this book examines the writing of david foster wallace hailed as the voice of a generation on his death critics have identified horror of solipsism obsession with sincerity and a corresponding ambivalence regarding postmodern irony and detailed attention to contemporary culture as the central elements of wallace s writing clare hayes brady draws on the evolving discourses of wallace studies focusing on the unifying anti teleology of his writing arguing that that position is a fundamentally political response to the condition of neo liberal america she argues that wallace s work is most unified by its resistance to closure which pervades the structural narrative and stylistic elements of his writing taking a broadly thematic approach to the numerous types of failure or lack of completion visible throughout his work the book offers a framework within which to read wallace s work as a coherent whole rather than split along the lines of fiction versus non fiction or pre and post infinite jest two critical positions that have become dominant over the last five years while demonstrating the centrality of failure the book also explores wallace s approach to sincere communication as a recurring response to what he saw as the inane self absorbed commodification of language and society along with less explored themes such as gender naming and heroism situating wallace as both a product of his time and an artist sui generis hayes brady details his abiding interest in philosophy language and the struggle for an authentic self in late twentieth century america
