towards the end of the nineteenth century the british empire was confronted by two great chinese questions the first of these questions often known as the far eastern question related specifically to the maintenance of british interests on the china coast and the broader implications for british foreign policy in east asia while safeguarding british interests in the far east presented british policymakers with a range of significant challenges as they wrestled with this first chinese question another question kept knocking at the door since the eighteenth century when plans for the establishment of a british colony at new south wales had begun to materialize australia s potential relations with china had attracted considerable interest during the first sixty years of european settlement china retained a prominent place in both metropolitan and colonial schemes for the development of british australia from the 1850s however when large numbers of cantonese miners travelled to the pacific gold rushes these earlier visions began to appear hopelessly naive by the late 1880s the coming of the chinese to australia and the reaction to their arrival had developed into one of the most difficult issues within british imperial affairs this book sets out to tell that story reaching back to the arrival of the british in the 1780s it explores the early history of australian engagement with china and traces the development of colonial australia into an important point of contact between the british and chinese empires

includes pictures includes online resources and a bibliography for further reading it is quite time that our children were taught a little more about their country for shame s sake henry lawson australian poet a land of almost 3 million square miles has lain since time immemorial on the southern flank of the planet so isolated that it remained almost entirely outside of european knowledge until 1770 from there however the subjugation of australia would take place rapidly within 20 years of the first british settlements being established the british presence in terra australis was secure and no other major power was likely to mount a challenge in 1815 napoleon would be defeated at waterloo and soon afterwards would be standing on the barren cliffs of saint helena staring across the limitless atlantic the french without a fleet were out of the picture the germans were yet to establish a unified state let alone an overseas empire of any significance and the dutch were no longer counted among the top tier of european powers australia lay at an enormous distance from london and its administration was barely supervised thus its development was slow in the beginning and its function remained narrowly defined but as the 19th century progressed and peace took hold over europe things began to change immigration was steady and the small spores of european habitation on the continent steadily grew at the same time the royal navy found itself with enormous resources of men and ships at a time when there was no war to fight british sailors were thus employed for survey and exploration work and the great expanses of australia attracted particular interest it was an exciting time and an exciting age the world was slowly coming under european sway and britain was rapidly emerging as its leader that said the 19th century certainly wasn t exciting for the people who already lived in australia the history of the indigenous inhabitants of australia known in contemporary anthropology as the aboriginal and torres strait islander people of australia is a complex and continually evolving field of study and it has been colored by politics for generations after the arrival of whites in australia the aboriginal people were disregarded and marginalized largely because they offered little in the way of a labor resource and they occupied land required for european settlement at the same time it is a misconception that indigenous australians meekly accepted the invasion of their country by the british for they did not they certainly resisted but as far as colonial wars during that era went the frontier conflicts of australia did not warrant a great deal of attention indigenous australians were hardly a warlike people and without central organization or political cohesion beyond scattered family groups they succumbed to the orchestrated advance of white settlement with passionate but futile resistance in many instances aggressive clashes between the two groups simply gave the white colonists reasonable cause to inflict a style of genocide on the aborigines that stood in the way of progress in any case their fate had largely been sealed by the first european sneeze in the terra australis which preceded the importation of the two signature mediums of social destruction the first was a collection of alien diseases chief among smallpox but also cholera influenza measles tuberculosis syphilis and the common cold the second was alcohol smallpox alone killed more than 50 of the aboriginal population and once the fabric of indigenous society had crumbled alcohol provided emotional relief but relegated huge numbers of aborigines to the margins of a robust and emerging colonial society

this edited collection aims to respond to dominant perspectives on twenty first century war by exploring how the events of 9 11 and the subsequent wars on terror are represented and remembered outside of the us framework existing critical coverage ignores the meaning of these events for people nations and cultures apparently peripheral to them but which have as shown in this collection been extraordinarily affected by the social political and cultural changes these wars have wrought adopting a literary and cultural history approach the book asks how these events resonate and continue to show effects in the rest of the world with a particular focus on australia and britain it argues that such reflections on the impact of the wars on terror help us to understand what global conflict means in a contemporary context as well as what its representative motifs might tell us about how nations like australia and britain perceive and construct their remembered identities on the world stage in the twenty first century in its close examination of films novels memoir visual artworks media and minority

communities in the years since 2001 this collection looks at the global impacts of these events and the ways they have shaped and continue to shape britain and australia s relation to the rest of the world
