Air Weather Service Manual 1954

incidents involving rescue from road vehicles are dramatically increasing in frequency there are some 3500 deaths on the road each year with 35 000 serious injuries modern motor vehicles are becoming safer for occupants due to advancement in technology so persons are more likely to survive high impact speeds but are also more likely to become entrapped the fire and rescue service as the primary rescue service requires national guidance to ensure a similar standard of response anywhere in the uk this manual is designed to highlight current best practice with regard to vehicle rescue techniques and first responder trauma care each chapter forms an independent reference source but the publication as a whole forms a complete guide chapters cover vehicle design and construction dealing with incidents safety procedures operational procedures extrication equipment medical considerations and trauma care integrated personal development system i p d s appendices cover highways agency fire and rescue service memorandum of understanding training and general information and emergency services personnel esp aide m moire the cd rom vehicle extrication techniques is a multi media guide to rescue tool handling and extrication techniques

Fire and Rescue Service manual 2007-03-07

downhill skiing is a vital economic engine for many communities in the rocky mountain states attracting 20 million skier days per

season colorado is by far the most popular destination with more than two dozen major ski resorts creating a thriving industry that adds billions to the state's coffers but many ask at what cost michael childers traces the rise of colorado's ski industry alongside that of the burgeoning environmental movement which sprang up in opposition to rampant commercial development on mountains that had been designated as public lands combining official ski resort figures u.s. forest service documents real estate and tourism records wildlife data newspaper articles and public comments childers shows how what started as an innocent leisurely pursuit has morphed into a multi billion dollar business that forever changed the landscape of colorado and brought with it serious environmental consequences this first environmental history of skiing in colorado traces the recreation's rise in popularity as a way of examining major changes in public land management in the american west during the last century as more people headed to colorado's mountains in search of thrills on the slopes the usfs quickly became overwhelmed by the demand and turned resort development over to the private sector the result has been a decades long battle between developers and environmentalists with skiers and colorado residents caught in the middle childers examines the history of the ski industry within colorado throughout the twentieth century along with the challenges the industry's growth posed in balancing the private development of public lands and mounting environmental concerns over issues such as rural growth wildlife management and air and water pollution he then traces the history of radical environmentalism back to the 1960s to show how it picked up momentum culminating in the earth liberation front's 1998 arson at vail ski resort which ended up doing more harm than good to the environmentalist cause by recasting the mega resorts as victims and turning public opinion against all environmental activists in the area as americans weigh their desire for fresh powder against their concern for protecting unspoiled lands childers's book provides valuable food for thought colorado powder keg opens a new window on the history of skiing in the american west as it adds to the broader debate over the management and purpose of national forests

Technical Manual for Crane, Mobile, Container Handling, Truck-mounted, 140-ton Capacity DED, FMC Link Belt Model HC-238A, Army Model MHE 248, NSN 3950-01-110-9224 1985
