available within the community. This idea was developed in 2005 in Allan Kellehear's seminal volume *Compassionate Cities: Public Health and End of Life Care*. In the ensuing ten years, the theoretical aspects of the idea have been continually explored, primarily rehearsing academic concerns rather than practical ones. *Compassionate Communities: Case Studies from Britain and Europe* provides the first major volume describing and examining compassionate community experiments in end of life care from a highly practical perspective, focusing on community development initiatives and practice challenges. The book offers practitioners and policy makers from the health and social care sectors practical discussions on the strengths and limitations of such initiatives, furthermore not limited to providing practice choices. The book also offers an important and timely impetus for other practitioners and policy makers to begin thinking about developing their own possible compassionate communities. An essential read for academic practitioner and policy audiences in the fields of public health, community development, health, social sciences, aged care, bereavement care, and hospice/palliative care, *Compassionate Communities* is one of only a handful of available books on end of life care that takes a strong health promotion and community development approach.

Psychosocial Oncology and Palliative Care in Hong Kong

1999-11-01

Care of the Acutely Ill Adult equips all nurses with the knowledge and skills to care for deteriorating patients in the clinical environment with its unique system-based approach. This key book emphasizes systematic assessment, careful monitoring, and timely escalation and is essential reading for all nurses working in acute care settings.

Caring for Children with Complex Needs in the Community

2009-01-22

Care in Context is a thought-provoking book that looks at gender inequalities in the context of care, drawing in part from unique transnational perspectives and gripping interviews. This book focuses on key questions that intellectuals, policymakers, and everyone who cares and needs care have to ask, such as: what is good care? who

should be involved in providing it and how should care be arranged and organized so that that the interests of both care givers and care recipients are equally provided for the book offers fresh and nuanced perspectives and is a definite must read for all those affected by issues of care

Compassionate Communities

2015-06-26

Home and Away

1991

when a person suffers from advanced progressive illness palliative care treatments that improve the physical and psychological quality of life of patients and their families can be just as important as treatments that aim to slow or prevent disease progression aimed at gps and trainees palliative care in clinical practice offers an accessible and practical introduction to palliative medicine including a chapter devoted to each of the key areas of symptom management clearly and concisely written and fully illustrated throughout it will be a useful resource for all healthcare professionals who wish to gain an understanding of this important aspect of medicine

Care of the Acutely Ill Adult

2020-10-08

the first of its kind this book describes pediatric palliative care in more than 23 countries each region in the world is covered and countries included are both resource poor and rich authors are multidisciplinary and regarded nationally and internationally in their field clinicians advocates policymakers funders and researchers will learn how programs were developed and implemented in each country authors describe children for whom pediatric palliative care is needed and provided for in their country when applicable a brief history of pediatric palliative care is included noting especially policy changes and legislative acts for example the chapter on poland describes how pediatric palliative care grew from the catholic church into a national movement spearheaded by several health care workers the pole national spirit that brought them through a change in political regime has

also been a driving force in the pediatric palliative care movement the chapter on south africa for example illustrates how a resource poor country has been able to leverage philanthropic and government funding to make its dream of having an infrastructure of pediatric palliative care a reality these are just a few examples of the inspiring stories that are included in this book readers from countries who wish to start a pediatric palliative care program or advance an existing program will learn valuable lessons from others who have faced similar barriers introduction and concluding chapters highlight the strengths and weaknesses of the modern pediatric palliative care movement

Enhancing the Quality of Care in the ICU, An Issue of Critical Care Clinics,

2011-10-11

health care costs make up nearly a fifth of u s gross domestic product but health care is a peculiar thing to buy and sell both a scarce resource and a basic need it involves physical and emotional vulnerability and at the same time it operates as big business patients have little choice but to trust those who provide them care but even those providers confront a great deal of medical uncertainty about the services they offer selling our souls looks at the contradictions inherent in one particular health care market hospital care based on extensive

interviews and observations across the three hospitals of one California city the book explores the tensions embedded in the market for hospital care how different hospitals manage these tensions the historical trajectories driving disparities in contemporary hospital practice and the perils and possibilities of various models of care as Adam Reich shows the book's three featured hospitals could not be more different in background or contemporary practice Publicare was founded in the late nineteenth century as an almshouse in order to address the needs of the destitute HolyCare was founded by an order of nuns in the mid twentieth century offering spiritual comfort to the paying patient and GroupCare was founded in the late twentieth century to rationalize and economize care for middle class patients and their employers Reich explains how these legacies play out today in terms of the hospitals' different responses to similar market pressures and the varieties of care that result *Selling Our Souls* is an in depth investigation into how hospital organizations and the people who work in them make sense of and respond to the modern health care market

Palliative Care in Clinical Practice

2012-06-14

Children's palliative care is an evolving specialty and as such our knowledge base cannot remain static this book constantly challenges the reader to critically analyze their own practices and beliefs within an evidence based framework and as such makes a valuable contribution to the growing body of knowledge on this important subject Susan Fowler Kerry in the foreword this book caters for readers from different working environments and levels of experience it is ideal for paediatric nurses with no specialist palliative care knowledge and also for palliative care nurses with no specialist paediatric experience other healthcare professionals and therapists working with children young people and their families will also find this book invaluable it will also be ideal for undergraduate and postgraduate health and social care students and professionals involved in children's hospices community services and charity groups this book captures not just the rapidly evolving evidence base but also as many current developments as possible and applies them in a meaningful way to the care of infants children and young people living with life limiting illness and their families it offers an overview of contemporary issues and helps to stimulate the type of dialogue that can bring about the actions that will make a real difference for the children young people and families in our care Rita Pfund in the preface

Pediatric Palliative Care: Global Perspectives

2012-01-03

an efficient service

Palliative Care E-Book

2011-04-04

we are in a crisis of care one that needs an immediate response this crisis is experienced in both our everyday lived experiences and in our interactions with the formal health and care systems due to factors such as inequality isolation ecological breakdown and a society increasingly demarcated by winners and losers we feel ourselves to be in a careless world our sense of community and solidarity has become eroded at the same time the capacity of the care system to respond to these growing needs has become more and more limited due to various resource deficits behind these difficulties lies the causal impact of neoliberal economics and ideology how then might we revive our commons of care how to access better care two very specific proposals are presented first the book sets out to describe a radically reformed system of care for modern ireland based on incorporating dialogue as its operating principle designating genuine dialogue as a mandatory metric by which care is delivered transforms the individual from passive receiver of care into a co producer with peers and professionals of care planning delivery and outcomes secondly not only might this animate our caring commons by returning agency to people the book also proposes a guaranteed basic income as a mechanism to animate new forms of commons practices and to liberate people from precarious and oppressive wage labour these two changes are intended to shift our imagination beyond its current limitations into a new realm of the possible to address our growing crisis of care this book proposes two immediately achievable reforms first is to incorporate a genuine dialogic practice into the care system so that receivers of care co produce care plans and outcomes with professionals second is to introduce a guaranteed basic income to animate and resource the caring commons in this way the passive object of care becomes an active subject and agent of a transforming care praxis

Selling Our Souls

2014

for every person over the age of 65 in today s european union there are four people of working age by 2050 there will only be two demand for long term care of which home care forms a significant part will inevitably increase in the decades to come despite the importance of the issue however up to date and comparative information on home care in europe is lacking this book attempts to fill some of that gap by examining current european policy on home care services and strategies home care across europe probes a wide range of topics including the links between social services and health care systems the prevailing funding mechanisms how service providers are paid the impact of governmental regulation and the complex roles played by informal caregivers drawing on a set of europe wide case studies available in a second online volume the study provides

comparable descriptive information on many aspects of the organization financing and provision of home care across the continent it is a text that will help frame the coming debate about how best to serve elderly citizens as european populations age
